### **Lauren says**

Perfect for those starting to take a more serious interest in astrology. Beginner or not, nice to see interpretations by Linda Goodman. I feel that I have learnt by reading this and am now very familiar with relevant symbols and terminology.

### **britney lee ereth says**

This book is not actually written by Linda goodman. Although it's still good I felt deceived by Crystal's use of her name as though it was entirely written by Linda goodman.

### **Joyce Frances says**

A fan of Linda Goodman...another great book!

### **Alicia says**

This book is awesome fun. Ostensibly for analyzing romantic entanglements through astrological birth charts, you can actually apply the advice to co-worker, friend, and familial relationships. Plus you will totally memorize your own birth chart after comparing it against everyone you know.

### **Shelley says**

I own the 1998 edition which is beat to hell but I'm loathe to ever replace it. It's one of the best astrology books ever written.

---

### **Kalli Prins says**

This is a great in depth astrology book. Not just for sun signs but also other planets interpretation in your own sign as well. Also, in the front you can calculate yours or others birth charts.

### **Jane says**

If you have a basic understanding of Natal Astrology, this book will help you to really and truly understand the dynamics of ANY relationship you are involved in. I love it and refer to it often!
