**Space Flyers Paper Airplane Book: 63 Mini Planes to Fold and Fly** Jeff Lammers , Ken Blackburn  
Welcome to the world of miniature aviation, intergalactic style. It's entertainment on the fly for the office, backyard, classroom (don't get caught!), or anywhere there might be a party, featuring 12 Lilliputian-size models that create 63 planes altogether.

From the Dynamo to the Alien Clipper, Cosmojet to the Spectre, these intergalactic flyers are vibrantly colored and gorgeously designed to resemble various spacecraft. Fold up the straight-shooting Star Quest and an Aerobot that's part spaceship, part robot. Includes step-by-step folding instructions and tips on how to send each plane soaring at its full aerodynamic potential.

### **Michele says**

I received my copy from Goodreads giveaway.

This is such a great book for learning how to make different paper airplanes. It contains instructions for approximately twelve planes, a flight log, and then numerous sheets of colorful papers to use to make the designs. The paper is perforated so that they come out easy and they are designated for certain designs. There are ghost lines to help know where to fold also.

I think that first to third, maybe fourth graders will need assistance in folding some the designs. Older children should be able to handle them just fine.
