i really enjoyed book number 2 in this series. fantastic way of keeping the story line going with same and different characters in a stand alone story featuring a new couple. love seeing couples from previous books also advancing a small bit in these series. while I think that the author should have made more use of beth's abilities, not having her use them also worked in this story because beth was an innocent virgin never having close friends and the one time she tried to paint what she saw/felt it upset her only friend at the time so it wouldn't be surprising for her not to have tried to develop the skill to use. hopefully as the series progresses the author will have her developing her skills more in her small appearances in other books. fantastic description of characters and interesting developments, lots of sex scenes which might have been a little over the top for some but I love them so not for me. lol great use of modern day problems, emotions and issues to be overcome and keeping the pace going evenly so u can't wait to turn the page to see what happens next. highly recommended read.

### Bubbles The Book Pimp says

Second instalment in this series.

Living in isolation in the woods isn't a problem for artist Beth...until she is attacked by aliens and saved by a scarred Sardonian warrior.

Dragar finds himself on earth, following a potential lead that could sabotage the new home world... after finding himself tracking some potential enemies to a cabin in the woods... unable to withstand the small human female.. she is enticing and calls to him and he cannot see her harmed in anyway... even when it seems she is drawn to him as much as he is drawn to her.

Dayum this book was on fire! I loved the first book but this one kicked ass... and was scorching hawt. The chemistry and connection between Beth and her big ole protective marshmallow man Dragar was electric and fantastic to read. I was sucked in and nothing was gonna tear me away from this book!

Filled with a action packed story, that catches us up with some familiar faces..whilst building on the already

evolving plot that runs through book one and two and sets up the next in series ( which I am really looking forward to )

#### **Erotic sci-fi.**

This is a much more erotic story than is usually found in the sci-fi/Rom genre. It's not that long ago that sci-fi was sci-fi and romance was romance and never the twain should meet. Things have changed of course, and there are many authors out there writing sf/rom. Most of them have a good story with a strong alien hero and a reasonable love interest. This one has a fairly good story but it gets drowned in the erotica that is all pervasive. Of course, you can always do what I do and skip through the pages of erotica but, in the other hand, you may enjoy it.

#### **Fun read!**

Interesting characters, sci-fi locales, & hints of many different cultures. Romance, detective story, first contact, alien cultures, sci-fi technology... so many themes packed in one short novel! And yet it never feels rushed or disjointed. Our hera, Beth, is nearly killed by some truly vicious aliens while trying to relax at her lakeside cabin. Our sexy, scared, really big hero, Dragar, saves the day. He's immediately struck by her petite-ness, but when she takes out 4 of the bad guys in an attack at her cabin he's impressed by her fierce spirit & wicked aim. She's a pint sized badass! An artist, Beth is an empath with a strong connection to Drager before they even meet. He keeps underestimating her, & she keeps pushing back until he gives in. Lol. Defeated by a tiny female! Worth the read!

I am loving this series!

While Dragar is hunting for clues regarding an Ithyian slave ship, he spots a Serigali ship landed in an isolated area near a cabin. The woman he saw is in danger. Beth is intuitive, emotionally sensitive, and stays away from crowds as much as possible. The sensory overload is overwhelming. When she meets Dragar, however, she feels safe and trusts him.

The excitement and thrills begin quickly, and seldom slow down throughout the story. Be ready for a wild ride! As for romance, Beth and Dragar are a 'slow burn,' but once they get together, the heat is off the charts!

I could not put it down! I adored this book! When they first meet, Beth and Dragar are strangers, kicking butt

and bonding over dead aliens. Beth is a character that is easy to love. She sees what she wants and she goes after it. Dragar doesn't think he should pursue what he wants because he doesn't think he deserves happiness. My favorite part of this book was the whole thing with Beth knowing that Dragar's the dude for her and Dragar constantly trying to find a reason not to have that happen. Keivan is kind of a sketchy character, but he's still kind of lovable at the same time. Weird I know, even when he's trying to steal Beth from Dragar, he's still up front about it. I can't wait until he finds himself a human mate too, because you know he wants one. In the end, I would highly recommend this book, it's good from the beginning to the end!

I like seeing various castes of the aliens interact with a human. It shows off the alien culture while letting us empathize with the human woman.

Beth and Dragar meet under some fairly traumatic circumstances. Beth has an unreasonable (at the time) feeling of belonging with Dragar. He, due to his complicated past, tries to ignore his attraction to the little human. We all know how *\*that\** plays out in SFR books.

