I struggled on how many stars to give this book..I liked it but I didn't love it. I definitely preferred Masters At Arms which is the prequel in the Kallypso Masters Rescue Me series.

In Nobody's Angel we get Marc d'Alessio story. Marc, like the other Masters, has a lot of deep-rooted issues and guilt. These result in him not wanting to get close to a woman and staying away from dom/sub relationships. One night he rescues Angelina from an awful BDSM scene in the club while on DM duty. However, he immediately feels guilt over not getting there sooner. Angel left an impression on him, the first woman in a long while and he cannot keep her out of his thoughts. Angel though doesn't remember much from that night (passing out after the drama) other than what she describes as a "dream hero", a man straight out of her fantasy who made her feel safe again.

Some weeks later Marc and Angel meet again at a bar. Marc recognizes her immediately and realizes he still feels very protective of her and is completely attracted to her. However, he does not let on who he is and here the deception begins!! Angel does not remember Marc but picks up on words and feelings when with him that reminds her of her "dream hero". Add to this the further complication of gorgeous Luke who has his own issues and also has feelings for Angel for very different reasons.

Nobody's Angel is HOT and well written in the sense that you get that emotional connection with the characters and feel what they are going through.

I don't want to go into the story further so as not to spoil it for anyone.

So why the reason for not knowing how many stars to give it..well...I really liked the story, loved all the characters but it was quite slow and repetitive at times. Without giving too much away the "subbie training sessions" started out really good but never got going, they were drawn out and repeated but never really got anywhere. Angel and Marc also seemed to "over-think" so much that it got a bit annoying. But I will say though that it was interesting to see the relationship evolve and the passion and the realization that Angel makes.

I am chuffed that I don't have to wait for Adam's book because his story intrigued me from Masters At Arms and the way this book ended has me wanting to know what is next!

I really enjoyed this story from beginning to end. It seems like BDSM would definitely be a way for an abusive person to "hide" their nature... almost like the pain portion gives someone permission to go too far. That's what happened with Angelina and Allen. Allen was a total dickwad (to borrow Adam's term for him), and took advantage of Angelina's trust. Angelina had been reading BDSM romance novels and thought she might like to try it. Allen completely obliterated her trust in what he did, but Marc arrived just in time to mitigate the damage. And he did it in such a non-intrusive way that she wasn't even sure if he was real.

Neither could forget about the other, though. And neither thought they'd see the other again (plus Angelina though he was a dream lover), but fate intervened when he and his friend Luke rescued someone in her town and had to stay for the resulting media events. He and Luke are both smitten with her, and the fact that Sir Asshole (as Marc liked to refer to Allen) was in the same bar gave them an excuse to stay near her. Marc thinks Angelina deserves someone like Luke, so he keeps trying to push them together. While they have some touching interactions (with some touching involved, lol), it's clear to the reader who should be together. But they both resist it -- Marc much harder than Angelina. Sir Asshole, living up to his namesake, gives them all an excuse to spend more time together, and stuff happens. Good stuff. Scary stuff. Scary in terms of Sir Asshole as well as scary in terms of how they feel about each other.

I liked how Marc showed Angelina that she could be submissive but not give up her individuality. And that it didn't have to be painful. I also liked that she eventually realized that she had some control over the scenes, and realized pain mixed with pleasure could be a heady feeling. I liked how she fought her own body's reaction to the pain -- it seemed a reasonable mental fight considering Allen had called her a pain slut.

I also liked how strong Angelina was, both in spirit as well as physical strength. While she probably did need some help avoiding Allen, she proved she was able to take care of herself when it counted. I can see why she wouldn't tell her brothers about the kink club, but the second incident, she shouldn't have kept hidden.

Anyhoo... can't wait for the next one. Not sure if it'll be Adam or Damian, but I'm sure it'll be good! And I want to find out what's up with Luke and Cassie... why Cassie is so skittish, and how Luke will bring her around.

I was a bit unsure at first whether I would be giving this story 4 or 5 stars, but after getting all the way through I say definitely **solid 5 stars**. There were a few things that I wasn't crazy about but I love these characters enough to be forgiving of their flaws, so to speak!

Let me preface my review by saying that if you have not first read Masters at Arms, please go get it and read it before you read this one. This book is #2 in the series and you absolutely need to read the first one to meet and get acquainted with each Dom before you read their individual stories.

