## **Moral Imperative** C.G. Cooper

A growing Islamic threat...  
An army ignored by the world...  
A Marine who won't sit on the sidelines...

The Islamic State of Iraq and Levant (ISIS) is capitalizing on the neglect of war-weary world leaders. No one in Iraq is safe. Christians herded like cattle. Whole communities torn apart. Marine Cal Stokes has had enough.

With the quiet support of U.S. President Brandon Zimmer, Stokes and his closest friends return to the Middle East to take the battle to the enemy even if it means being cut off from ever coming home. This is about what's right, not what's popular, a moral imperative...

#### **Moral Imperative review**

Moral Imperative is the seventh fast-paced action packed book in the Corps Justice series written by author C. G. Cooper.

## **Don says**

A lie confusing introducing Arabs who we need heard of, was sure what was going on. I didn't like this method of putting characters in the story. It took longer than usual for me to get really interested so I don't think it was anything near his best work.

### **C. G. Coopered up in this sequel.**

C. G. Coopered up in this sequel, ratcheting up the tension and conflict. Full of twists and convoluted turns-of-events. An exciting ride.

### **WOW !!.. , Cooper nocks this one out of the park !**

Holy crap !! , This is the kind of writing that a young Tom Clancy would've been proud too have written. Cooper gives a good understanding of the kind of silent respect that warrior's have between each other that only develops from depending on each others for survival . Which is something that many people couldn't understand unless you depend on your co workers to save your life on a daily basis .

It's refreshing that the author hasn't been afraid to show the true side of the war on terrorism.

The only fault with the writer is that he proclaims President Zimmerman as a not a Democrat and not his true nature as a Republican.( joking of course) Maybe as he runs for reelection he changes tickets . overall this is a really good military novel. Great read

### **Awesome read as always!!!**

CG Cooper has a nack for writing that entrances a person. I love his characters and all the detail he puts into each one. I always hate for the book to end, but know there is new one waiting for me. If you like action/thrillers, these books are for you. Keep up the great work Mr. Cooper.

## **John Podlaski says**

Moral Imperative is the final published novel in The Corps Justice Series and I'm sorry that the next book in the series isn't already available, leaving me at the edge of the cliff for months to find out what's up with Andy!

These last two books had me hooked from the beginning - forcing me to finish each story in single setting - real page turners! In this story, Cal and his band of Merry Men - a combined team of elite forces from countries around the world - complete an arduous schedule of training in order to take on ISIS - a few good men against the many! Their raids also include the tracking and elimination of recruits, who had joined ISIS from other countries around the world and are now returning home to visit families. The terrorist group and individuals of ISIS will soon learn that there is no sanctuary.

The team faces scrutiny when one of the new members reveals a secret that has the potential to destroy Cal's group of warriors and trust can only go so far! How do they handle this? I'm also thinking that the great success of this book is due to the author writing about real life issues of today. ISIS is real, dangerous and expanding...Mr. Cooper has offered a solution for their elimination!

Great job Mr. Cooper - I look forward to your continuing stories!

### **Denise says**

'Moral Imperative' was a very intense and thought provoking read. The storyline was well written and well thought out. Full of action, intensity, unlikely allies and issues plaguing the world today. From Zimmer to Cal to the foreigners there was intense scenarios and an almost beautiful dance of retribution. And no, mass murder, death and betrayal are not beautiful. But the way this book brought countries together to rid the worst evil of all from the face of this earth was justified and the realism behind it is all too evident. President Zimmer has come a long way since he was first introduced into the 'Corps Justice Series' and it's pretty awesome. Cal and his team are just as deadly as ever. I can't wait to read more. A great series to add to your tbr list. Recommended read.

#### **Moral Imperative. C.G. Cooper**

Isis has stepped up its terrorist attacks on innocents. One two many times. The sleeping giant, America has awokened. President Zimmer, isn't backing down. Isis and all Isalmic terrorists are on the run. Their day has ended. This is a fantastic read! My highest recommendation.

#### **If only it could be. This book mirrors what is now going on**

This is the second time reading this book, not something I often do. I still couldn't put it down. I love this series and the characters. It is certainly thought provoking.

#### **Good**

When the water ran out he glanced at the soldier's sidearm. To take it would be to re-enter the fight, to forget the next life for the moment and take up arms again in this world. He stared at the weapon for several long moments and then looked at the hole that had been blown in the wall. He knew the will of Allah.
