### **Gea says**

It's kind of disturbing to know everybody has a dark and a light side. Yes of course I already knew that. But when the strength of a person's powers is so much greater than a normal human, the balance is more precarious.

This is a story about Eve, who has a quest to enforce the law and also to figure out where her roots lay. Greater consequences because of the strong emotions, which influence her actions.

The different stories of the men leave me in awe of them.

A world where the paranormals are out in the open?  
That is almost unimaginable, this book helps though.

Eve and her guardians discover strong connections and help each other in all kinds of ways.

NL:

Het is best verontrustend om te weten dat iedereen een lichte en een donkere kant heeft. Natuurlijk wist ik dat al wel. Maar als iemand's krachten zoveel groter zijn dan die van de rest is de balans veel kwetsbaarder. Dit is het verhaal van Eve, die haar missie volgt om de wet te handhaven en probeert uit te vinden waar ze vandaan komt.

Er zijn grotere gevolgen vanwege sterke emoties die haar acties beïnvloeden.

De verschillende verhalen van de mannen geven me bewondering.

Een wereld waarin de paranormalen niets hoeven te verbergen was voor mij onvoorstelbaar, maar dit boek heeft me daarbij geholpen.

Eve en haar mannen ontdekken sterke verbintenissen en helpen elkaar op veel verschillende gebieden.

Oh damn was this book freaking good I didn't want to stop reading I wanted to keep going. Eve is a good cop believes in fighting for the good guy and doesn't take crap just happens to run into these 4 good-looking guy's that are fairies who were sent by their queen from the Fae realm to bring back this disturbance that's causing the realms to become thinner and it's letting demons into the human realm, but they soon find out that Eve is the problem she just doesn't know it..yet. This story literally sucked me in from start to finish and I didn't want it to stop. It was a page turning, captivating, so many twist and turns you didn't know who was telling the truth kinda book and it's only the first book in a 3 book series. I can't wait to read the next book.

This is just my opinion and my voluntary review

Guardians of the Magic by Elizabeth Hartwell a five-star read that you will want to guard. What a read, you will get sucked into the world and come out blinking at the end wondering where it went. Eve was such a strong character, you will feel her power coming off the page. What a great new adventure for this author, I for one can't wait to see where this series will go.

I love discovering new or new to me authors. Elizabeth Hartwell falls into the latter category. Based on her Guardians of Magic (Guardians of the Fae Book 1) though, she's definitely an author I'm in need of becoming better acquainted with. This is a really fun reverse harem (guilty pleasure) paranormal fantasy romance (hit the trifecta of favorite genres there) mashup. It's well written and with a great plot that looks to be the start of what I expect will be a wonderful overarching story arc. Eve Carter is really a perfect heroine for this book (and series), with just the kind of approach to life, the universe and everything (yes, I know I borrowed that line) that I adore. Add in fantastically yummy Noah, Tyler, Jacob and Cole, her Fae Guardians, and a great roller coaster of an exciting (and well written) adventure backed by a great supporting cast, and the result is pure reader's catnip. But for the fact that I'm literally dictating this review to my husband from my hospital bed I could go on and on with praises - the book definitely deserves it. Since I can't do that I will simply note that the book is most definitely one to read, it is easy to highly recommend. I'm definitely looking forward to the next book in this series.

## **Christie Thorsen says**

Okay, so I \*really\* wanted to like Guardians of Magic. It has so many elements I absolutely love! Fantasy? Check. Supernatural? Check. Vampires? Check. Hot men? Check, check, check, and check. Unfortunately, I only made it 55% thru the book before finally throwing in the towel and giving up.

Eve, a Para Detective for the 54th Precinct is on the hunt for a serial killer she assumes is a vampire, tho the victims while drained of blood, do not have the telltale fang puncture marks. Whilst investigating, she runs afoul of a vampire she suspects might either be the killer or knows who may be. Just before she gets really harmed, four hunky men appear from out of nowhere and not only kill said suspect, but tell her that she is not entirely human either, and her very existence is causing a major shift in the veil between her world and theirs. Finding out that she is half fae and half human explains a lot to Eve, especially in regard to recent events. Tho, she is slow to come to terms with her new heritage, and the instant attraction she feels to the four fae warriors who have sworn to protect her until they can take her back to their world with them for training in order to harness her massive (and unheard of in a halfling) anomalous powers.

