## Out for Blood Michael P. Spradlin

The action-packed series by Michael P. Spradlin returns. Each book covers a genetically engineered superpredator wreaking havoc on the environment.

Dr. Catalyst has finally come unhinged. Twice the crazed scientist has released his super predators into the wild to combat invasive species, and twice Emmet Doyle and his best friend Calvin Geaux have exploded his efforts.

Now he's out for something more than just snakes and fish. Dr. Catalyst wants revenge.

It's a quiet night when Emmet takes his dog, Apollo, out for a walk in the backyard. Until the noise begins. Part batlike screech, part insect buzz -- it seems to be coming from the roof. Suddenly the sky is full of dark, beating shapes, and they're all headed straight for Emmet.

Dr. Catalyst's newest creations are hungry, and only one thing will satisfy them. Blood.

## From Reader Review Out for Blood for online ebook

### **Victoria says**

#### **Gave it a five stars**

#### **Gave it a five stars**

I gave this a five stars on this book and it was an awesome book. I love the characters in this book and I think you would like this book.

---

### **C Pinedo says**

missing some action

---

### **Tamara says**

Dr. Catalyst finally acknowledges that his creations are invasive species. He doesn't seem to realize that the first two were invasive as well.

---

### **Emmet Miles says**

blood jackets,bat-hornets

---

### **Aiden Fisher says**

So he's made it All pteregator murecudas but he is at it one more time. In Michael p spradlin's last book dr catalyst is back and annoyed of emit and Calvin so he decides to "eliminate the threat" this time it is a mixture off complete different species. As his new blood jackets target and attempt to kill emit Doyle. An they race to get to doctor catalyst one more before he succeeds. In this novel you follow emit Doyle and Calvin guex the main characters. The elements to this book is what makes it just so much fun always pulling you into chapters there are a lot of elements but the main ones are action adventure and intensity the mixture of those and the smaller ones make it so you want to read and read and then it usually leaves a cliffhanger which pulls you on farther for the people that like lots of story elements intensity action and adventure I recommend this book series

---

### **Oznasia says**

I realise these books are intended to appeal to reluctant readers but I doubt that any of the 5th to 7th graders (it's stated audience) in my life would be attracted to them. The horror level is full-on. Between the horrible chapters there is some good narrative but nothing is actually resolved in the book. All it can do is entice the reader to buy or borrow the next title in the series. Personally, I won't bother.

---

### **Mari Anne says**

Spradlin got his hybrid, mutant, monster mojo back in this newest addition to the MG Killer Species series. The action is immediate and non-stop and keeps you up reading way too late. If you haven't read the previous books (or even if you have) you might be confused as to who some of the characters are. As in most MG books, character development is sacrificed for speed and brevity. Still, a great addition to this series that keeps me wanting more. Will probably appeal mostly to boys in grades 3-6.

---

### **Linda "The Book Lady" Warner says**

This was a fast spaced book. My kids at school will like it. Though not a lot of character development and at first I didn't know who were girls and who were the boys. This is the third book in the seties and didn't read the first two and that might make a difference.

---

### **Bomb says**

Another amazing amazing book by Michael p. Sprawling.

---

### **Jacob says**

a very fun and enganging

---

### **Adrian says**

Nice book. I think it is very intriguing.

---

### **Star Shining Forever says**

Dwr. Catalyst is a hyper-environmentalist who crossbreeds crazy animals mutations to corral the invasive species in Florida, doesn't care if and when they hurt people, and has it in for a small group of friends and their parents who are always thwarting him. This time he targets the kids' school with his newest monstrosity, a combo of the vampire bat and hornet. The result of an insatiable flying terror interrupts a school concert, trapping the friends in closets. Dr. Catalyst himself prowls nearby, bent on success of his

creations and willing to hurt people in his quest.

Barring a couple crush remarks and an ongoing romance between the widowed parents of 2 of the kids, it's really clean and good for kids who like action, adventure, and some intense and/or scary moments!

---

### **Barbara says**

I LOVE this series. As soon as I finish a book in the series, I have 5 boys in my class-who don't "like" reading, fighting over who gets to read it next! I usually am able to engage in great discussion with them. This science fiction thriller series is a wonderful collection. If you live in FL, it adds to the creepy sounds you hear at night! Quick easy read.

---

### **Music Luver says**

Dr.Catalyst is back!!!! (dun dun duh!!) Spoiler alert!!! Dr. Catalyst sets loose a genneticlly modified yellowjactet-bats and they feed on blood!!!! This book always builds sixpence...

---

### **Ethan says**

a blood jacket: mix with a baldheaded yellow jacket and vampire bat. dr. catalyst will never seem to die.
