## Montana's Vamp Lynn Hagen

[Siren Everlasting Classic ManLove: Erotic Alternative Paranormal Romance, M/M, werewolves]

Gabriele Sloane has been picked on his entire life by the coven he grew up in. They taunted him, ridiculed him, and downright hated him. When they do the unthinkable and kick him out, Gabby is forced to find a new home. Dodging the sun and low on his diabetic supplies, he wanders aimlessly until he finds himself in the arms of one bald and sexy shifter.

Montana Graton hates vampires with a passion. His best friend was killed by one. Hungry and bored, he decides to visit the diner in town. The little redhead sitting one booth over looks good enough to roll around in the back of his truck with—until the smell hits him and he discovers the redhead is his mate.

Can Montana set aside his hatred and claim the little vamp, or will he allow his festering hate to surface and turn his back on the sexy little fireball fate has given him?

Note: Each book in Lynn Hagen's Brac Pack collection focuses on a different romantic couple. To enjoy the overall story arc and crossover characters, we recommend reading the series in sequential order.

## Nessa says

I just loved this book as much as the others, or more than a few, but it was sweet, with nail biting moments. Gabby is a half vampire who is kicked out of his coven and Montana happens to find him in a diner and realizes that they are mates. Naturally, there's hoops that they have to get over until they find a way to be comfortable with their relationship dynamic. I also love the introduction of Carter. Things are getting too exciting for Maverick, but I'm loving every word of it. This was totally a captivating and fantastic read. :)

I thought Gabby was a cutie. Montana obviously did too;) A fun light read that just makes me happy:)

## Popcorn says

It might just be me but this one made very little sense, there was far too much going on in the one book. And considering how long it took us to get to this point I'd have thought some of these things should have happened a little more spaced out!

Melonee does actually have a mother so why is she STILL living with the wolves?(does this situation remind anyone of Sookie Stackhouse with the whole fairy blood carry on?)

Why do they not mention the events of book 13?

What's the timeline?

What's up with Murphy and the stalker?

\*\*sigh\*\* Sorry see why I never usually write anything here??

### 4th Reading 1-4-16

First time I cried so far in this series, so far. Gabby broke my heart...again.

Note to self: I skipped Murphy's Madness (#15) this time around. I can not handle that book and refuse to force myself to read it. I hate Ludo.

### 3rd reading 1-4-14

GAH! Gabby broke my heart.

## 2nd read June 2014

Still loved Gabby, maybe even more so the 2nd time around :)

## First read 11-7-13

Loved Gabby :)

This was book 16 in the "*Brac Pack*" series. Gabriele "Gabby" Sloane has been picked on his entire life by the coven he grew up in. They taunted him, ridiculed him, and downright hated him and kicked him out. Gabby is tired hungry and low on insulin he is also out in the day and as a vampire that's a big no. Montana Graton hates vampires with a passion. His best friend was killed by one. He is also tired of looking at all the mated couples because along with the Santiago brother's they are the only single ones. When he goes to the diner he spots Gabby who has spiked orange hair when he sits next to him he knows that he has found his mate. When Gabby goes to the restroom to take his insulin dose Montana thinks he is doing drugs and tries to keep him from taking it until he tells him what it was. When Montana Gabby gets sick and Nicholas examines him and finds out that he is half vampire and Montana loses it. Gabby thinks that Montana doesn't want him so he leaves along with some supplies that Nicholas gives him. We also find out why all the rogues want Malonee they are drawn to her smell and Gabby is drawn to it we also find out that she is a fae princess. This book also introduces some new character's like Carter the fae that told them about Malonee and some other shifter's that want to move into the area. This book was hot when Gabby feeds from Montana they both get hot and lusty. We also learn that the man that Gabby thought was his father is not and that Christian the vampire prince is. We also learn that Gabby can get pregnant at which time Montana passes out. This book was well written with no errors in grammar or spelling. I am looking forward to reading the next book because Carter is Tryck's mate.

In the review we have this sentence at the end:

*"Can Montana set aside his hatred and claim the little vamp, or will he allow his festering hate to surface and turn his back on the sexy little fireball fate has given him?"*

And this sounds so serious, like there will be tragic decision to make, "have a Vampire as a mate or not". And then everything is solved when Montana finds the room Gabby occupied empty...because (now that's hard deep plot) Gabby left the house on HIS own!!! OMG....

Really...-\_\_\_- DEEP plotted stories!! I so feel for the this author, such hardship to write such "amazingly" developed books! I will get sick!

This story started off quickly, setting my emotions a blaze. I was filled with sadness for what has happened

to Gabby and anger because he's a sweet innocent soul who needs help being cared for. At a hundred years old this half vampire half human is still considered young and naive. Gabby has been forced out of the only home he has ever known with nothing more than the clothes on his back. His vampire coven has done the most unthinkable thing when they kicked him out, they did it during daylight hours. This poor character has to struggle and fight the odds until he enters Brac Village and meets his savior.

When Gabby meets Montana it's a bit awkward. Gabby is diabetic and needs daily doses of insulin, and when he goes to administer his medicine Montana storms in and gets the wrong impression. This couple have their ups and downs from the get go but they're also a supper sweet and fun pairing. Montana's overbearing need to protect and care for his mate is just what Gabby needs. Gabby, on the other hand, brings the comedy into this relationship. He keeps Montana on his toes with his speed talking and the shenanigans he gets into with the other mates.

