The 65-Story Treehouse Andy Griffiths , Terry Denton (Illustrations)

New York Times bestselling author Andy Griffiths invites readers to come hang out with him and his friend Terry in their *65-Story Treehouse*-the fifth book in the illustrated middle-grade series filled with Andy and Terry's signature slapstick humor!

Andy and Terry live in a 65-Story Treehouse. (It used to be 52 stories, but they keep expanding.) It has a pet-grooming salon, a birthday room where it's always your birthday (even when it's not), a room full of exploding eyeballs, a lollipop shop, a quicksand pit, an ant farm, and a time machine...which is going to be really, *really* useful now, since Terry messed up (again) and the treehouse just FAILED its safety inspection.

Join Andy and Terry on a whirlwind trip through time as they try to stop the treehouse from being demolished!

Griffiths, Andy The 65-Story Treehouse, 376 pages. Macmillan Publishing. 2015. \$13.99. Language: G (0 swears, 0 "f"); Mature Content: G; Violence: G;

In the Treehouse Book Series, Andy and Terry continually add more stories to their treehouse. They are ever trying to improve it and take on any adventure. They now have a pet salon, a room full of exploding eyeballs, an ant farm and a time machine. Will they be able to save their tree house from being demolished after the failed a safety inspection? Andy and Terry are very relatable. For fans of Dork Diaries or Big Nate, the Treehouse series is one worth giving a try. The format is a mix between chapter books and graphic novels.

Go on a journey with Terry and Andy as they show you around their 65 storey treehouse with a pet grooming salon, a time machine and many more rooms to come. This book is full of adventure and craziness as Andy And Terry show you around their treehouse and take you back in time in their "time machine". The 65 Storey Treehouse By Andy Griffiths and illustrated by Terry Denton was published on the 16 of August 2015. The novel is the fish instalment of the book series. Since then three more books have been released with the newest one scheduled for release in late August, 2017.

Andrew "Andy" Noel Griffiths is a 55-year-old Author specialising in comedic books. Andy is well known for multiple novel series such as the "just" series and the "bums" series. Before Andy became a world renown Author. Before Andy started writing children's books he was the lead vocalist of alternative rock bands by the name of "Gothic Barnyard" and "Ivory Coast". Andy's illustrator and long-time friend Terry Denton are renown for the family enjoyable books that is fun for all ages. The 65 Storey Treehouse best fits the description of a comedic/humour genre due to the amount of unreasonably "wacky" nature which can be depicted even through the title of the book.

The 65 Storey Treehouse has multiple time periods as it is based on the use of a "time machine" so years they visit range from the present and stretch way back to 65 million BCE. A lot of the content is set around the treehouse but other places visited throughout the book include their friend Jill's house and ancient Egypt to name a few.

The plot line is one of the best that Andy Griffiths has created in my opinion with the same follow through as the other books with the protagonist having to make a book for Mr Bignose but has also made it stand out from the other books. Andy and Terry have to travel back in time to get more content for their book and face challenges along the way that might jeopardise the time that the book was due to be given to Mr Bignose.

My favourite character in the book and throughout the entire book series is Terry due to his hilarious attitude towards everything something that also that I relate to is the sense of cowardliness that is present within the character which makes the character very humorous and is fun to follow throughout the book.

My favourite part of the book and in all of the books throughout the series is the video call with Mr Bignose. It is probably the most creatively free part of the book and is the place you can imagine the voices and play out the dialogue in your head and can really make the book that little more personal. The way it is worded is heavily dialogued which is probably the only thing that I don't like about the book. This book is highly enjoyable to the extent that I read it in one sitting. The overall theme of the book series is to finish the book for Mr Bignose which is a nice touch as the theme is shown throughout.