This particular story belongs to Marc & Angelina, with a little bit of Luke's story thrown in. Marc rescues Angelina from an abusive Dom at the club that he co-owns with his two friends, Adam & Damian, assuming he will never see her again. Marc has had a rough go of it with women lately and is fighting the lingering thoughts and feelings that he has for Angel. They are unexpectedly thrown back together, possibly by fate, and oh yeah, let the fun and BDSM begin!! Angel swears she is never again going near any Dom or having anything to do with the BDSM scene, that is until Marc shows her just how amazingly satisfying it can be with the right Dom.

This book is wonderfully emotional and incredibly HOT!! My only complaint....to many secrets, Marc kept his secret all through the book and I hated that he just didn't come clean with Angel!! She so totally would have understood. Oh, and Luke has a secret, holy crap people - Communicate Already!!

All that aside, I LOVED THIS BOOK and am so looking forward to the next book, Adam's story, whom

have I mentioned totally makes me swoon!! Oh, and I have to mention that I believe Kallypso needs a spanking for leaving ~~me~~ us with that slight cliff hanger, you know what I'm talking about! :)

Kally's inspiration for Master Marc...Gorgeous!!

I actually struggled between 1 and 2 stars. This book is a huge let down from the first book of this series which was a prequel, telling the back stories of the three main characters.

The book could have been half as long and the story wouldn't have suffered a bit. At about the 60% mark it started to get okay -- after so many chapters of meandering inner monologues and pointless scenes -- and then it just got absurd and then even more absurd. Ridiculous. When the word "cancer" causes you to shake your head and laugh out loud you know the author has lost the way and you are definitely no longer invested in the story on any level.

I don't think I'll continue with this series. It's really too bad. I can't even recommend the first book -- Masters at Arms -- because it doesn't come to any conclusion in and of itself, it only sets up the rest of the series and it seems like those books just won't rise to the same level of story telling.

For those not quite able to wrap their heads around the genre of BDSM or who are uncomfortable with the concepts and feel they are books about people who hurt each other for fun and pleasure - Kally Masters may be just the ticket you're looking for! The Rescue Me series, beginning with Masters at Arms introduces a group of Doms, bound by the oaths and blood of military service, the loyalty borne of teamwork and discipline and the people necessary to complete them. After reading Masters in Arms, I was beyond ready to follow the story arcs of these three Doms and one Domme who serve together at one time and later reunite after war to build a club in Denver to suit their lifestyle and needs. Book 2, Nobody's Angel, tells the tale of Dom Marc, the man who refuses to see himself as a hero, living in the shadow of his dead brother's spirit and previous betrayal.

Fired up from the beginning, this page turner weaves a spell that refuses release, much as a true Dom, until permission is received in the end. What I find so fascinating is this world of strong, dominant males who are so very human, so very flawed and some, even quite broken. Their D/s world is about regaining control, creating safety, security and ultimately a trust that somehow goes beyond just Love. Watching two powerful, machismo males fall in love down that rabbit hole and a strong, very real woman learn to release her inhibitions and ultimately admit her desire to submit is like falling down the rabbit hole. What Masters does so very well is explain, without sounding clinical, educating the reader as the leading ladies learn about the lifestyle through these men. Unlike a traditional erotic romance, the ultimate climatic moment comes with that point of true power exchange and it feels every bit as romantic in its own special way.

The storyline is solid, and there are even some nifty little action scenes and a few club scenes thrown in to really jazz things up - but it's the characters that get you - right from the start. I love that the secondary characters are obviously lead ins for future stories - Strong secondary plot with Adam and Karla set up the next book obviously! Angelina's running mental dialogue is funny, realistic, painfully honest. Watching her be attracted to two men after a lifetime of mental pounding about good catholic Italian girls behavior is entertaining, cathartic and watching her heal under the careful tutelage of the right Dom is sexy, liberating and straight up hot! The sex is graphic and frequent but not the core of the novel - to assume so is to demean the spiritual growth of these broken winged birds into creatures that learn to soar with pleasure, flying the reader with them all the way. (The tension of who Angelina will end up with really plays out at Marc comes to terms with his deeper emotions and knowing that Luke will get his own HEA just from her upcoming release list made me feel a little better while I struggled with that particular storyline - not because I wasn't enjoying the idea of a menage but just the emotional destruction and reconstruction that comes after such a great loss is so heart wrenching, the reader just WANTS him to have that ultimate joy of finding true love.)