This book has so much potential, but suffers greatly from poor editing, and continuity issues. I confess that first person writing drives me up the wall, and is usually a huge deterrent. But, if done well, I can look past it. Unfortunately, the first person voice is inconsistent and makes things a bit confusing in several places. Also, one of the guardians is supposed to speak formally, quite similar to an Olde English dialect where they say "thee" and "thou" a lot. The problem here is that even tho it is brought up on occasion that he speaks this way, he only uses this pattern once, and also incorporates contractions in his speech in such a juxtaposition with the formal nature of the dialect he is described as using.

Again tho, I must point out that this book absolutely has a ton of potential. And, if I ever get word that the book has been revised and edited properly, I would jump at the chance to read it again (provided that the POV changes from first person as well). Well, as long as the book does not end in a cliffhanger, of which I heavily suspect it does. But this is simply a guess, since I did not finish the book in the first place.

As with all my low scoring reviews, this is merely my opinion. I do encourage you to form your own opinion. And, if your take on the book is different than mine, I am quite happy for you.

I enjoyed the book and characters, oh and especially the weapons...what can I say, sexy fae men with some awesome daggers, bows, swords and staffs? I'm in. A half human/half fay Eve doesn't know what hits here when they come into her life. The premise was interesting and kept me intrigued because I didn't quite know what to expect. I think this is the author's first book and I really hope that her writing grows more as she writes. Some of the descriptors were overly repetitive (like how often in four pages do we need to hear how hot the guys are) and we are repeatedly told basic information over the course of the book (like the guards' service to the queen), which gets a little annoying because it takes away from the story line. There are also some minor inconsistencies that distracted me as well within the plot line. So while I enjoyed the book I was frustrated from being pulled out of it several times. I like to connect with the Eve and the guys, and the human and fae realm. I feel like as the writing evolves, so will the characters and the world the author created. I hope to see more writing from her in the future, and I will read her books again. I liked the book, the story and the characters, but there is a lot of room for growth. Good first book.

I am in love with this new series. Elizabeth Hartwell brings you into the Fae world. You have three worlds, the Fae, demon, and earth. When the barrier starts getting weak the fae needs to find out why.

When they find out that there is a fae halfbreed on earth the fae queen sends her trusted warriors there to find and bring her to the fae realm. But when Tyler, Cole, Noah, and Jacob go to earth and meet Eve things change.

Eve is a strong woman. She is a paranormal detective. She is up to her head in vamps and demons and now she is surrounded by fae's that she had no idea about. Not only that they tell her she is a half breed. She always assumed she was human.

This is a must read paranormal! I am excited to see what is next.

Oh.My.God!! What a book.

I must admit that I have never read a paranormal romance as they have never interested me before. Boy, am I regretting that now!

For obvious reasons this book was so different to anything I have ever read. This was a story filled with mystery, intrigue and lots of suspense. It took a while however to acclimatise myself to this fascinating magical world and its different kinds of paranormal beings but I was quickly fascinated, captivated and I plunged straight into this story. I devoured this in one sitting - I simply could not get enough!!

The plot is so unbelievably thrilling, suspenseful so that it is practically impossible to take the smallest break whilst reading. It made me hold my breath on several occasions!

Eve, the heroine in this book, is a detective in another division of the police who polices the Old Haven where the paranormal live and the vampires go against the law. Jacob, Noah, Cole and Tyler are part of the Queen's Guard who are tasked to find Eve and find and discover her mysterious powers.

As she battles the vampire uprising who are dead set on going against the law, someone behind the scenes is doing what they can to see her dead. As the hotness between the four Fae and Eve hots up, the world explodes as vampires come out to fight with their Lord, when an even more powerful demon appears (whose identity I never saw coming!) and a huge battle commences.

I was on tenterhooks to discover who was plotting against Eve. I had my suspicions but was completely wrong!

In the end this finished with a heart stopping cliffhanger. I, for one, simply cannot wait for the next book as it can only get better.

I was gifted an ARC for my honest review.

