## **Fool for You** Megan Noelle

Seven years ago Danielle Hamilton left her home in Serenity Cove leaving behind a drug addicted mother, work-obsessed Grandmother and the first boy she has ever loved. Danielle promised herself she would never return, but now - she has no choice. The family Inn her Grandparents put their lives into is going under and Danielle is the last hope they have to save it. When she temporarily returns to her home town, she's even less prepared than expected to run into her first love, Oliver Garrison.

After their encounter leaves her on edge she decides what is really needed is a distraction. What she doesn't expect is the way she feels when she meets Corey Preston with the bad boy edge, a gentle heart and smoking body.

Oliver is everything she thought she ever wanted while Corey is everything she never thought she needed.

Dani promised herself when she left Serenity Cove at 18 that never again, would this be her home. However, her heart didn't get the memo and for the first time in her life, she feels at home.

But will her demons from the past let her have the love she deserves? Or will she return to her life in New York - once again leaving her heart behind in the one place she fears to be?

## Scandalous Book Blog says

I signed up for the blog tour as soon as I read the synopsis, I was intrigued.... and for good reason because I absolutely wholeheartedly love this book.

I read an average of 4-5 books per week. sometimes they just blend together totally forgettable, but not Fool for you no fucking way. it held me from the start pulled me into a transfixed state lost to the world around me and engrossed in the entity of Danielle and her very fucked up life. It was a complete train wreck and I just could not look away as everything unfolded.

Danielle 25 is our leading lady professional successful women living in New York; originally from Serenity Cove a place she escaped at 18 leaving behind a dysfunctional family and personal heartbreak....well she left the crazy family and that particular heartache with she left for New York. Only to incurred much more pain and suffering in her personal life whiles striving professionally.

Bad relationship and bad relationship has left her damaged and broken forever hurt and alone. Except for her best friend Gabby....She loves and supports Danielle (Dani) providing a caring soul in times of despair.

Violet Dani's Grandmother calls upon her to take on the responsibility of the family business which her druggie mum nearly ran into the ground. Now her mum has being incarcerated an her grandparents are retired the burden is placed oh her shoulders.

Left with on other option she reluctantly leaves her job and gives up her apartment to return the the town she refers to as Hell.

(quote) "I needed time to wrap mt head around what was happening and mentally prepare myself for what ever was going to come my way"

I don't think anything prepared her for when she finally returns to Serenity Cove after 7 years and the first person she runs into is Oliver (hated him from then) the person that hurt her and left her feeling used, creating part of the reason why she felt the need to run after she graduated high school.

(Quote )"Ollie was the root of my memories of Serenity, and arguable the cause of one of my biggest demons."

Anxiety riddles and stressed from being back in her personal nightmare Danielle seeks soles at the local bar in the form of a one night stand.

(Quote)"All I really needed was a good, random, roll around in the sack."

what she did not bargain for was that her distraction and bar owner Corey would be the sweeties, gentlest, kindest, sexiest man she would ever meet, flipping her already screwed up would on its head.

(Quote)"why was Corey suddenly taking over my thoughts and making my body crave his touch"

Corey 27 my God this man went straight into my top 5 book boyfriends. he is everything a man should be passionate, caring, protector, friend, lover, fighter (he had to fight to over come his own fair share of

problems) with a heart of gold ohh and I forgot he is also HOT as hell.

(Quote)"I was flashed a heart-stopping, knee-shaking, panty-dropping smile as he showed off the dimple in his right cheek."

He is exactly who she needs the type of guy that is willing to do just about anything for her and love her unconditionally. But Dani being a damaged broken independent women hauling around Posh Spice size baggage around with her fight this beautiful man at every turn. she kept her walls up firmly in place. she would much rather hurt herself than give into the Love she feels for Corey.

(Quote)"My body shiver at his touch"

"After having had every single past relationship end in utter failure I was finished"

Dani demonstrates just how badly someone's past can control their present and future if you allow it to be your foundation.

Corey put up with a lot of her shit even watching her go on dates with other guys in order to show her just how deeply he feels and that he is willing to wait until she is ready (I dint think she will ever be fucking ready).

To say Dani infuriated me was an understatement. I screamed and shout at my IPad for her to wake up and smell the bloody coffee; that Corey is madly in love with her, get over your shit and stop hurting him.

