Badass, Native, ex-Seal = Cloud Blackhawk Book 5

CJ has given up on men and is happy to focus on her foster homes. When the MC invades her house and heart she turns to her gifted/freaky kids for advice. Indians, MC and Baxters are a lot to handle all together, but the help they are offering her and her children is life changing.

Already accepted to the MC, Cloud must prove he's worthy of CJ and her kids. With a warrior's determination, the visions, autism and indigo kids have Cloud seeking answers back on the reservation. The MC is at war and the kids may have some answers, but getting the Brothers to listen can be problematic. As they are drawn in, the MC realizes, it's CJ's five-year-old who doesn't talk that holds the key.

With special needs kids she doesn't need giants in helicopters, trucks and motorcycles invading her little family or her home. She gets both in the span of minutes and they change her life forever.

This book has Cloud's grandmother an Indian shaman with her customs and beliefs, Crystal and Indigo children references and some friggin cute freaky kids.

Can't help but fall in love with these awesome kid's and Adults. Can't wait to read more of this series. I am so happy for these kids, such a amazing family they make. I loved reading the history and the Native way that was shown in the book I hope there is more in the next book. I hope we get more "Kid's Club" in future books. I recommend this series and the Author.

'Blackhawk' (MC Series Book 5) by L Ann Marie is a great read. This is an excellent addition to this series. I loved getting to know Cloud, CJ, Christian, Joey, Brantley, Taylor, Jeremy, and Jacob. I enjoyed catching up with all the other entertaining characters from the MC and Baxters. This story is packed full of action, drama, passion, hot former military guys, strong women, amazing kids, close families and friends, and supporting those that need it. I can't wait to read more in this series and from this author. Highly recommend to all fans of MC romance.

Re-read the entire MC and Protectors series between June and August. I love her storytelling and characters but sometimes the prose (and particularly the conversations) is a little dense and hard to get through. But I'm back again because the guys, the gals, the kids are all SO GREAT! If you bought this a while ago and are just reading it, download a new copy from Amazon because I think a lot of them have been updated on the editing front. This book brings both the fostering and the Native American angles to prominence. Love the kids. Had to definitely check out the genealogy charts the author has on her website to keep myself straight on all the kids and characters.

Enjoy this MC series (and this one with Cloud is both the MC and the Baxters). Lots of (foster)kids, lots of sex, lots of danger. The writing is different than with most other biker books, but the editing is getting better with each book. (Sometimes it does get confusing with all the names/characters, so this probably isn't a good stand-alone book - start from the beginning and you probably won't get as lost as starting with this book on

its own).

Thanks for reading!

really good story. mc soap opera mixed with psychic children, violence, attempted murder..move, passion, joy. a really wild and crazy ride ...near tragedy turns into triumph. great characters. reread June 12, 2016...good enough to re-read a third time in april of 2017.! Re-read yet again in september, 2018. Still exciting, sad, thrilling with a happy ending.

Amazing!

I am loving this whole story progression! I absolutely love the interesting talents the little kids have and seeing how they are able to use them! I love the Cloud, Steve, and Brody story line! Cloud and CJ are absolutely adorable and love everything about it. I am such a sucker for a good story and great love! Kudos! Can't wait for more!

Great Story

I loved the subtle paranormal theme in the series. In the last book, Rich, Tess and Patches story, it became the story's focus. . Cloud and CJ's story continues the theme, bring Native American mystical and spiritual practices into the mix.

CJ is a foster mother caring for six special needs kids in the MCs yard. She meets her MC neighbor's when they run an ops right through her house. She is drawn to Cloud as are her kids. He is moving in within in a few days. Like Tess one of CJs boys is a seer and someone is after him. It's no long before her other kids and the MCs little brothers and sisters are showing special abilities. The seers, warrior's and protectors.

Cloud his family and tribe use their ties to their ancestors to guide and protect his new family.

The little brothers are growing. Little Ben is their leader, Darren their protector and Jessie their heart and soul. Something seems to be coming pulling these kids together.

