Take a nice break from your everyday routine and be come an armchair traveler all around the world. Where to? This book will give you more than enough ideas and inspirations to feed your wanderlust. National Geographic lives up to their reputation by giving you amazing destinations to visit broken down into categories of things to see around the world: nature unbound, hand of man, sea & shore, mountain majesty and town & country. As if that isn't enough, they also include their own version of top ten visits for all sorts of things, one of which is spectacular bookstores! The information is very helpful in determining when to travel and how to blend in when visiting each destination. Equally as impressive are the abundant and gorgeous pictures throughout. This book made me think about whether my passport was up to date and whether I had enough vacation time. Lovers of travel everywhere, beware this marvelous book!

I love National Geographic books, firstly because of their fantastic pictures, secondly because of their topics. This book, on some of the worlds most amazing destinations was fascinating. It took you all over the world, breaking down into categories like mountains and beaches. The photography was phenomenal, some of my favorites were of Petra, various places in Germany, the painted hills and Marseilles. A great book to just flip through and read about what interests you.

I am one of those people who is quite happy at home. With neither the funds to travel, nor the time to do so, I do love reading about other places and destinations.

This book follows in National Geographic's tradition of superior photography and writing. If you love to travel, you may get some great ideas from this book for your next adventure. If you're a homebody like me, you'll love seeing what else is out there as you travel vicariously through this book.

Kathleen Messmer says

While the images in this book are stunningly beautiful, a lot of them don't invoke in me the desire to visit the destinations. However, there are a few I've never heard of and some tiny countries that do inspire me.

Debra says

I need to let this go. The holiday is heating up and I will not be able to take the time that this book deserves. What I have enjoyed is the amazing oversize photographs and the information on each photo. Now I have even more places that I would like to see.

Anne Washington says

Great. Very interesting.

Atypical locales

Not the usual spots. Def some off the beaten path locations. You won't find typical eifel tower or great wall recommendations.

I absolutely loved this book. I read a few pages every night right before bed and it was such an amazing and almost therapeutic way to get out of my own head.

Instead of browsing my phone and focusing on the worlds many problems or thinking of all the things I need to get done, this book allowed me to focus on a different incredible place in the world every night, or every couple of minutes if I chose to keep reading for awhile. It's like a bedtime story for adults. It had such great facts and such interesting information, just enough to get me hooked and make me want to know more.

It was truly a great book. And the photos were INCREDIBLE. I absolutely loved this book, so much.