I read the end of this book on my way from work on the bus and I had to physically bang my head against the bell post several times (people looked at me as if I was mad but it just could not be helped).

The stress Danielle put me through was no joke, her dumb decisions left me reeling I just wanted too slap some sense into her pretty little head.

This is an excellent duet novel my Megan Noelle it's packed with a little of everything, Love, Romance, Sex, Family Drama, Angst, stupidity, humor, acceptance and above all the perfect leading man Corey.

"Just not a big fan of Men disrespecting Women"

It also has an element of reality. we could all take something away from this book. Mainly that if we drag our past around with us it will eventually become too much to bear corrupting the best of ourselves dragging our souls under with all the hurt and un-forgiveness. Blinding us to something or someone amazing just because of our past. sometimes it is much more beneficial to just let things go and move on not carry them around unresolved tainting everything else.

don't let past hurt determine your future take control of your own destiny you can miss out on something great just because we are held captive to the past.

### **Danielle Jamie says**

I have the honor of calling Megan my friend and got to read this book before it was released. I loved it! Danielle (Love the name) is a very strong and independent woman. Who through out the book at times is to much of those two things. She's been hurt and let down so many times that she has built up a fortress around her that is so high and so strong, you think there is no one who'll be able to get through it. Then comes Corey, oh my I loooove me some Corey! He is hot, sexy and no matter how many times Danielle tries to push him away. He's right there by her side, showing her that not all guys are the same. Then there's Ollie. I was really excited when i read the blurb that she would return home and rekindle her old high school crush. But as soon as we met Ollie I didn't like him. But Dani is still holding on to her high school crush instead of letting him go and opening her eyes to the AMAZING COREY! All I know is that guy has so freakin' patience!! I wanted to rip my hair out and scream into my tablet at her MULTIPLE TIMES! This book makes you laugh, cry, boil over with anger and frustration. It's a fantastic read that you must add to your TBR list!

Cannot wait for Book 2!!

Ok I need me a Corey ;)

I felt sorry for him throughout the whole book, he gave her his all & she gave nothing bk. Dani just annoyed me no end, she had the perfect guy & did nothing! Would have liked a better ending or an epilogue

### **Love N. Books says**

This book is one fucked up hot mess.... and I literally mean that as a huge ass compliment. This is a a fanfuckingtastic book! I picked up the book and stayed up all night reading it because I had to see where this went. That, and I'm totally in love with Corey and wanted to snatch him out of the book from Dani.

Corey is the hot tattooed bar owner... but not alpha bad boy. Oh, I fell for him hard. And this boyfriend actually has his shit together! He falls fast and hard and wants the relationship.... Honestly, what female isn't tearing off her panties for that? Dani. Dani isn't and I wanted to smack her across the face for that. But I kinda love her too.

The dialogue and banter between these two had me laughing and crying (and bookmarking/highlighting the shit out of the book). Dani is the one with issues. While I wanted to smack the shit out of her to get over her issues and just love on Corey, the issues just make SENSE and make the story work. As frustrating as that is...

I loved the characters... all of the characters! Great development and you honestly feel like you know everyone in this book – some you will even grow to hate. Very smooth plot and flow. Never found myself skipping over parts or eyes glazing over. I was super glued to this one. The romance and love scenes I MELTED over. Literally melted. Some of the sweetest romance I've read. Yep... swoony is the term for this one.

P.S. The end will shock the fuck outta ya. Don't say I didn't warn you.

Highly recommended you go buy this one now, you won't regret it.

Just FYI Megan... I will totally keep Sanders company. ;) And you better be spending every waking second writing the sequel.

Okay totally didn't know what to expect when I started Fool For You ~ sure I read the synopsis so I thought I had a general idea well let's just say I got way more than I bargained for out of this read ~ It was one book that I started and I spent a good amount of time ...

