## **The People in the Rickety House** Lani Lenore

By age 17, Leah has lost everything.

Her mother left 3 years ago and has not been heard from since. She is at risk of losing her relationship with her younger sister Tabitha, who suffers from injuries that Leah blames herself for. Not only has she lost her family, but her home. After their father's unexplained suicide, the girls are sent to live with their reclusive aunt, Claire, who seems to live as far from civilization as a person can get.

They are sent to the rickety house.

While dealing with the idea of her father's death and her mother's absence, tolerating her handicapped sister as well as her despondent aunt, Leah finds out that there may be more to the old house than she suspected. She begins to find letters and photographs that tell of the family who used to live in the house, and her interest is drawn in further when she finds she can communicate with the ghost of a teenage boy through a window in the attic. In order to distract herself from her own troubled life, she delves fully into his, trying to uncover the mystery of his death in the house – but it remains to be seen how that will affect her own sanity, or if she will lose what little of her own life she has left.

## Mohammad Taiseer says

This book is a good way to spend time, specially if you like stories about ghosts, scary houses, and weird/supernatural stuff.

The writing was not as good as the author other works; there was a huge use of the word "That" and minor faults in spelling.

The first fifty pages or so from the book didn't interest me and had my focus on the writing, but as I got into the book more it became interesting, pulling me into finding answers to Leah's questions and the weird things happening inside the house.

I loved the thrill it gave me. And I loved every scene of Leah and Jake talking -I couldn't help but wanting romance between them.

The twist in the book was mind blowing, making a twist in the plot was always one of Lani's charms in writing, she can trick you into thinking you're walking through a straight road where in fact your road is forked, full of curves and turns but in the end everything will make since.

The story is not regrettable to read, in fact I would recommend you to read it.

One thing I disliked about the book was epilogue! The story had a good ending that won't leave you saying "why the fuck did I read this just to have such ending!" The ending is OKAY.

I hated the fact that Lani chose to not show us the aftermath, I know things are going to be okay but I want to see them to make sure, I want to know what happened to Tabitha, I want to know Jake and Leah end. Argh! But still, I don't regret reading the book, lovely read. :D

Should you read it?

I'm not really into ghost stories, but I love Lani Lenore's style and I wasn't disappointed. I truly like the way the author plays with frightening situations, adding up elements from twisted fairy tales. The ending is simply PERFECT; it leaves with a sense of hope for the protagonist and her future.

This book gave me chills! It was creepy and horrifying, maybe on the levels of The Nutcracker Bleeds and I

liked how the mystery was unfolded.

The ending was good but I would like to know more about Tabitha, even if I didn't like her character too much.

I definitely recommend this book to everyone who likes horror stories.

#### **A decent YA read**

I had this on my to read shelf for a very long time. Finally read it. It's not too bad. If I was the target audience I would've loved this book.

More like 3.5 stars. I'm not one to read many books that are creepy. For starters, I admit that I get scared easily. This book didn't necessarily scare me but I did find moments when I was happy I was reading during the day. The book definitely held my interest. Since I don't read many books like this it's hard for me to compare it to others. It was a good story and it was perfect to read for this month.
