My 7 year old and i both loved this book. It was sweet and honest. Sometimes holly Webb books can be a bit predictable, but this one pleasantly surprised us both. Happy Ending of course, bu the journey was tumultuous.

Interesting issues like keeping things hidden and the guilt involved in keeping secrets adn beign caught out. Also how to handle animals kindly. Good messages.

I wish I could give it 7 stars!

Animal Stories book four which happens to be the third one I have read, and brings the tally for those keeping score at home to Dogs #2 Cats #1 and another obvious but somewhat engaging story with another attack of the cuteness factor. Anyway reasonable well done, despite all the misgivings one has with it.

This is a sweet chapter book that I read with my daughter, who is 7.5 years old. She's a softie for animals, and this story is completely appealing to her. It's realistic with a dab of sentimentality. The kids aren't portrayed as picture perfect; neither are they brats. The ages/grades of the children aren't stated, so the story can appeal to a wide range of reading and age levels (very clever on the part of the author!). Since the main characters are girls, in general boys might be less inclined to read this.

We have now moved on to Max the Missing Puppy!

As is the case for many youngsters, Amy longs for a kitten, and she's hopeful that her parents will give her one for her birthday. Unfortunately, that doesn't happen, but her father does build her a tree house. When a tiny black and white kitten wanders nearby, she decides to take care of the kitten but keep Misty a secret from her parents. I enjoyed reading this little book because it features animals and an animal lover, but also because it tackles some issues not often explored in children's books. For instance, the author deals with Amy's keeping secrets and with the integration of Misty/Jet into a new home with another cat, Charlie, who is not interested in a new feline friend. It also deals with the challenges presented by Mrs. Jones's move into her daughter's home where her grandchildren are too immature to deal with a kitten. The book made me think about the need to make provisions for my animals in case something happens to me. Although the book is short and ends in a predictable way, I still liked it for its exploration of these important issues and its reminder of how responsible we are for the animals in our lives.