Loved Cloud and CJ. I loved Cloud in the Baxter books so was happy that he found a women worthy of him. Fun and steamy story. Though it gets gets a little lost in all the is going on with the kids. As always loved the Baxter's lending their support. A nice nod to the Navajo Code Talkers, using Cloud's tribe to run Ops. Looking forward to seeing where things go from here.

A good one

Another good book as expecting from one of my favorite authors. I enjoyed the Indian lore attached to the romance and mystical children capabilities. Really a great way to spend an afternoon.

Pretty much a DNF mostly skimmed after a few chapters, thought it was part of the MC series but other than them being there not much to do with the actual MC. It was all over the place again with characters/kids coming out of the woodwork and way too far fetched for me. Just not my cuppa, too bad I would have enjoyed a story about Cloud but from what I skimmed there really wasn't much story about him and way too much friggin' CJ.....

Each book this author writes gets better and better. This is an amazing story of selflessness and luv. Cloud Blackhawk is one serious badass brother but a tender and gorgeous lover. His luv and care for C J is inspiring. So much happens in this book it keeps u on the edge of your seat. Luvly to catch up with the Baxters as well. Some of this book is so unique It blows the mind. One of my favourites so far.

Starting to get a bit confusing with the amount of people in these books. Still enjoyable though.

????????????????????!!!! I think this is my favourite book in the series so far!! It combined all my interests into a story that was a joy to read. My Native heritage and the spiritual plane that only so many believe in; Crystal and Indigo children run in my family; not to mention the thrill of an action movie playing out in the pages of a book; and sexy badass bikers... Makes for one amazing book!! I would love to read more on the Fosters, maybe learning more of Steve's heritage?!

Deb B says

I first started by reading MC: Knight and then realised that I wanted the whole story and that started with the Baxter's .. although the first books didn't have a lot of crossovers they did set the scene for what is to come in the other books as the stories move along so their importance to the series' as a whole cannot be overstated

I have just read the 22 books to date back to back in the order published on the author's website and decided to review them as a whole. I really don't think they stand well as stand alones as there are too many common threads, too much history and too much character crossover for that so it really is one (very) long story over a very long period of time with each series concentrating on a particular character group but including all of the others (except for the initial Baxter books which didn't have a lot of MC action but did set the scene for a lot of what is to come).

I loved every book although of course some more than others but i am giving an overall five star rating. My biggest issue was that sometimes (often) i found it difficult to be sure exactly who was talking and had to reread sections to try to work it out. I think that perhaps what the author is seeing in her head moves a bit too fast to translate well to the written word for some of us (something like the thoughts of some of her characters - you need to read the stories to understand my thought process here!!)

My other issue was keeping my head straight with the cast of thousands (and this is not an exaggeration) ... with each story building on to what has come before and what will come to be and with most characters continuing to play a place in each consecutive story I found myself constantly stopping to think - now who was that, whose child is that, whose partner is that???? but even amongst that confusion I loved the relationships and the strengths they provided.

The author has an amazing imagination and has brought to the table a fantastic story that i will continue to read and at some point will def read again. I have always loved and had an interest in native american philosophy and also in paranormal and psychic connections and love the way these are ingrained into the books as the stories unfold.

Although there were some things that caused me slight annoyances I cannot deny that as a whole this fits as one of the best series i have enjoyed. my thanks to the author for providing such a thoroughly engaging tale

Joanne says

Altho this story is more centred around Cloud C J and the children it's still has a huge Mc involvement with it. It's one of those books that steals your heart and you fall in love with all the characters. It's truly amazing. This author has an unique style about her and I can say I cannot wait for every book she writes. Each book has so much detail and thought in it I'm truly amazed every time.

Karen says

Wow is all I can say to this one. Get out the hankies as this is a tearjerker in spots. I love CJ and clouds story as it incorporated so many facets of life such as Native Americans and paranormal abilities of the kids. I laughed out loud at some of the antics of the kids, and I hope other readers will as well!
