## **Entertaining read**

Empire building mixed with space and land battles makes for an interesting and varied read. Author spends a little more time on training than I would like but an entertaining read nonetheless.

**Rise of the dictator. Fall of the old earth ways.**

New characters other than that the same old same old. Still a good steady read.. .. .

**Randall Shipp says**

Star Force continues to capture the imagination while keeping to a science based story that you don't want to put down.

**Shhhhh Ahhhhh says**

Took them long enough to kill The WORD. Took Davis long enough to decide to annex Earth. How are you a multisolar species but on the homefront your people are still fighting like rabid animals? That, at least, the author did right because he inspired the desire to see it happen and then came through on it.

Now this business with the Regulars? Idk. I was kinda wondering what was going on there but I also didn't really think about it too hard because, frankly, if it isn't an Archon, who cares? I hope he can jump-type and switch to start training as a Knight or something not boring.

In spite of the horrendous number of typos, this is turning out to be one of my all time favorite series, a real keeper.

### **Entertaining but aggravating**

An entertaining read but filled with the potholes of Aer's grammatical/vocabulary/syntax errors: "typically efficient and redundant Star Force manner." Redundant means " not needed or superfluous. How does this line even make sense? "knocking them off the thrown," should be " throne" There are several more. Aer is probably using a spellchecker but that doesn't catch errors in grammar and syntax. He REALLY needs a proofreader. The lack of one (or more) gives his books an unfinished and bumpy feel to read. This English honors class veteran would have given up on the series way before now if it was any less entertaining.
