**Sons of War MC** Jane Slate

All is sweet in love and war...

Landon Everett is torn. Torn between commitment and desire. Torn between his past and his present. Torn between patriotism and survival.

But she always was his silver lining...

This full length MC romance tells a story of love, honor, and commitment in the face of tragedy and disorder. A story spanning decades. Sons of War MC weaves together the lives of two perfectly imperfect people amongst the backdrop of a sleepy Military town.

Landon. A jaded former U.S. Marine turned Sergeant-of-arms of the SOW Motorcycle Club. And Grace. An unhappily married woman from Landon's not so distant past.

They say love conquers all. But is it ever too late?

This novel contains strong language, explicit sexual content and some scenes of a graphic nature. Not intended for anyone under the age of eighteen!

Ok read. Not my favourite MC read.

I received an ARC of Sons Of War MC in exchange for an honest review.

I loved the book. The story starts out present day, then rewinds 20 years. Landon & Grace evolving definitely kept this book a page turner. Not your typical MC book, but in a real good way!

I grabbed this book up because of the blurb and the fact that it was touted as an MC book. That is not what this book is in my opinion. Sure, there is an MC eluded to in the background but, mostly what this book is about is War and the devastating effects that it has on people's lives. I actually had a hard time finishing it...it was painful to read and depressing as hell, I almost DNF.

Some readers will enjoy what this story has to offer. I unfortunately thought it was something else when I purchased it and was unhappily surprised at what I got.

2 stars.

SOW was a very different kind of MC book for me...much of it was about PTSD and what happens to some men when they return home from war. It was heartbreaking and emotionally troubling in many parts, since the three main characters had known each other since they were young, and there had always been a love triangle pulling at them.

This book started off a bit slow for me, but once we got into the story (and especially after the men returned from war) and settled back into their lives in the club, it got really exciting and violent. Landon and Grace both made some really bad mistakes and especially Grace who was sent into a deathly downward spiral with her bad choices.

There was an HEA of sorts anyway after much turmoil, and this book was such an emotionally draining experience, I was happy to see a light at the end of so much darkness and despair.

This is not like any other MC book you have read before...more of a relationship study that just happens to be among some ex-military bikers and the woman they love.

This book contains a lot of grammar errors. This wasn't really about the MC and it was more of a background detail than part of the story. It was more about how war can effect someone and having to deal with PTSD when they come home. The only reason this even got one star was because I felt the author did a good job capturing the pain that PTSD can cause military people and family. Otherwise I found the book to be slow and lackluster. It comes with a warning about "explicit sexual content" and really the sex scenes were mild, boring cookie cutter scenes.

This book? Has me like...

Here's the thing.. I don't like the heroine at all. Not only is she just a selfish a\*\* but she has got to be the dumbest, most simpleton chick ever. I mean she CONSTANTLY, through the entire book had me either like...

Or..

When it came to her "whine fests" I was always thinking this...

Trust me. She inspires no sympathy *AT ALL* for her plight.  
And none of the male leads inspired any love or hotness either.

Everyone involved here has got some jacked up issues. How could they not? Considering what their lives have become. But the undertones of the story vs. the characters & their thoughts/reactions, didn't mesh well for me. Mainly cos one of the main people I'm supposed to sympathize with, the heroine, I don't. At all. And then also, even though this is a tough, heart wrenching story, I did not feel the intensity or heart wrenching things I should have been feeling while reading it.

So basically this story is something that couldn't go beyond the surface for me. The premise/story is intense, the circumstances, happenings, characters' plights, all of it, is heart breaking. But none of these emotions were coming through, even though I clearly saw it playing out. There was a huge disconnect here.

This story wanted to be poignant, deep, emotional, heart wrenching & all that, but unfortunately it just read as a simple, half ass attempt at being all of these things. Nothing felt authentic or deep. The only true emotion this story evoked was irritation, anger, and *"I wish someone would just push you off a cliff and put me out of my misery"* reaction.

**The HEA** was so superficial, rushed & glossed over. The heroine didn't even deserve this weak ass HEA though, IMO.

**The Structure** of the story and how things are revealed & why was all over the place as well. You're reading about the present, and you literally wind up in the past going into the very next sentence/paragraph. And if you're just skimming, this could seriously throw you off and confuse you. Many things that happen in the beginning have no bearing on what occurs in the middle or end, so really a lot of things were just pointless.

Basically this entire book read like a rough draft. A rough draft that has all the dark, shock factor occurrences etc.. taken from every other MC novel, Contemporary Romance Alpha male, and was just thrown into what you have here. And instead of focusing on the characters and what makes them tick, what would warrant someone to sympathize with them & their issues, all the focus was just on the shock factor events that occur. And even those fell short. Way short.

**Annnnd** this is NOT a hot novel at all. It has sex in it, but the sex is such a "Yawn" I would have preferred that the attempt was not even made for those moments. Really should have just went with a fade to black scene.

So.... You already know what I'm going to say, right?

No. I would not recommend this read. Keep your money & your time.