The book was very enjoyable but I wished there were more back story on Montana. As stated in the blurb his friend was killed by a vampire but that is all that is mentioned in the actual book as well. I would have liked to have known more about the man, where he came from, what his previous pack was like? Montana is a fierce warrior and would do anything for his mate, but I would have loved for the author to have explored with this character more in depth.

As with all the Brac pack mates, Ms. Hagen writes these men in the most realistic way while still being a paranormal story. All these men are human beings with real life personal drama. Gabby is an overweight vampire with self-image issues. He also has a bad case of talking so fast he leaves everyone speechless with his ability to go without taking a breath.

Ms. Hagen is the queen of the cliff hanger, but I love it and it has me coming back every week. There are more introductions of other paranormal shifters and we finally get more back ground info on Melonee. This series just picks up more steam with each new installment. As for Montana and Gabby these characters will stay with me and keep me wondering what will happen next for this duo. Ms. Hagen is always great about giving updates about every member of this extended family and it helps keep these characters fresh in your mind.

Another good read I highly recommend.

Okay, so this book wasn't bad per se; I found Gabby adorable if a bit too childlike sometimes, especially for someone over a hundred years old. I did like how he was not skinny as the other mates and had some meat to him; it was a very nice change, and I was glad that Montana actually liked that about him. Overall, I think Gabby is one of my favorite mates, aside from Nicholas and Oliver.

I'm still a bit eh-hh toward the whole mpreg business; I was never particularly fond of it, and I never will be. In addition, one of my pet peeves is when stories make you look like you're a selfish little shit when you decide you don't have kids. I was gonna let the mpreg/ovulation bits slide no matter how ridiculous they were, but then they had to change Gabby's mind about having a baby and I am just. Pissed as fuck. Like, the dude doesn't want to have kids. It's his body. He wants to enjoy his new life with his new mate and his new friends and his new family. He doesn't want a baby to get in the way. IS THAT SO WRONG? Why do they have to talk him into it and make it seem like he's being selfish by choosing his happiness and independence by not having a baby? They could have gone a more mature route and decided "hey, he doesn't want kids because he wants to live his life without one; that's totally cool and it's your business and we're not gonna try to convince you otherwise". But no. They had to do the usual "YOU SHOULD HAVE KIDS YOU'LL MAKE A GOOD PARENT!!" Like that's a good enough reason to ever bring a kid into the world.

Just, y'know. Fuck that shit. Fiction or not fiction, no one has any right to force their opinion down your throat. And that includes the choice of not having children.

First, I don't see why Christian had to tell them his true age just to explain how he is Gabby's father, I think it wasn't pertinent information for his explanation, what would be pertinent is Heaven, someone should've told Gabby about his situation. Where did Heaven go anyway, he's not mentioned to be in lieu with other mates, he isn't anywhere?

Second, Gabby is feeding way too often. A couple of times in the book it was referenced how, since he's a half vampire, he only needs blood twice a month, yet Montana feeds him practically every day. I get that you need it to heal when you're injured but he drinks it all the time, regardless.

I usually like this underdog stuff but something was missing in this story, I wasn't impressed. Also the model on the cover that's supposed to be Gabby is way too ripped.

This one actually had a true cliff hanger compared to the rest. Usually the ending have a small cliff hanger but it's not so crazy that you need to move on to the next immediately. They're starting to get into the plot a little more but losing the main focus. It's a shifter tale but now they've added vampires, bears, and elves. feels like it should have been a different series - maybe a spin off of some type.

(SPOILER)

If Mel is the one that's bringing the rogues - how come they've been attacking since the beginning and she only came in half way thru? Also, what about Heaven's pups? No mention of them even though we find out someone else has the same issue? It would have been helpful to both characters and something to bond over.

### **Serena Yates says**

This was a fun mixture between humor, a cute hero who is desperately looking for affection, an alpha second hero who discovers his mate's personality is more important than his race, and, oh, yes, more revelations

about the overall story.

Gabby is one of those suppressed guys who nevertheless remain fighters. He is too cute for words, and his constant worrying (no surprise based on the way he's been treated so far) combined with his ability to speak faster than a flying bullet made him really likeable for me.

Montana faces the fact that his mate is half-vampire and, predictably, flips out. Thankfully he also recovers quickly and the rest of the drama in this book comes from outside revelations about the vampires, the addition of a few Elven and the 'reactivation' of an old enemy.

While the addition of yet another potential male pregnancy came as somewhat of a surprise, I don't have a problem with the concept and thought it was quite funny how there are now two mates able to reproduce. I wonder what's next?

My heart broke for Gabby! Treated like trash all his life, abused, then thrown out without any money, medication and just the clothes on his back. I was actually tearing up. Montana wanting to treat him like a one time lay before detecting the 'mate' scent really hit me hard too. Gabby was adorable, kind and deserved to be treated like a king. Glad montana wisened up.

### **Janelle says**

Although, we still don't hear too much about what is happening with Heaven and what is going on in his pregnancy (I thought it would have helped in Gabby's thought process of knowing he wouldn't would be the only one. I digress it seems.....I love that these two come together and get past the issues really fast. Montana being the biggest problem to over come. I must say I was proud the he didn't stick his head up his ass like most would and took on the responsibility very well. Gabby needed the love and support and he got in spades with Montana.....I am soooooooooo looking forward to the next one and hopefully seeing Tryck put on his ass....lol