Dani has been living in New York ever since she left Serenity Cove right after she graduated from high school. Dani has always taken care of herself ~ she hasn't been dealt the best hand in life and well her Mother, I use that term loosely, well she made me want to ...

her freaking un-motherly ass. Oh the dear Grandmother ~ well she certainly had me doing this a couple times..

with a few things that came out of her mouth. But I regress Dani returns to Serenity Cove to run Hamilton Inn ~ her Grandmother's Inn that was always the number one priority in her life. Dani's Grandfather was the only person who Dani "knew" loved her. The more I read the more was revealed and Dani has had so much heartbreak in her short 25 years year's with the men who entered and left her life that I was .....

it was just devastatingly sad to re-live what she had been through. Dani comes back "home" and needs a distraction and she finds one with the hot as sin tattooed bar owner Corey ~ personally I would've...

with Corey just as Dani did the first night she lays eyes on him at his bar the Underground and these two have one heck of sexual chemistry and ladies ....

were flying! Well Corey doesn't just want the occasional "hook" up to let go and relieve stress ~ he wants to know Dani and he wants to take care of her! I just ....

cause Dani did something's that irritated me and I wanted to just shake the living crap out of her. The banter between Corey & Dani had me

and I thought they made the perfect couple but what happens when your distraction becomes more than you thought they would be. See Corey is supposed to be Dani's distraction from Ollie her first love and one of the reasons she fled from Serenity Cove in the first place. Dani's trust issues ultimately made me...

I understood her reasoning I truly did but I seriously wanted to

her when she had something so good standing right there in front of her freaking face. There were times that I was

and there were times I was

but I can HONESTLY say when I got to the end of Fool For You I was

DID.NOT.SEE.THAT.COMING!!!! I was literally...

wait one freaking minute you do not END a book that way ~ No freaking way ~ I threw a major freaking fit ~ I had to calm my little 5'3 self down ~ breathe and process so I could right the review and then I ..

because you know what Oh Hell Yeah that was a PERFECT ending! I didn't even realize this was only the first in the series and I can not wait to see where this series takes us. I have my hopes and fingers crossed that Dani ends up with WHO I want but because I'm all into being shocked while reading I'll take what the author gives me~ um kind of have to don't I?

What a beautiful 5 star book about a beautiful young woman who doesn't know where home is and whose trust issues may very well cost her the most important and best thing for her. If you want a book that will

literally have you dumbfounded at the end then Fool For You is definitely it!

Why do women sabotage what could be a perfectly good relationship based on the actions of men from the past? Why should the guy who is really trying to give you a HEA suffer because of the previous douchebags that you have dated? And why why why do we believe that first love is the only love and believe if given the chance we should go back to that first love? Didn't it NOT work the first go round for a reason??

These are all the questions that I was asking myself while reading Fool for You. Dani is a very confused girl and it is very obvious through her actions. And needless to say, it pissed me off to no end!!

It was pretty clear from the beginning that Corey wanted more than a simple one night stand or a friends with benefits type relationship with Dani. His feelings were like a flashing neon sign that said "Pick Me Pick Me". But because of her old hang ups from the treatment she received in past relationships, Dani decides to make the poor guy suffer for others past mistakes.

How you ask? Oh, let's see...she constantly reminds him that they are "nothing serious" which actually isn't that bad when you consider she also decides to on a date with Oliver, Her first love. Yep you read that right, we have a love triangle here folks.

Oliver should never have never even been in the running. He was a complete asshat! And I knew that very early on, but I just kept getting conformation of that the more I got to know about him. If I could have reached into the book and given Dani a good smack upside the head, I so would have!

So, if you haven't guessed it yet, I am not a fan of Dani's. She is a complete idiot to let a man Corey believe for one second that he does not have her completely. I would have shouting from the rooftops for all to hear that he was my man. But nope not Dani, she denied to everyone that they were more than just friends.

And the ending...talk about a cliffhanger!! I am okay if we are left with unresolved issues but this just felt like the author stopped in the middle of a chapter. Not what I was expecting, especially for a book of this length (over 300 pages).

I have debated on the rating the whole time I was writing the review and had there not been the cliffhanger ending, it would have easily been a 4 star review, but that combined with the love triangle has me withholding a star.

I will end my review by saying for a new author, the book is well written. And I would even say I felt like I could see the author come into her own as the writing improved as the book progressed.