Meh, I'm not really sure what was going on in this book. One second Landon's giving his son a cut, and the next he's having sex with Grace talking about Miller coming home, and that's just the prologue. I thought the plot was interesting: high school sweethearts separated by war, but really there was entirely too much about Landon's time in the Marines and nothing to do with the MC. Confusing, yes. Like, did they just start this MC because they were the only ones in it? But wait, Nash's dad handed down the President's patch, so was he like the lone wolf of his club. FOR REAL, how is Landon going to sit by and watch Grace get hooked on every drug imaginable just because he doesn't want to be judged for having a relationship with his brother's wife. Come on. Lame. I just felt like the author has so many interesting ideas she just threw them all in one book. It should've been longer to help the story flow better. Oh, and wait, why did her kids call him Uncle Landon from what I got they haven't seen each other in 8 years. He didn't even know she had a family, much less that it was his brother's family. Anyways, I liked it okay, but I wouldn't recommend unless you were just trying to find something to read on Kindle Unlimited.

Sons of War MC isn't like any MC book you've ever read, which in this case comes in at a mix bag of likes and dislikes for me. To me this wasn't really an MC story, but more about a former soldier dealing with PTSD while being in a MC. I think this story would be classified as a dark romance rather than a MC romance since the club itself was such a minor plot point to the story.

The story itself was heartbreaking and emotionally charged because of the nature of his PTSD and the outcomes of his actions as well as the romantic temptation of two former childhood lovers being reunited in an unlikely way. Landon and Grace's former relationship crumbles while he's serving in the military. When

he returns home, he finds her new relationship in his life both hurtful yet good. He knows with her husband's PTSD issues and involvement in his MC club that he can't cast her aside because of his lingering feelings. Landon by far is the best character of the book.

Grace on the other hand.. I don't really even know where to start with her. Her attitude at as a whole grated on my nerves, but that's nothing compared to her actions at the end of the book. She's just not a well-developed character that seems to run the gambit of goody girl, bad girl, and bat shit crazy girl. Her downward spiral seems to be a means to an end with her relationship with Landon.

Like I mentioned above, the story itself was a good idea, but I feel as if it shouldn't have been in the MC romance category. I think with a little editing and re-thinking of some of the key plot points that this could actually be a decent book.

Okay so I gave this a 2 start let me tell you why. But first be aware there are alot of spoilers.

The reasons why I didn't like it:

- 1) It was short. I know the author said there will be more books to come however this one was really short could have been longer or even broke into two longer full books.
- 2) It was very confusing the first half of the book. For examples there was a chapter where Grace and Landon just finished having sex and he gets up to the bathroom and gets ready to leave and Grace made a comment about how the kids will be up soon so he needs to leave quickly. However the way the rest of the book goes doesn't sound like they only hooked up a few times and none of those times were at her places with the kids in the same house.
- 3) The abuse was a big thing for me. I'm sorry I know it happens all the time but she was making excuses for Miller and saying with him.
- 4) The way Miller killed himself. Just didn't add up to me. He goes from kicking the shit out of his wife and not caring about anything to "I'll fix this" and goes to his room and kills himself with the kids in the house. Really?
- 5) There wasn't much talk or details about the MC at all. For it being an MC book I thought we would have more details about the club and the background about it. But nope. From what I got the Sons only had a handful of members and they didn't do much of anything but hangout in their bar.

The reasons why I did like it:

- 1) I did like the ending. Landon and Grade getting married and having a kid together.

Overall it was an okay book. I would not recommend it to others unless they are looking for something to read in a day while waiting for an other book to come out. It's mostly just a filler for me while waiting for other books to come out.

Não é propriamente sobre MC, mas sobre veteranos de guerra que voltam para casa e não conseguem se adaptar e se entregam ao alcoolismo e violência doméstica.

Só terminei pq eu não gosto de deixar livros lidos pela metade.

I wanted to like this one but didn't. Part military story and part mc club. Weak female lead.

I read this book in one afternoon. It was okay, however, I had a hard time differentiating the time periods in the book. I was confused several times if I was being let in on a flashback or a current event. There were some grammar issues, but not enough that it took away from the story. There were some issues with how Landon and Grace came to be together after he got back from the war. I am not a bit fan of cheating and Grace could have left her husband, especially in light of all he did to her. Grace to me was a complete mess throughout this book and I was a bit disappointed in her character throughout. Abuse is a hard subject to deal with and hers was more than uncomfortable to read about. Her struggles throughout this book were hard to read about in light of the fact that she had 3 children that were dependent upon her. Overall not a bad read.

## **Carol says**

This is not a M.C. story but a tale of returning soldiers who belong to a biker club. For the most part the book is about two men in love with the same women and the issues that they continue to deal with from the war. The biker club is eluded to and serves as a backdrop to the love story as two high school friends re-kindle their romance. It was good but felt depressing and not what I wanted to read when I realised the content was about the after effects of combat. The cover led me to believe the content was about a biker M.C. with a soldier influence but that wasn't the case. So two stars from me.