Grab your box of Kleenex and prepare for an emotional ride that is totally worth the price of admission! Nobody's Angel is a highly recommended read and this reader totally can't wait for Adam, Damien and Luke's stories - these heroes deserves HEA's. Good things always come to those who wait? Assume the position and say Yes, Sir, indeed!

Hmmmm...Gosh, what to say after I was looking so forward to this story. The prequel to this book was wonderful. I moved onto Marc's story straight away.

So why only 3 stars? I just dont know, I am confused,because it really has everything you need or want in an erotic romance. Marc is a Dom you want for yourself, he is kind, handsome, protective, caring, Italian...he's perfect, maybe too perfect. Although he has issues with commitment (boring)to overcome. Angel is the perfect heroine, curvy, beautiful, Italian, and in need of rescuing.

The author seems to find the need to over examine and explain explicitly each one of the characters thoughts and *feelings* to the nth degree. Which , yes, we need that, and it is very refreshing in this type of novel. But jeez...enough already, just get on with the plot! Sometimes it just went on so long that I felt like skimming to the next bit of dialog.

Their was a lot of sex without the "sex"...yeah I know, but it's true.

A love triangle/menage that I felt the heroine for all her inexperience fell into a little too easily. The author writes really well and she has a very healthy respect for the proper and safe use of BDSM. So much so that I felt some of the scenes written as a guide to safe BDSM.

Still I love Adam and will be reading the next one too!

Nobody's Angel is Marc and Angelina's story. Marc meets Angelina when her and her boyfriend visit the Masters at Arms BDSM kink club to kind of test the Dom/sub waters. Angelina's boyfriend completely abuses her trust and luckily someone - the dungeon monitor, Marc - notices and puts a stop to the scene. Marc is wearing a mask and Angelina isn't able to see who her rescuer is. But she knows that this man is the type of Dom that she wants and needs. When they meet again Marc remembers who his little pet is but Angelina doesn't know that Marc was her rescuer that night at the club. Why doesn't he just tell her from the get-go? Heck if I know. He eventually gives a reason for his perpetual storytelling, but it isn't good enough for me. I am okay with some misunderstandings and a little lie that can be somewhat justified but lying throughout almost the whole book?! No. I was sorta okay with it until he had everyone else in on the lie too. And then it just turned into storytelling hour. I enjoyed the book otherwise. I loved reading how Marc was able to reintroduce Angelina into the BDSM world. He pushed her right up to her limit and didn't give her an inch. She had a lot of personal issues to deal with in this book that were heartbreakingly real. Least of all being her super abusive ex.

Since I am a complete sucker for secondary characters I completely adore Luke (...and Adam...and Damian...)! He was just too sweet and deserves an amazing HEA.

I really wanted to really like this book because the first one was so good! If I could rate just the last 20% of this story I would give it 4 stars. Marc just drove me too out of my mind crazy during the first half that I just can't justify a higher rating. But I am *soooo* ready for Adam and Karla's book. That last line is killing me!

I really wanted to skip this one and head right to *Nobody's Here* because I wanted to find out about Adam and Karla. But I also hate reading things out of order. I liked Angelina a lot. I love that the author has clearly thought out and planned these stories very well and has a clear direction she wants them to go in.

I find that when reading a novel in this genre, I need to see and feel an emotional connection between the main characters (or love interest) of the story, in order for me to be even remotely moved by the physical act of them coming together. The 1st book in this series was incredible. Because of the way that it flowed. How it all came together it made you care about these men. Their plight. And be anxious to know more of their journey.

Nobody's Angel started off with a clear path in mind. It was intriguing how things appeared to be coming together. It has a few surprising twists to the story that lead you to believe you are going to be held captive, aching to learn how this is going to turn out. But when you get to the middle and for the majority of the book, you're lost to too much BDSM/physical acts and not enough of the emotion that should be present with Marco & Angie in order for you to believe the foundation they are trying to establish.

There were scenes that went on for chapters upon chapters. You get the impression that you are reading an instruction manual on BDSM. That the author is overloading you with her knowledge in the BDSM world. This caused one scene to literally span over 4 to 5 chapters. Entirely too much repetition as well. And Marco and Angie both spend long drawn out scenes in their own heads. Even when they are together they are too much in their heads, instead of interacting with one another. You lose focus, insight, and interest in the characters and their plight. To the point where there is no chemistry between these two.

