## **Heretic: The Terran Cycle Book 3 Philip C. Quaintrell**

The third volume in Philip C. Quaintrell's Terran Cycle continues to span the galaxy, exploring the origins of mankind.

Now a man with nothing to lose, Kalian Gaines has chosen to travel through the Conclave's new Starforge and explore what remains of the Terran Empire. This graveyard of worlds holds secrets long forgotten and better left alone, but regardless of the dangers, answers must be found and soon. The threat of the Vanguard looms over the entire Conclave, its purpose; to pave the way for something worse, something ancient.

Kalian must adapt and evolve, or risk losing everything in humanity's battle to not only survive those who seek their extinction, but also their place in the Conclave.

Roland North is carving a bloody trail across the criminal underworld, seeking his own answers. He refuses to believe that Li'ara is gone, and if he must maim, torture and kill everyone connected to Protocorps to learn the truth, then he will.

The oldest beings in the known universe have traversed an ocean of stars for a singular purpose. War is coming and the harvest is inevitable. The only chance for hope has been discovered in the darkest corner of the galaxy, where at last, the heretic has been found...

## **From Reader Review Heretic: The Terran Cycle Book 3 for online ebook**

### **Nancy Jo Jackson says**

#### **Nice read**

Author is very clever and entertaining, like most series it get long in parts and the chase scenes are no longer worth reading. The overall story line is interesting, probably should be done in two books instead of four. Not sure I will read book 4. I know it is probably not appropriate but I wish they used names for the characters that mean something to me. I also don't care what the different species look like.

#### **Check the proof reading before publishing!**

Loved the book, well written. Only irritation was the poor proof reading that left numerous spelling and grammatical errors spread throughout the text. "aloud" instead of "allowed" etc

### **Good read!**

While the books could use some proofreading they are well written and able to capture your imagination at once. Waiting for the next volume...

### **OMFG and I'm 46 and don't text speak, until just then.**

I like fast moving, page turners. I also have a Physics degree and struggle with Sci Fi because it's too unbelievable. Obviously, you have to suspend belief, but for me there's limits. This series has been perfect in that regard to the point where I don't notice it.

I'm going to keep this brief; the story is awesome, the author has created a layer cake of mysteries, with plenty more left unanswered. The characters are varied, interesting and I especially love Roland who just likes blowing stuff up, getting drunk and fighting.

Mate, for the love of God and the sweet baby Jesus please release the next one before Chrimbo. And, then write loads of 'em. I want more Roland and his fat sidekick Len, sorry Ch'Len (I think ?).
