Jennifer says

There was some very neat ideas in here. Very cool crafts. I have always had a thing for duct tape and it's various uses as well as crafts in general, so this was a very handy book.

Gisela Hausmann says

Ever since I saw a duct tape bag, a few years ago, I have been somewhat fascinated with the topic.

This must be the most complete book about making water and tear proof bags of all kinds.

There is no shortage on ideas and the many pictures help to explain how it is done. I really liked the idea to use fabric for the inner lining. Additionally cool is the idea to recycle an old worn bag and make it chic and hip again. The featured Backpacking Pack is fascinating. I did not know that it was possible to do that but the author found a creative solution how to build the needed frame. However, my absolute favorite in this book is the Duct Tape Messenger Bag. I think it would turn heads even on Worth Avenue in WPB - because it is beautiful. Love it.

I would recommend this book for all parents, who are looking for a cool hobby for their children, which keeps their hands busy with something else than texting.

Great ideas - 5*****

Gisela Hausmann, author & blogger

Mathew Carruthers says

Like other titles from Instructables, this book has some very neat ideas. The biggest problem is also its biggest selling point - all the articles are user-submitted. This results in a very inconsistent reading experience - there is no formatting standard for individual articles, there seems to be a lot of duplicated efforts in project themes, and the whole works need an editorial overhaul to clean up issues of grammar and spelling.

Michelina says

Duct Tape Bags is a super cute e-book about how to construct various things out of good old-fashioned duct tape. Projects included in this e-book...

- Totes
- Drawstring bags

- Handbag
- Backpack
- Messenger bag

And many more.

I personally made the no-sew tote, while it isn't the prettiest thing in the world it certainly serves its purpose.

Kristi L Clephane` says

This bag-making book is more my speed! Ha ha. After reading a legit diy make your own purse book, I cracked this one. This book reminds me of how creative people can be. Some of the ideas were off the wall, but some were really good! And, I may even try to diy a duct tape bag, myself.

Sara says

Normally I love Instructables, but this was basically just several iterations apiece of the same five projects. Plus all the tutorials are on Instructables anyways, and you can actually print them out from the website rather than squinting at your Kindle screen.

GoldenjoyBazyl says

I LOVE the first project- making a duct tape handbag. While some of the projects are hard I never thought of using duct tape in any other way than shutting someone up! Bawhahahahahahah!
