Some things do happen for a reason and at the end of all hope, when they least expect it, they find each other. A devastating touching story, I really loved it.

I think this is Erin Noelle's best work yet. *Surviving Us* dealt with tragedy without making me feel like I was drowning in it. She balanced the angst with some great humour and sexiness. Both Davis and Bristol were well developed characters who were believable and had great chemistry together. The setting of the story set the pace for the book and made the instant attraction viable and realistic. I also loved the range of secondary characters that we were introduced in the story. I admit I'd love to see more of Kayden. He definitely has a story to tell.

Reading *Surviving Us*, I can really see the growth in Noelle's writing. There was more depth and life to this story and I have loved all her books. It's been a while since I have cried reading a book and darn it if I didn't have the tears falling with this one.

Surviving Us is a quick read and one that doesn't leave you bored or missing out. It's a great weekend read.

I seriously CANNOT get enough of Erin and her imagination!! She literally blows me away every, single, time! Surviving Us, is one of those instant loving books. I am MADLY in LOVE with Davis..he is AMAZING! Bristol, on the other hand is a survivor through and through and I love that about her. This book overall is now one of my favorites by Erin Noelle. This will definitely be one of those, "I HAVE to read that again," type of books.

Okay. I've been a super fan of Erin Noelle since I picked up Metamorphosis. I was hooked when Ambrosia came out. I nearly died reading Euphoria. I was twisted in When the Sun Goes Down. I fell in As the Dawn Breaks. I loved Conspire. But let me tell you. SURVIVING US ... I can't even begin to say enough wonderful things about this book. I'll try though, don't worry.

There has never been a book that Erin Noelle has written that I haven't loved, but until now, Meta has been my absolute favorite. Actually, Meta is in my list of top ten books I've ever read. I just loved it so much. It was one of the first indie books I ever read and it set the bar high for all other authors. Erin's topped that list yet again. One thing's for sure ... Erin can write some NA.

Davis McKay is tied for 1st place of my all time favorite book boyfriends. He's REAL. He has problems, but aren't your typical problems ... they're heartbreakingly, devastatingly, gut-wrenchingly real ... he is PERFECT. Bristol is the kind of heroine I feel most connected to ... strong, loving, knows sports, LOVES SPORTS, just another one of the guys, but is very feminine. She's the complete package. BRISTOL IS MY #1 BOOK GIRLFRIEND!!!

Their both survivors of traumatic pasts and flee to an island (which sounds absolutely beautiful and is now on my bucket list) for a retreat of sorts with other survivors from around the world. They're supposed to be helping each other deal with those tainted pasts and learn how to move forward. Bristol and Davis might have gotten more than they bargained for. Falling in love was not in the cards for either of them.

I was a highlighting fool this entire book. The words ... they were so wonderful, but not stuffy. They seemed like things people would actually say .. their actions were things people would actually do. I loved each and every second of it. SURVIVING US is NOW my favorite Erin Noelle book to date ... and in my top 10 reads of the year.

Congrats on another fantastic novel, Erin. I see this one doing exceptional things. You've set the bar again. I could read Bristol and Davis for the rest of my life, that's how wonderful they are.

***** 5 Cranky Stars *****

To be the sole survivor of a catastrophic event can be debilitating.

To have to relive that event portrayed as a hero every year can leave you guilt ridden and unable to move on.

This is the life both Bristol and Davis lead until they meet at a retreat for survivors.

A chance meeting, instant attraction and a heap of baggage. Nothing could stop these two from surviving each other except themselves.

This book pulled, yanked and tore at my heartstrings. Erin Noelle knows how to suck you into a story and leave you feeling bittersweet at the end.

Through all of the trials that Bristol and Davis face, they find a way to overcome the challenges.

This is a book that I've read many times. The message is clear and the love is strong.

I highly recommend this author and this book to everyone.

Good emotional college romance read...

Good read. Two people who lived through tragedies and happen to unexpectedly share some time together and end up falling in love. The things that led them to each other aren't always pretty, but... possibly worth it in the end. The only reason this wasn't a four or a five was because the ending was good, but didn't really live up to the emotional first part of the book. Still a good read none the less. If you're looking for sort emotional and really hot college romance in a unique setting, then this is it!

WOW.

Almost 2 years ago I read this book called Metamorphosis that I absolutely FELL in LOVE with the writing, characters, and the author. Since then, we have become friends and she has put out multiple books including follow up to that series. I have enjoyed all of her books but never any as much as Meta.

Until now.

THIS is her best work yet. Excellent characters, storyline that is relatable in a lot of ways, and most importantly an AMAZING book boyfriend (Davis McKay baby) S-W-O-O-N.

Davis and Bristol are both survivors to horrific accidents. After going to a survivor retreat, they meet knowing their attraction can only last the duration they are there. Davis is a playboy who is entirely too broken to give Bristol a real relationship and Bristol is still struggling herself and doesn't trust Davis as far as she can throw him

Can two broken souls survive one another? Or will they just destroy each other further?
this is a MUST read. Do NOT pass this amazing book up!!

I have a mix feeling about this book. I like the characters. Bristol and Davis is electrify from beginning until the end. I also feel their heart broken when they said goodbye. Such as sweet and heart wrenching goodbye.

But I need the story to be as electrifying as the characters. The story is much luke warm feeling although I see possibilities to make this book more dramatic. With that past story as Bristol and Davis, it could be more dramatic.

Surviving Us, Erin Noelle's best story yet... in my honest opinion at least! From the most well rounded characters to the realistic and relatable storyline, I was engrossed cover-to-cover falling in love with Bristol and Davis - with their individual stories, with their passion, with their life.

When you encounter a life-changing event it sticks with you, sometimes you never bounce back, sometimes it just takes the right thing or person to help bring you to the turning point to help you bounce back and become the person you were meant to be. Davis and Bristol both encounter an event that leaves them forever changed, after a chance meeting at a retreat on a remote island for twelve days they discover what it truly means to live life.

Between Davis and his ultimate sexiness and dickishness and Bistol's witty humor and beauty these two take

you on a journey, that you will beg and plead doesn't end, and when their two weeks are up you will likely cry right along with them as they leave that beautiful island of St. Lucia. Sometimes, you just have to prove that you are good enough for yourself before you can seek out what you truly deserve and want.

Do not pass up the opportunity to get to know Bristol and Davis and see how they survived their past!

Review Updated

I loved Surviving Us! I think this is my favorite of Erin Noelle's book yet!

The moment I started reading this I can't find myself to put it down. I'm instantly connected with the story.

"Death brought them together, but love will give them a reason to live. "

Bristol and Davis were both survivors and their fate have crossed when they attended a retreat.

They have to stay in an island for two weeks and then, their interesting story has begun.

I really admire Bristol for being strong to finally live life and for being an inspiration to Davis to face the life as a survivor.

What they've been through is never easy and I am glad for the both of them to find strength and love within each other.

I don't want to write further and spoil the feels because I want everyone to enjoy Surviving Us as much as I did. You will definitely fall in love with Davis and Bristol.

This is a must read and the best book of Erin Noelle yet.

I love this author!

That was a sweet love story between two catastrophe survivors. Their connection to each other helped them heal and find love.

It was a low-angst novel with lots of sweet moments. It was mostly uneventful; everything about it was %100 predictable, nothing surprised me.

It was a nice pastime but nothing more :)

I also liked the beautiful quotations at the beginning of each chapter...