Alot of this book should have been trimmed down. So when you finally get to the last few chapters of the book, it makes it feel as though some of the things that were actually resolved, they feel rushed and incomplete. And what adds to this feeling is also the openings for the next book to come. Everything is crammed together in the last 3 chapters or so.

Now obviously this is not a good formula to have, especially in a series like this where none of the books can be read as "Stand Alones"

You must read each book in order to know what's going on.

The first book alone has me wanting to read the 3rd book. Hopefully that book will be better than this one. And if so then I will continue with this series. But if you are committed to reading this series then I say this book is just one of those in the bunch that you will just have to get through to come out on the other side.

Ok...Soo..at first I didnt see what the hype was about..Yes the "scenes" were super HOT..but I just wanted to say "Hey buddy just tell her already!..its really not that big a deal!"...But..then I got 3/4 of the way and I went...Hmm..What!..OH_SNAP!..*Tears*...I didnt see that coming!!!..Read last line..and laughed out loud:)...I love it when authors do that!!...soo 3 seconds later...Kindle store!!...I really needed to start the next one that second, and was ecstatic that it started exactly where it left off!..*5 stars* Awesome!

Marco D'Alessio (what a sexy name!!!!) was not the hero I was dying to read about when I finished Masters at Arms. I admit I was more enthralled with Damian and Adam. But I can't say I was not intrigued by the sexy italian, military Doc, who has a thing for just running away from commitment because of his past failed relationships and betrayal by women.

We know that his one time girlfriend and the woman he wanted to marry, had cheated on him with his own brother. We know because of her and what she did he left things in bad terms with his brother who then died in the war. He carries a lot of guilt in his soul and a lack of trust in women. So he prefers to play and not get involved.

But when he intervenes in a scene gone bad at the club and rescues Angelina from an abusive Dom she starts tugging at his heart. And that scares the hell out of him. She's young, she's innocent, she's been hurt. And when she crosses his path again months later he can't help but want to be with her.

This was a bit of a sad story. Both the hero and heroine have been hurt. But Angelina lets go much easier and trusts him completely. She does want to experience BDSM. With him. And at the same time he's protecting her from her abusive ex, Sir Asshole.

There's also a third player here. We meet Luke. Luke who lost his wife 7 years ago in an avalanche. The same avalanche that killed Angelina's father. But he keeps this from her. That's a big thing not to tell someone that you're interested in. But Luke is Marc's best friend, they would as Search and Rescue together. And they both meet Angelina at a bar and realize they both want her.

While she does get to play with both, her heart is all for Marc. Even though Marc wants to push her on Luke because he feels he deserves her more. But here's where the part that wouldn't let me give this a five star rating comes. Marc had a mask on when he rescued her at the club from her ex. She didn't know that was him. And he goes into this whole elaborate lie so that she doesn't find out he's the same guy. Both men are hiding things from her!! I think they should've both come clean a lot sooner than when they did.

In the end though, I think Marc and Angelina are wonderful together, their coming together is a bit slow but not to say it wasn't hot. Even though they don't "officially" have sex until later in the book, they get plenty of play time and he slowly eases her into BDSM. I learned right along with her about quite a few new things I had not clue about (and yes I googled them as I was reading). He likes to call himself a Casual Dom, meaning he doesn't want to be a Dom 24/7, and he doesn't like to punish a woman, although he will do it if she deserves it.

With the events in this book with Adam and Karla I am very anxious to get to the next book!!! And I really want to know more about Luke!

PS: I love how the author gives you an idea on who her inspiration was when writing the characters and for Angelina and Marc she has Monica Bellucci and Raoul Bova.

3.5 Stars

I liked this book, but I didn't love it as much as I'd hoped. Some of the scenes and dialogue really drug out for me, and I didn't make a great connection with the characters.

I am however looking forward to the next book because I really like Adam and Karla already.

~ Becs ~ says

Liked but not loved this one. 3.5 stars rounded down to 3.

The second in the Masters at Arms series and Marc's story.

While on DM duty one night at his club, Marc rescues an inexperienced sub, Angelina, from a scene gone wrong with her abusive boyfriend. Angelina is in so much pain that she's lost in subspace and doesn't even consciously notice Marc bringing her down but she remembers him in dreams.

