s/t: A Study in the Psychology of Decorative Art

This book provides a comprehensive survey of the history and theory of decorative art. The universal human impulse to seek order and rhythm in space and time can be seen in children's play and in poetry, dance, music and architecture, and its prevalence in our every activity calls for an explanation in terms of our biological heritage.

Great book, I've recently finished it recently. My only concern with author is that he put too much effort trying to please most of the readers and critics. But at the end, book is of great value and one can learn thing or two.