I enjoyed the story as it is fully developed for the couple and gives us info on where and why all the Sardorans are having issues in the galaxy at large. Intriguing insight into Kievan and now I can't wait to read his book!

### **Under the Covers Book Blog says**

Beth has always been sensitive to the emotions of others, it's why she lives a fairly isolated life. Living in crowded towns and cities can be overwhelming. But, it is a lonely existence. But, when she first sees Dragar, a scarred alien male she feels an almost instant connection. Despite his large size and his scars and the fact that he isn't from planet Earth, she feels safe with him. So, when he takes her with him and away from Earth she is eager to go. But, Beth soon discovers that Dragar's scars are more than just skin deep and he needs her, as much she needs him.

I adore a battle scarred hero. It's all very well having a sexy as hell, unblemished guy, but my tastes run more to the rugged. Which made Dragar perfect. I was already intrigued by him after his appearance in the first book of the series *Anna and the Alien*, so this book just furthered the obsession. I really liked how his gruff appearance belied someone who could be extremely gentle and caring.

But, this wasn't all sweet. Honey Phillips has written an erotic sci fi romance, so expect some red hot sexy times between Beth and Dragar. This book actually contained more sex scenes than I would normally like in a story, however, Phillips does them really well. So, if you are after a sexier sci fi read, you should definitely give this book, indeed this series, a try.

This book also introduced some new characters I can't wait to learn more about. Firstly there was the icy cold Outcast Kievan, who helped Beth and Dragar...for a price. I can't wait to get beneath his steely exterior and learn more about him. There was also the female gladiator (getting a mind blank on her name!) who helped Beth. There aren't enough alien heroines so I really hope that Phillips breaks the trend and gives her a book in this series.

I enjoyed this book, it's definitely going to be a series I continue reading when I am in the mood for some sexy alien action!

I read book 1 of this series and enjoyed it, so I jumped at the opportunity to review this book. Honey Phillips has written another great installment in the "Alien Abduction" series with a 3rd on the not-so-distant horizon. This one continues the story with different characters. While it is standalone, you'll recognize some of the characters, locations and events if you've read book 1 as well.

Everything that I wrote in my review of book 1 still stands:

"Overall I thought this author did a great job with the story and I would recommend it to others. There is explicit sex, but it's not overdone. Almost every emotion is part of this book and I enjoyed the full range of feelings.

I am definitely going to get the next book in the series. I was hoping that the character would receive his own book! This is definitely a series and an author to watch."

I forgot to add in my review of book 1 but I'll make sure to mention now that this author has a subtle sense of humor that provides some comical moments. There is a reference in this book to a pair of black high heels that had me laughing out loud. There's a bunch of little lines that creep out at you, so don't skip anything. It's worth the time to read and it's a pleasure being on this ARC team!

#### **Empathic human saved by barbarian alien**

Dragar is on Earth trying to figure out what his planet's enemy is doing. He sees a human woman alone in the area they landed with no one else around for many miles. He realizes that she is being hunted by them and steps in to save her.

Beth is an artist and sort of like an empath, she feels other people's emotions so she lives isolated and paints. When strange aliens attack her she tries to get away. Then a huge alien that is totally different than the first ones arrive to save her. She can "feel" that she is safe with him.

They leave Earth together to report his findings to his superior. There are several things that happen to them on their way.

This book is an insta-lust/love story. It moves pretty fast even though he pushes her away several times because he believes that she is too small and delicate.

I liked this story. I even liked the spanking and exhibitionist aspect. Some reviewers didn't think she should have enjoyed it because she was a virgin, I disagree. Just because you have never tried something before doesn't mean you won't like it when you do try it.

If you like strong alien men who may be barbarians but are devoted to their mates than this book is for you! I personally am ready to read book number three in this series.

I was so looking forward to this book based on the summary and Book 1, but 20% in, and a mostly skimmed 20% at that, I couldn't take it anymore. I mean really, the story thus far is ludicrous. All sci-fi has to have elements of believability - to be somewhat relatable - and this story has none of that. DNF. Life is just too short.

This series is amazing! The author really knows how to draw you in and keep you there. Beth and Dragar are

what true love is all about. You give strength when the other is weak.

I really enjoyed this book. Beth and Dragar's romance was quick, steamy and perfect for this couple. Perfect read for a rainy and gloomy day.
