So far , the first recipe I've tried didn't work as written. As a southern baker I bake biscuits often enough. The dough made following the directions would not come together. After almost an additional 1\2 cup of liquid the dough finally came together. The scones then took another 11 minutes of baking over the time called for in recipe. Not sure an inexperienced baker would now to make these adjustments.

Scones (Scrumptious Scones, Simply the Best Scone Recipes) by Sara Winlet

This recipe book is all about scones. Lots of useful tips and information before you even start baking them.

Some recipes along with photos but no nutritional information.

Some of these seem so basic but the combination of the ingredients would make them seem so special.

My favorite would be the harvest apple or anything with cranberry.

There are lots of delicious recipes, whether you want fruity or bacon or cheese. All easy to prepare and tips in the front of the book before you get started. The recipes also have ingredients you would normally keep in your pantry, so you can prepare these when ever you get the craving for one! great book would definitely recommend this.
