### **Time ran out on climate change.**

Upbeat programmer Dee Baker is successful in her Fortune 100 media career. But climate change accelerates out of control. As her old world disintegrates, Dee teams up to help build a new one.

*"Climate change. Government surveillance. Societal breakdown. Sounds like a real downer, right? It's not, thanks to its determined, witty narrator. She's instantly relatable." - Amazon review*

### **Book 1: End Game**

As the U.S. unravels, media and corporation offer a shining grail of salvation: to be one of the select few to secure safety in an ark. Dee Baker's Fortune 100 media job promises her an ark berth, and for backup she's dating fun and wealthy ark-itect Adam. But fellow gardener and neighbor Zack plans to make his stand outside the arks. Dee needs to choose whether to protect herself, or risk it all to help others. Trying to have it both ways could be the riskiest gambit of all.

### **Book 2: Project Reunion**

When Ebola strikes, the Calm Act surrounds New York City with armed borders. That assumes the rest of the Northeast is OK with letting millions die, in order to save themselves. Dee Baker and partner set out to prove otherwise and mobilize the Northeast to save New York, though the doing may tear them apart.

### **Book 3: Martial Lawless**

When a martial law leader is murdered in Pittsburgh, Dee Baker and partner are dispatched to investigate. Plagued by tornados, and isolated under the Calm Act, Pittsburgh has gone rogue, its religious factions out of control, and it's up to Dee and crew what to do about it. But the forces afoot are darker than they imagined. And Dee's about to fall into their trap.

If you enjoy vivid characters, compelling world-building, and page-turning action, you'll love Ginger Booth's day-after-tomorrow Calm Act series.

#### **Really good**

A surprising dystopian world that is very believable. This is very different from other post apocalyptic literature and a human perspective that adds a great deal of realism. Well worth reading.

### **Karen says**

I have just finished the first book of the The Calm Act books and just started on the 2nd in the series. I really like the main character, Dee Baker; she is believable although perhaps just a bit bland for the type of role she has in the book.

The whole world is overpopulated (as we all know) and governments have decided to do something about it. Our own USA passed a secret law called the Calm Act, and in part, they hide a lot of information about what they are doing. We learn to suspect the Powers That Be are purposefully killing off our own population down to sustainable numbers for the environment. Dee gets involved in saving humanity almost by accident as a computer programmer. She gets heavily involved in disseminating information over the internet against the will of the government. (and that, of course, never goes well).

This is an interesting read of a dystopic future that could become reality. The characters are well-grounded and believable. However, there are some leaps of faith to take in the first book, like why is the internet still working with millions being killed off? Who is keeping the servers up and running? Not enough for me to quit reading, as these really are page-turner books and I will read them all.

### **Louis R. says**

#### **Wow, REALLY enjoyed these,**

Grim going at first and in bursts throughout but so well written and ultimately kind of hopeful. Wonderful books - so glad I came across them.

---

### **Gerry says**

Excellent! Could be read as current news instead of fiction. I loved this series.

### **Chris Knight-waechter says**

#### **An okay series**

The reality of TEOTWAWKI is quite possible, I found the story solid but not a book that grabbed me and wouldn't let me go.

---

### **Barbara Bonner-wells says**

#### **Excellent read**

Draws you in before you know what's happening. Great character development. Glad to move onto book 4. I will miss the characters when the books are done.

### **Holly J Sullivant says**

#### **Perfect read!**

Great series. One of the best I've read in a long time. Reminds me of Margaret Atwood with the wry practicality of Anne Tyler. Delighted I read this well fleshed characters and plot!
