### **Tanja says**

This is a comic book without text. We used it a lot in elementary school. We looked at one comic strip together, discussed it and our homework was to write a short story that went along with the pictures we had talked about. Fun times!

**Désirée says**

These books were a big part of my childhood. The Persian version contains stories explaining the comics, and the ending is quite depressing; especially when you consider the tragic fate of Ohser. He was quite a hero in my opinion, producing these delightful cartoons in the gloomy prisons of the Nazis, all for his son.