Very good book. Dani had me pulled in from the beginning. But I couldn't help not hating the way she pushed everyone away from her. The angst in this book drove me crazy! Dani left her New York life to go home to help out her grandparents at their Inn. Her mom, was a drug and alcoholic who did nothing but berate Dani at every turn when she was younger. But her carelessness landed her in prison and the Inn to almost close up. She went home to help out. But when she drove away those 7 years ago, it was because her heart was broken. Oliver was her high school crush and first. But when she saw him locking lips with her so called BBF, Jayme she knew she could never have him. She goes home to get the Inn back up and in running order. She meets Corey one night while he is bartending. And they fell in bed instantly. Their connection was so on. Who wouldn't want a hot guy fawn over you? But at every step forward, there were 3 back. Corey only had eyes for Dani, a successful business man was only looking for love. He was so sweet to her and very giving as well. Dani just walked all over that! Until she finally saw the light and gave in and let her walls fall down. She did love everything about Corey. But it was too late. She decided to walk away from it all after telling him that she did love him. Ugh... wanted to scream at the end of this book... Ollie, has a motive... and I am not quite sure what it is... times like that I wish that Corey would move on and find someone just to show Dani how much she F'd up! But I hope that they do get back together..... as Corey does deserve some happiness, as well as Dani.

My god I want to find me a Corey ... Lol think my husband will mind?? I dislike Oliver and think he's a waste of air space... I can't wait to find out what happens next! Team Corey all the way here!!!

### **Jodie says**

Omg I'm so glad I've waited for book two to be released before I read this book as the cliffhanger is massive.ok Dani annoyed me big time in this book I felt so bad for Corey he has fell head over heels for Dani and she knows it but still goes on dates with Ollie who I want to beat over the head with a stick and say stay away from Dani.In the next breath I love Dani it's definitely a scream at kindle book.Dani has to come back to her home town where she ran from after heartbreak to help her nan and grandads business Dani doesn't want to go back she has lots of demons there and leaving her best friend behind hurts like hell.on a night out to try and forget her problems Dani meets Mr hotness and bar owner Corey who I've fell in love with :) can Dani get past all her pain and make a future in her home town? Can she move forward with Corey?.I recommend this book to everyone brilliant read.

### **Traci Anne Hayden says**

This is an OMFG book that will keep you captivated from the first word to the last. I was emotionally attached to the story of Danielle and Corey from beginning to now, even after finishing read the book. I'm invested in Danielle's happiness.

Corey is not like anyone I've ever read about. As much as he wears his heart on his sleeve, he has a wall built around it. Danielle is the hammer that smashes through his wall, not even realizing how quickly she did. Danielle's walls are so much thicker and made of metal. She fights every happiness that she deserves with the history of failures of all the men she's involved herself with.

At every turn in this book I wanted to either hug Danielle, smack some sense into her or just kill her for the foolish decisions. In the end, I was screaming at her for the ridiculous notion of what she can and can't have.

Megan spins an intriguing tale of emotions, reality and desire. The book left me screaming for more. It also leaves me with an overwhelming desire to hunt down Megan and scream at the top of my lungs about how she could make me want to be Danielle as much as I want to kill the girl too.

My favorite line from the book is "This moment. Having you here lying on me, resting with me... it means more to me than you could imagine, Danielle. Never before have I felt such peace with another person. Everything just feel right."

### **Yari says**

The title really nails it down. It uses the exact word I would use (Well... with maybe some profanity) to describe Dani. **A Fool!** But I am getting ahead of myself.

I absolutely loved this book. It shows how everyone is "damaged", well some more than others, and their inabilities to move past the events that have made them this way.

### **Dani**

Dani/Danielle was self-confident, driven, open and self-assured in business. In love she was none of those things. When her family needed her to look after the family business she came back to the home that she had long ago left. The place she swore she would never go back to, Serenity Cove. As soon as she sets foot on Serenity Cove she runs into her first love, Oliver. A person that she has always carried a torch for. Seeing him stirs feelings in her that she desperately wants to get rid of. (I instantly didn't like him, but it may be just me)

### **Oliver**

Trying to distract herself from the unwanted feelings Oliver has caused. Dani goes to the local bar where she meets a sexy, charming, tattooed, smoking hot bartender, Corey. He is just the type of distraction that she needs.

### **Corey**

**"I'm here tonight because for once I don't want to think about anything. I don't want to worry about the bullshit that goes along with emotions; I just want to have fun."**

**"So why didn't you come with friends?" Corey asked; placing his elbows back on the bar. Matching his posture I did the same.**

**"Because the kind of fun I'm looking for, isn't the kind where I need a group of my friends around."**

Oh Yes, Corey is exactly what she needs!!!

