**Insect Invaders** Anne Capeci , John Speirs (Illustrations)

What has six legs, two sets of wings, and a zany teacher at the wheel? The Magic School Bus as a tiger beetle! Join the Friz's class and learn amazing insect and spider facts.

When Wanda brings her new ladybugs to school, she just wants Ms. Frizzle to give her some hints on caring for her insect pets. Instead, the whole class gets field trip. They find out pretty quickly that lots of insects eat other insects for lunch. And, there is a little issue of spiders, too. Yikes! It might be disgusting, but Wanda has to admit that the world of insect invaders is amazing.

# **From Reader Review Insect Invaders for online ebook**

## **Twyla says**

everybody was learning about bugs while they were trying to find their insect pets.

---

## **Sophie Muller says**

A very good book to accept the fact that insects are predators, and thus not see them as cruel to another.

---

## **Neal says**

I really learned a lot from this book. I kind of like it

---

## **Pretend City Children's Museum says**

Ms. Frizzle knows how to get creepy crawly with insects! Too much fun!

---

## **Cole says**

We got most of these books read to us in second grade, since they had a lot to do with school. But honestly who would ever think of shrinking a school bus and going on adventures with it?

---

## **Maximilian Lee says**

I kind of liked this book because I liked the part when everyone became giant dragonflies. I did not like this book because I didn't really like the part when a golden retriever almost killed them.

---

## **Dolly says**

This is another fun Magic School Bus chapter book. We have read a lot of Magic School Bus picture books and now we are working our way through the chapter books.

Ms. Frizzle and the kids go on a field trip to learn about insects and arachnids. It's a fun chapter book and a quick read. Our girls really enjoyed it, especially the section on the praying mantis (and of course, the ladybugs). Great for reinforcing science concepts by way of an interesting story.

JF Cap

---

**Ruthie says**

Well not my choice to read but it was okay.

---

**Brycen says**

This book is about insects and I like insects. I found it interesting.

---

**Suki says**

There's a lot of insects being caught and eaten by other insects. Just a warning if you have a squeamish child.

---

**Marzieh says**

The thing that I liked most about this book is that it had so much information about insects. For instance, dragonflies prefer to catch their prey in mid-air rather than on the ground. One thing that I remember is a dragonfly's prey is a mosquito.

---

**Margot says**

I liked this book because it gives you facts and a a good story.

---

**Susan says**

I learned a few new things about insects and spiders reading this book. A good science series for children.
