I have this marked as read to remove it from my currently reading list. I really liked the 1st book but this one, I was making myself turn the pages. This won't stop me from reading Deja's work but this one was not a good one. I'm on to the next!

I love Joy Deja King. Her books always leave me wanting more. I am excited to read the next part in Baller Bitches. (I wish editing was better. I always find a minimum of 5 errors in her books.)