Corey, Corey, Corey! I can't gush enough about Corey. He has made it into my top 5 book boyfriends for sure. Words can't even describe this yummylicious man. Well, I am sure they could but none of them would do him justice.

Oliver makes his feelings for Dani known (Ugh!)

Corey quickly became much more than a distraction. Dani, however, always kept her guard up. Burned too many times to count, she believed she must be the cause of all her relationships having gone awry.

**"In my past I've had relationships with several different men. Sometimes the relationships lasted a couple of months and others much longer. They all cheated on me, lied to me, and/or made me feel like nothing more than a fool for believing the words that so easily spewed from their mouths."**

For this reason she keeps all her walls firmly in place.

Corey, however, is always there for her when she needs someone. Quickly becoming her "person".

**This moment. Having you here lying on me, resting *with* me... It means more to me than you could ever imagine, Danielle. Never before have I felt such peace with another person. Everything just feels right."**

Dani doesn't want to be a fool and trust his words. Her heart is too battered. Even her best friend, Gabby, can see that she closes herself **WAY TOO MUCH**. Gabby had Dani make her a promise.

**"Promise me you won't close yourself off so no one can even try to climb over the wire fence you've put up. You're too good of a person to go through life without someone by your side."**

Will she keep this promise?

How will she overcome the damage that others have caused?

Is it Oliver or Corey who her heart wants?

When love stares her in the face, is she bound to forever be a **FOOL** and not take the leap?

This book made me a little nutty on some parts. At times, I was screaming at Dani, over her foolish ways. I was swooning over Corey. I was cursing at times at Oliver and his untimely appearances. The ending made me gasp out of sheer horror! Having said that, yes there is a cliffhanger. Just a warning for those of you that are like me and have a love/hate relationship with them. ;)

I can't wait to get more of this story in book two of the "For You" trilogy.

This is a fantastic novel by Megan Noelle. I am looking forward to what's to come from her. She made a fan out of me!

### **T.A. McKay says**

Let me ask a question....do you want to read the same old same old love story? The hot man meets the weak woman and tells her what she needs! If you do then this ISN'T the book for you....you need to pick something else!

If your looking for a hot story with great characters, a little(!) bit of hot steamy sex and an ending that will make you scream....then this is the book for you!

Now Im not gonna give too much away with this review as I want you all to have the pleasure of reading it yourself....so where do I start?

Lets go with the very obvious selling point...Corey! You are all gonna want him....but your gonna have to get in line behind me as I saw him first!! He started of as just the hot tattooed distraction but oh boy soon he became much much more! He is sweet and loving.....and did I mention before he was hot! I love a man who knows how to treat a woman and he really does know.

And then theres Dani, strong willed, hard headed and really bloody frustrating!! I dont go for the weak lead female characters...I love strong women and she totally fitted that bill,a bit too much sometimes! There were times through this story that I just wanted to grab her,give her a good shake and tell her to get a clue! Im all for being careful with your heart but goddamn woman!!! I do love her as a character(even if she frustrates me) she has been dealt with a bad past but she isnt moaning and whining about it all the time. She is strong and always completely honest about her feeling....well to a certain extent.

We also have Oliver or Ollie....what can I say....the guy is a douche! Someone needs to run him down and then reverse back over him!! Im not sure if its a personality thing with him or the fact that he causes problems that I hate!

There are other characters who come into the story like Coreys sisters but I will let them introduce themselves to you....but lets just say that you will love Karly! She is a little spitfire...lol

The way that the book is written totally fits with the way I like to read, I love to feel emotions but I really hate too much drama with it. There are times in this book where you can feel your heart breaking or butterflies in your belly but its not totally crammed down your throat forcing you to feel that way. Its all very subtle which made it feel really believable and made me fall in love with it. I think I went through every emotion possible reading this book....I felt happy, excited, sad, angry and horny....and then ended up with that 'OMG NO!!' feeling.

I will tell you there was a bit of the book I really didnt like....I mean it really didnt work for me at all....THE BLOODY ENDING!!! I mean really! Im not the best at waiting for the next part of a series to come out but this just officially made it 1000% harder!

Well I hope this helped you pick this book to be the next on you TBR list as I really did enjoy it and its only fair that you get to enjoy it aswell. Its Megan Noelles first book and I have to say if all her books are this good then she definitely has a fan for life!
