At forty-nine, Alana Sanders was at the stage where life should be easier. She had put her artistic passion on hold when she married, raised two children and kept a happy home.

Now that the kids are grown and out of the house, it is Alana's time, at last. However, she and her husband find themselves faced with a new, and sad dilemma—figuring out who the stranger is that sits across from them at the dining room table. The questions and doubt now begin when Alana retraces the decisions she has made that brought her to this point.

As her life unravels around her, she meets Toni O'Hara, a Chicago fire inspector. Through her humor and compassion, Toni helps Alana come to terms with her life, her culpability in her failed marriage, and the most wonderful realization of all—Love, at last.

## From Reader Review Love At Last for online ebook

### MD says

I enjoyed this book very much, the characters were likable and the story felt real. The idea that real love will find you no matter the age is lovely.

I will check the other books from this author.

3.3 stars. It's not a bad book. In fact, I have no concrete criticism towards it except that I grew bored. The ride was so smooth with nothing much ever happening that it simply lost my interest towards the end. And I usually enjoy the character-driven slice of life stories where "nothing happens" so this is out of the usual for me. But what can ya do, different strokes for different folks. This was not for me.

I loved how this story just moved me along. For want of a better word I would describe the love story as beautifully mature.

We have two very likeable characters in the two women, but there is almost no side character who I would detest or who made my blood boil (maybe just the "snake", but she had very little stage time). Even Vicky with her propensity for being turned on by lesbians and then having hot sex with her husband was nice. So this was a heartwarming, quiet, love filled and angst free ride, which I obviously needed and fit my current mood to the dot on the i.

A beautiful book that shows that it is never too late to find true love. Even though it does not always come in the form you expect.

Most f/f romance books are about women who are in their twenties or thirties. Therefore I am very pleased to find a good book about women who are older and have already experienced a Lot in the love department.

Finding first/young love is incomparable to finding love at a more mature age. These women have already lived a lifetime, and that brings knowledge and experience. That's why I found it very realistic that everything about the love story takes longer to develop. A woman of 50 does not jump into some things as easy as a sometimes naive and trusting novice.

This book shows that love and sex is still very exciting and hot when you're fifty. It was an enjoyment for my romantic soul!

I was really looking forward to this based on the high review but felt a bit let down. I read it mainly because of the older age profile of the characters but I found it hard going struggling through the amicable marriage breakdown of one character and the very 'straight-aching' nature of the second character. It fell into cliches for me. If you want pass time with a mills and boons type romance with a lesbian twist you might enjoy it. It's probably a 2.5 but not quite a three for me. It is nowhere near a 4. It's predictable and soapy-like. A midday movie.

### **Angie says**

This is a poignant love story between two women who finally find what has always eluded them, love. Toni and Allie meet by robbery and keep running into each other. Although they are attracted to one another, they become friends because of their circumstances. I really enjoyed how their story played out in this book.

### **Dide says**

What a sweet mature book. Love the characters, relationships, conflict... It seems everything about this book was on point. A good read.

### **Mary Deutcher says**

It is nice to see that no one broke up a relationship and that it just grew. It was a honest to goodness love story. It was sweet. It was a feel good story. I really enjoyed it. A good story to sit back and read with a cup of coffee on a cold winters day.

### **Wasmus says**

I am developing a fondness for this author. Whenever I want a simple girl meets girl story with very little drama, a sprinkle of humor, and a HEA, one of my first options will be to turn to Sweeney. What I like most about *Love At Last* is the decency Alana and Paul had for each other. They both could have gone for the jugular, but they didn't. In addition, I liked that all the new relationships in the story were as Jos said "just meant to be." The relationships just needed a little encouragement from others. Except for the betrayal of another character named Gina (there's one in *The Hypotenuse of Love* too), all the other characters were supportive of Alana and Toni's relationship. And I agree with Toni, I don't like labeling people. It's what in the soul that counts.
