Bethany's Heart C.L. Scholey

Amidst the snow and icy wasteland, Earth has become a watery grave to many. Zargonnii warriors Finn and Blu search for any remaining human females. Luck abounds and six females are found struggling to survive. The moment his blazing red eyes settle onto Bethany Finn feels in his heart she is the one he wants to end his loneliness. When Bethany encounters two massive aliens, eyes alight, long white hair wildly flying, she knows the pair are either death or salvation. Their encounter leads Bethany on the wildest adventure of her life. After the Zargonnii ship is annihilated by the enemy a shuttle leads Finn and Bethany straight into the path of peril more times than the couple care to count.

These books are entertaining and I loved the different races that have appeared through the series so far. I loved Finn in Book 1. He was such a kind, steady presence. He's a healer, so of course, he needs to be. But he is also sad as he craves love. He wants a family that he knows is possible with a human female.

There are things that I questioned through the books. One being that if the humans look so much like Castians and Torans (Hope I'm spelling those right), why did Blu think Bay a pet/animal? Those aliens are human in appearance. There are a lot of things that also happen out of convenience. Overall, the books are entertaining and there are a lot of worlds to explore. The romances are sweet but wish there had been more depth.

I found this book by accident and I'm so glad I did. It's a great sci-fi adventure. You travel from earth to space and then to several different worlds, all while learning about the different charterers. This book is 3rd and the series and even though I haven't read the others I don't feel like I'm missing any part of the story.

This series is really funny and the heroes are odd looking and with amazing personalities. The series is like chips, you just keep going once you start. If you want quick, fast paced, and sometimes cute alien romance jump in!

3.5 Stars

I love this author but this was not my favorite installment of the Unearthly World series.

The plot just felt a little scattered to me. Finn was always a step behind, trying to find or rescue Bethany. One good thing is that we got to meet some pretty cool (and weird) new alien species.

This book was good but I definitely didn't enjoy it as much as the other books in the series. It was cool to get to see some other worlds, but over all it was basically the same as the first two books and I guess I'm just

kind of over it at this point.

Still a good enjoyable read, but overall kind of boring after reading the first two.

Jen says

Was ok, other two were better. I did like hearing Finns story, I liked his rationale the constant kidnapping irked me however, it was like ooh let's throw in some new aliens possible new story lines just seemed a tad contrived.

T00zday says

I enjoyed the previous two books a little more than this one.

The story begins on Earth as the Zargoni are trying to find more human women to rescue. The hero of the story is Finn the doctor from the first book, Bays Mercenary. Finn and Blu find six women living in igloos in a very frozen area and rescue them. Unfortunately, after they are rescued an enemy shoots at their spacecraft and all are forced into escape pods.

I suspect there will be future stories following the other women in their escape/journey.

This story follows Bethany and Finn as they travel from world to world attempting to get back to Finn's home planet. The chemistry could have been better. I wasn't loving the romance. Finn did zero wooing & simply assumed Bethany was going to be his mate.

The introduction of so many new worlds with possible allies/enemies seemed a little chaotic. Bethany is repeatedly 'kidnapped' away from Finn.

Overall I would say this was worth reading as the story line and world building is enjoyable. The author manages to tie in her other series as well, which I enjoyed.

Recommended as good filler.

Really enjoying this sci-fi/romance series.

Another great story by C.L. Scholey!

Though I like the first two books in the series more than this one I have to say book 3 was still very

entertaining. I do love how fast pace the author immediately gets you into the story.

Pros

I loved both of the main characters. I loved Finn's sensitivity towards Bethany how unique he was from all the other aliens around him. I also really enjoyed Bethany and how she took everything in strides.

Cons

I felt like Finn should have been more mad when they took Bethany and almost killed her but he seems to just hit the alien and be okay after that there's really none of that dominance that I thought I'd see from him which wasn't bad just a little disappointing.

Overall a great read with a very sweet Romance and a good storyline.

Yes I would read more books by this author.

Yes I would recommend this book to others.

Great series

I'm really enjoying reading this series.
Love the characters and how they live.
The adventures they go on are hairising.
Well done C L Scholey, a great read for
any who love Scifi, fantasies, adventure, with lots of action .

Ann Leona says

I enjoyed this story

The story of the ladies rescue was good. Finn was very sweet. I seriously wanna read Bertha's book and what mate she ends up with though ? that will be interesting.

This read like a story whose only purpose is to take the reader on an exotic adventure. Visit different settings, cultures, and move on to the next (like an explorer).

While there's nothing wrong with an adventure story, there is when the plot is devoid of anything else. These different settings didn't do that much to further the plot forward. If you take away the reader's introduction to different settings, I got absolutely nothing else out of the plot.

Why did the two characters fall in love? Them saying 'I love you' is not proof to me that they love each other. Them staying together for survival is not proof to me that they love each other. One helping to keep the weaker one (weaker to the planetary conditions) alive is proof of moral honour, not love.

I'm also not sold on the character's ability to light living beings on fire with her mind when she can't use pyrokinesis for anything else. (These random abilities that humans are gifted with after coming into contact with mind aliens really notches my incredulity to maximum).

After reading a couple other books from this author, I've come to the conclusion that while the author has a big imagination and can create interesting worlds, she struggles with character depth and development, and plotting. She can create simple plots, but anything more complex than that is currently out of the question (either the author just doesn't want to, can't, or doesn't put the effort in). Complex plots are comprised of scenes that deal with choices that the character makes. Choices that are hard and put strain on the character psyche. A few scenes later, a choice that the character has made before comes back to bite the character. That choice should have been controversial and hard to make. These hurdles in the plot should have us observing the basic human nature and mental struggle to make the right decision, or why they made the wrong decision, and moral dilemma/struggle. I would expect a story with a human falling into such a sci-fi setting like this to have to go through these questions.

This would have added more layers to the story and improved the quality.

One last thing, commas. This book is missing some.

In this one, Zargannii males travel to Earth in search of the remaining females. Reading *New world* I only got a glimpse of what was happening to Earth in the beginning, but here you can actually see the end result and it's not pretty. I understand that the Zargannii are solely interested in females, but it's still cruel to leave what's left of the male population on the dying planet. Just saying.

I liked Finn's character from the first book, so It was nice seeing him finally getting some love, he deserved it.

Also, I like that in this book we get the chance to learn more about other planets and other types of aliens. All in all, still enjoying the series.
