**Shipping Container Homes: A Guide on How to Build and Move into Shipping Container Homes with Examples of Plans and Designs** Louis Meier

**Take the first step to realizing your dream of building and living in your very own Shipping Container Home!**

The purpose of this guide is to provide a detailed walk-through of each step of the process of shipping container selection, transport, foundation, utilities, modification, and finishing. In each chapter, one aspect of construction is explored in depth, beginning with the planning process and extending through to the completed home. Included in each chapter are pictures of each stage of construction, providing real-life examples to help put the theory into tangible terms.

Even though this guide is not a manual to building a specific home, it still provides valuable insights you can apply to each step of the building process. Take your first step by scrolling up and selecting the "Buy Now" button!

# **From Reader Review Shipping Container Homes: A Guide on How to Build and Move into Shipping Container Homes with Examples of Plans and Designs for online ebook**

## **Lita Labaron says**

Like most of the scam books on Amazon, the final page of this one begs readers to do the author a big favor and review it on Amazon.

Ok then.

This is my review and it is most likely the only non-incentivized review of this book:

I Know something about Shipping Container Homes and have been following them online for sometime reading all about any new builds going back at least five years. Strangely, around two years ago is when all these bogus *Shipping Container Home* books began appearing on Amazon. Most everyone of these are produced by a small group of internet marketing buzzards who never created any new content on the subject, but rather just steal other peoples work. None of these losers have the slightest real knowledge about shipping containers. To them it's simply a profitable niche.

Now this book is interesting because, unlike most of other the fake books, it actually includes photos. The problem is, these are all stolen from an old blog created by a man named Larry Wade ( Taj Malodge ). What happened to Larry? Who knows, but it didnt take long for the internet buzzards to began using his photo's for their products. [ see containerhomeplans as well ]

Google: TAJ MALODGE

Google: imgur "Story of two containers"

Taj Malodge is the name of the shipping container home built by Larry Wade in 2010. He made the mistake of documenting his progress with photos and posting them online back in 2011 on a blog. The detailed photographs he took of the building process are all online for FREE. Now the digital charlatans are using his work to make money. This book is a perfect example of that.

I would like to encourage anyone who knows Larry Wade to contact him regarding this flagrant abuse of his copyrights. Perhaps he might even take legal action. I hope he does.