The 65 storey treehouse is a really enjoyable book and I highly suggest it to anyone who wants a quick read and loves a good laugh. I would suggest the book to all ages but it might be challenging to younger children. I highly suggest reading the other books in order before you read this book.

characters was well described as funny and do crazy things like they travelled in time in a rubbish bin. The theme is friendship between Terry and Andy that live in a treehouse.

I don't know where these crazy coyotes get their ideas, but every page is a laugh. The Unbirthing Room, the Bow and Arrow Level, the Flightless Bird Forced to use a Ladder (over a small mountain of all Griffiths and Dentons' previous books), a Newsfeed Ribbon for Tree-NN NEWS on every page, their Daring Dog Poo Disguise - and that was just the first 40 pages! Amazing antics in the Treehouse and beyond (hint: massive time travel wheelie bin alert)!

Caleb says

Caleb Haske (age 6): "This story was a very good story, and I have very good reasons for it. I have read all of the books before this except for The Thirteen Story Treehouse. So now you might remember Andy and Terry. Now they're having a time travelling adventure but it went a little bit off course. They went flying through time - literally. They took stops at 650 million B.C., 65 million B.C., 65,000 B.C., 650 B.C., 65

B.C., 65,000 A.D., and 650 million A.D. Find more details out in the book."

Dee-Ann says

Funny book. My kids loved it. They are hanging out to read the next in the series, but until it is released they are determined to read all the ones we have missed.

Thomas Leek says

Had to read this for a school thing, but it was still hilarious!

Time travelling via wheelie bin. Why not?

Suitably ridiculous. Easy to read. Engaging.

10yo Daughter bought it day of release and read it same day.

9yo nephew (who isn't a good reader) read it in one sitting, and then started over. He discussed the "plot" in great detail with me ('cause I'm the Aunt Who Reads"). He even dressed as *Mr Bignose* for the school Book Week parade.

A series that continues to hit the mark with it's young audience.

The Treehouse Series:

The 13-Storey Treehouse

The 26-Storey Treehouse

The 39-Storey Treehouse

The 52-Storey Treehouse

The 65-Storey Treehouse

"*The 78-Storey Treehouse*" due out August 2016

Age (taking into account comprehension, concentration, language):

Read aloud - 5+

Read yourself - 7+ (the illustrations are a large supplement to the text, making the book both approachable and readable)

Yet another bunch of floors for this amazing and intriguing tree house designed and stocked by two tween-aged boys with awesome imaginations.

My students love this series, so I wanted to see what I was missing. This is not my cup of tea, but I did laugh out loud on a couple of the antics that occur in the books I read. This book will be of interest to your students who like graphic novels, I expect. The chapters are filled with animations that connect to the story itself, a tree house rife with gadgets, gizmos, and inventions that are as outlandish as you could possibly imagine. I have a few students in mind to share this one with when I get it processed. Unfortunately, for me, this was a painful read. I may actually have no sense of humor as Griffiths is a master of humorous pranks. Buy for those students who need this kind of escape or if you need to get your graphic novel readers to check out a chapter book.

Lisa Mcmaugh says

This book is very creative with some history thrown in for god measure...

Kyoto says

This is a fun book to read because there are lot of interesting thing to read. There are many books in this series. It started with 13 storeys and each new book adds 13 more storeys. In October 2018, there will be a new book with 104 storeys. This is an adventurous book because the tree house is so big and has a lot of stages. My favourite one is the chainsaw flipping because Terry chops off his leg and arm. Why did they make such a dangerous place?

Catherine J Page says

Imagination running riot

I bought this book for my 8 year-old daughter, who gives it 5 stars and said she would give it a billion stars if she could. She has read nearly every book by these authors and thinks this is the best so far. She particularly likes the news feed on every page.

It's cool to read about how Andy and Terry have to go back in time to save their treehouse! Because Terry didn't buy a building permit, their treehouse is set to be destroyed! Andy and Terry will take you back in time, and forward in time in this action packed book. This book was definitely funny, and will probably never get enough of Andy and Terry.