They bump into each other again a month later. Marc is with Luke on SAR duty. She doesn't recognise Marc but he recognises her and he and Luke protect her from her abusive ex. There's a zinging attraction between them all and they indulge in a very hot ménage scene on her sofa.

Luke decides she is an angel sent by his late wife and Marc tries to take a backseat having vowed never to let a woman come between him and a friend again but he can't resist her. What follows is probably one of the most protracted, drawn out submissive scenes I think I have ever read. I wanted to scream at Angelina – JUST GET ON WITH IT ALREADY!!

It's just a screaming orgasm after all!! What could possibly be so wrong with that??

Anyway, her submission is hard fought, overthought with some of the lengthiest inner monologue I think I have ever seen in an erotic novel but she does finally (after about two millennia) submit. Hallelujah!! I lost count how many times she would be close to *la petite morte* and then a stray thought would wander across her mind and she'd pull away and start ranting. What is wrong with you Angelina?? She's definitely a girl in denial of her own basest desires.

They're all keeping secrets from each other too, at least they think they are, and I had several moments of frustration with this. It's like a pantomime when the baddie is creeping up on the heroine and you just wanna scream "He's behind you!!!!" Just tell each other already – surely this kind of connection is all about honesty??

And, it also felt a little bit like BDSM for Dummies – just about everything was explained to the reader. Give us some credit here. We smut readers, WE KNOW!!! I felt like the mantra 'safe, sane and consensual' was constantly being used to bash me over the head.

Now, I'm being unduly harsh here. I did enjoy this and I am definitely continuing with the series. The inner monologue does actually allow us to really understand what was going on in all their heads but it is kind of overdone. The sex was very, very hot but so drawn out it felt almost tantric. The stage is nicely set for Adam and Karla to carry on what started here. The theme of the unwilling sub and reluctant master is definitely going to be a recurring one.

After reading Masters at Arms, I am fully invested in the characters in this series so I will keep coming back for more but it is a tad frustrating.

3.5 stars BDSM romance

Rosebud says

This is the second installment of the "rescue me" series by debut author Kallypso Masters. While it is highly recommended to read the prequel Master at Arms, I found that this book can be read as a stand alone book. You won't get the complexity of the central characters but the author does a good job building the readers understanding of the characters all the same.

The story line is a contemporary fictional continuation of 3 ex military soldiers who are now owners of a BDSM kink club and have formed a family of sort. Enter Angelina, a girl searching to find out if the lifestyle she has read about in her romance books is what she has been secretly needing in her life. However, on her first visit, she has a bad experience at the hands of her dom but is "rescued" by Master Marc, one of these owners, who has issues of his own. She goes through wanting to turn her back forever on her curiosity of all that is BDSM while still being tempted to continue on under the guidance of Sir. Complicating matters is her confusion of what she experienced at the hands of her ex with the sexual awakening of what she is shown by her new teachers of BDSM/lifestyle. Which will she choose and what happens when her ex decides he isn't done with her? There are so many twists and turns on her journey including Luke, the guy who also wants in on the action. Scenes are hot and steamy I won't give away any spoilers beyond this.

This story works in explaining the parts of the BDSM lifestyle in a way I haven't seen in many many other books of this type. It pulls the reader into the many levels of what defines true trust and how the lifestyle chosen can be freeing yet empowering to the individual. While the story has its serious moments, it balances out with humorous interaction and play that had me laughing along with the heroine. The only criticism I had was that the ending seemed rushed. The story flows in a nice wave that keeps me entranced and then, boom, end scene without much build-up to it.

All in all though, this is a story I recommend at a price that I couldn't believe. The ending gives the reader an intro peek into the next installment due in December, 2011.

DNF :(

Just not my cuppa. This was oversimplified, overly dramatic BDSM. Too many parts read like an instruction manual or an explanation for the lifestyle. I'm far from experienced when it comes to this subject, but I've come to like certain authors of the genre.

I might have liked this had it been one of the first books I've read on the subject. But the heroine's uber innocent denial of her submissive nature (it was CONSTANT) was eye-roll inducing after awhile and the oh-so-patient instructions of the hero came across as parental condescension more often than not. I'm super bummed, because a lot of my friends 5 starred this series, and the overall ratings are outstanding.
