Zero Option P.T. Deutermann

They call it "Wet Eye": a biological weapon that literally eats out the eyes of its victims. Now, deep within the belly of the U.S. military establishment, one small silver canister of Wet Eye is missing-lost because a career pencil-pusher has cut a million-dollar deal and signed it in blood.

For David Stafford, a Defense Department investigator, finding the missing canister means ripping through layers of cover-ups, bureaucracy, and one man's murderous determination to sell Wet Eye to an international arms dealer. But the military would rather silence Stafford than admit to a security breach. And now, the only person who can stop a biological conflagration is an innocent child-who has looked into the face of evil, and seen it with her own two eyes...

Zero Option Details

Chuck says

The Army loses a tube of chemical/biological weapons material. It's not really lost because we, the readers, know where it is; in the hands of a bad guy.

Ruth says

good. interesting story, liked hero.

Brian says

This book was surprisingly good to me. I didn't expect it to be bad, but I thought it would provide me a few thrills here and there to help me get through my kinda dull summer break. Instead, it was something of a mystery movie, combined with a thriller movie, the good type that came out in the 90s. A very good book, with a lot of action in the last act.

Toesnorth's mom says

too far out, started out ok but ending was silly

Bob Spiridigliozi says

Very good book, enjoyable read.

Gina says

I enjoy reading this author's work. "Scorpion of the Sea" was my first favorite, then "The Dark Side". This was an audio book. It took me away from my troubles and helped make that boring I-95 drive enjoyable. PT has a way with plots, character development and points of view. All the time he's weaving in current issues and current military situations.

Mark says

So-so Deutermann about a whistleblowing DCI investigator sent "out in the cold" to Atlanta to investigate scamming military surplus supplies when he stumbles across efforts to sell a weapons grade biochemical weapon...twists & turns & a little paranormal activity...maybe 3.5 stars!

Swanbender2001 says

This was an interesting enough read but it didn't resonate enough on the character development level for me. There wasn't any character I really believed in or wanted to keep knowing after the story ended. I ended the story with a shrug, happy it had fulfilled my need for a "Z" in the alphabet challenge.

Matthew says

Good story line, wasn't quite expecting the paranormal aspect, but it was pretty well done. Fast paced.

John Machata says

Too Army jargon. Fun enough.

Garbageman says

The book was very good, though a little drawn out in places. Without wanting to spoil anything, there was one track that could have been left out.

Hal says

passed the time

Elwood Blues says

Non stop

Again,PT Deuterman puts one out of the park. This book was great. It never stopped...loaded with action and details of a chemical and biological nightmare. As usual as...tons of twists.
