Joy Norman says

Enjoyed the book with its twists and turns.so many parents who were so cruel and treated a female as a nobody. No chance to better yourself only to wash iron and cook amongst all that look after all the children and clean.hmmmm!! The women were treated like second class citizens with no hope of moving away from that same environment.we see Kathleen as quite different as she has taught herself to read however because she is not married her father arranges a partner for her.This starts a nightmare for Kathleen however good wins out in the end

Ann says

A bit melodramatic but an easy read.

Marisa Parker says

It starts out well, dips slightly in the middle and then gets interesting again. An enjoyable historical romance.

Joy says

Not quite as good as the first book, but nevertheless an easy read, well written and rounded characters.

Trudie says

The 1st in the honeyfield series, I really enjoyed this about Kathleen and her life after she runs away from home. I look forward to reading book 2.

I wanted to love this book, but I couldn't. The story could've been awesome as it had solid material but it didn't go the way I thought it would.

Kathleen is an independant, thinking woman in a time where women were only destined to cook and bear children.

She had a violent father who not only took all of her wages but to make things worse, wanted to marry her to an even more violent man.

So far, things are going smoothly. But the moment Kathleen decides to run away, I realised she wasn't that force of nature as I thought she was.

She was terrified, I understand that, but for me, she was too afraid for someone who's life was in serious danger.

Never mind, I kept reading, and things weren't getting any better. Kathleen got married to assure her safety and her husband wasn't exactly a light as he often admited.

Kathleen gets pregnant and gives birth twice, this could have changed the way things would go now that her and especially her children were in a life threatening situation, but all she does is panicking again and again. Also, in this story, some people have some "special gifts" like finding lost objects, feeling and seeing ghosts, a bit weird but I've read weirder stuff.

Chapter after chapter, I kept waiting for a surprising plot twist that never came, instead, disappointment was au rendez-vous.