### **Katherine says**

Guardians of Magic is set in a world where vampires and werewolves are out of the closet. Eve is a paranormal detective, investigating some shady vampires. During this, she experiences headaches and starts hearing things. Then when she does something incredibly stupid (I mean come on, going off on your own while dealing with vampires???) and meets the fae guardians, Noah, Tyler, Jacob and Cole. The fae help her when her blossoming powers start going haywire and she gets in hot water with her coworkers. In the aftermath, she grows close with the fae and learns more about her parentage and her powers.

This was a super interesting take on what happens when the humans find out about the paranormal. Sometimes it can be weird, but this was (in my opinion) a pretty realistic depiction of what would happen, lots of laws and regulations. (Felt a bit too on the nose if I'm honest). And Eve for sure did some stuff that almost classified her as too stupid to live, almost. I can kind of see where her overconfidence came from, being a cop she's trained and can fight... But still, vampires!

I loved the chapters from Eve's point of view, but the guardians were all lumped together and it made it a little confusing at times because I wasn't always sure whose head I was in. And Cole's voice was very confusing. He apparently has a very formal speech pattern, but he will often use contractions, and it makes his lines somewhat hard to read which is really unfortunate, because his backstory was really interesting, and I want to know more.

All in all, this was a really good story. It was unique and finding a story like that is super special. And I loved the twist at the end. I'm super good at guessing twists, but this one was completely unexpected. And that made the story all the better, so I'm super excited to see what happens next because it could be a wild ride.

I voluntarily reviewed an ARC of this book.

Elizabeth Hartwell is a new author to me and what a wonderful find! This tells us the story of a paranormal detective, Eve, who realises that she seems to have a knack for knowing things. When she is on a search she finds out that fa Guardians Noah, Tyler, Jacob and Cole are there to assist her. There have been some very suspicious paranormal murders taking place and they are here to help her and rescue her from a vampire attack. What they didn't expect to find was HER. These three s@xy men feel a connection to her that they can't ignore and she certainly doesn't want to ignore them. plenty of passion, mystery and suspense in this great book. I thoroughly enjoyed it and look forward to reading more of her stories. I received a reader's copy of this book and voluntarily leave my honest opinion of it here. Definitely Recommended

There are unseen twist, evilness, good and some very special Fae men who live to protect and make Eve happy. I enjoyed how each Fae comes with his own way of making Eve feel special and loved. ### **Lauren says**

Eve finds herself torn when she learns she is fae herself though she has been fighting them to keep the peace. She must decide if she will believe her new three hunky fae saviors or stay and protect her town and sister from the evil lurking - the most dangerous of all quite possibly being herself. Trapped in a web of lies and deception, and the arms of all three of her fae companions, Eve must conquer the threat on Earth in her own town before she can deal with the threat that's growing within her.

Guardians of Magic had more potential the further you read. The storyline itself while jumpy at times, had decent premise. Really the difficult part is the forced present tense and awkward first person. It made the flow of reading choppy and difficult at times. I found if I read faster, that I could focus on the story instead.

Disclaimer: I received a complimentary ARC of this title for my honest review.

Eve and the Guardians will have you rethinking everything you know about the mystic. Having been raised in a orphanage, finding a place is a yearning for Eve. Her position as a Paranormal Detective just might be what leads her to discovering everything she could want to know. When there are a rash of supernatural killings in her small sleepy town, Eve knows she has to get to the bottom of it. She never expected her investigation to bring her face to face with the Guardians of Fae or that they would apparently be looking for her. Guardians Noah, Tyler, Jacob and Cole have a mission to bring Eve into the fold so that her powers can be tamed. But in a world where things aren't always what they seem, it's unsurprising that secrets and surprises are around every corner.

After reading the first chapter I had to double check this wasn't Alex Lidell Power of Five fan fic... It just kept reading like a rip off of Power of Five. You have 4 fae warriors that have been together for centuries, one of them is a really quiet one named Cole and a boisterous one named Tyler, just like Power of Five... The world is called Lunaria, while Power of Five is in Lunos... In both stories, the 4 fae warriors seek out a prophesized special human women... In both stories, they are battling the demons/Mors that are getting into their world from another dimension. The warriors need to bring the human back to their realm for training, just like in Power of Five. The one big difference is that "Guardians of the Fae" is a lot more over the top and superficial. I think at this point I'm going to DNF.
