I received a copy of this book from the publisher for review. It contains 18 projects of varying complexity that utilize a variety of techniques. The projects include some wearable items like a bracelet and a crown, a large lampshade, a miniature box decorated with a flower, and some cute decorative projects. In addition to conventional paper-folding projects, there are projects that incorporate paper folding and paper-techniques, and projects that incorporate sewable electronics so they light up. The last section explores wet folding techniques that are used to create a tree and owl suitable for Halloween decorating and a gnome that could be used as a Christmas decoration.

The instructions in the book are accessible and there lots of pictures to accompany the detailed, step-by-step instructions. It is a good introductory book and the techniques, once mastered, could be used in other projects.
