Trekking Home: Revised Edition Jeffrey Miller (Editor) , Nancy Miller (Editor)

Former US Army Ranger Nate Michaels was with friends on Vacation in Montana when the world wide economic collapse occurred. Suddenly, the United States was on a fast decline not only economically but also socially. The trip back to North Texas was not going to be easy. This is a story of one man out of millions that found themselves on a journey to get home. The US Dollar was worthless now and people were not reporting to work. Financial institutions were all closed and Martial Law was implemented in all major cities. The infrastructure of the United States was being strained beyond its limits. Imagine a world where all facets of normal society suddenly came to an end, including the ability to travel, get food, gas, water, and medical attention. This was the world Nate now found himself in and he would have to explore every means necessary to make his way home.

Richard says

Worth the trip

Enjoyed the story, the author kept me interested from the start. I would like a follow up to see how things progress and if Nate gets to go back and see his new friends.

Mickenzie Jensen says

A pretty good story...

Okay, good stuff first. So I liked the story well enough. The characters are pretty well developed and the whole helping others was a nice change from the normal 'trust no one look out for you and your people only' thing so prevalent in p.a. fiction.

Now for the not so good stuff. Sliding from past tense to present tense, poor sentence structure, misused commas, unnecessary detail, and repetitive statements. All of these issues made it difficult to get through the book and took away from the story. I hate to be all negative and such but I think working on these issues would be a huge benefit to your future writing.

JONNIE mason says

Mistakes

A wonderful book. Read it all in 3 hours but many, many misspelled words, incorrect punctuation and wrong tenses of words. Almost sounded like writer was of a different nationality with difficulties in our language. Maybe was the proofreaders fault.

Robbie Fowler says

A new author I like

This was the first time I read Jeff Miller's work. I especially enjoyed his mention of Boise City, my hometown, and know exactly where several towns he mentioned are located. I am looking forward to reading more off Jeff's work!

sharon collins says

A long trip.

I liked this book, a lot of action but believable. Meeting good and bad people in his way. clean language which also was nice.

Charles Leslie Breeding says

A small. Criticism

The theme of the book is a good concept. I enjoyed the story line but the editing of the book left something to be desired. I found it hard to follow at times, with numerous grammatical errors. Over all the book is good but could have been better.

H McNabnay says

I really wanted to

Give this a better rating. The story is great, but the author made so many grammatical errors I just couldn't. Sometimes I had to stop and re-read several sentences to figure out what the author intended. Spelling was atrocious and several time the names weren't even right. Nate was called Nick in one spot. With that said, I think there is a great story in there if you can get past the spelling and grammatical errors. I'm no perfectionist, but every author should know the difference between to and too, keeping the story in either present tense or past tense through the whole book, let alone a sentence, and proof reading as mandatory.

Al Sheppard says

Super Reaad

Looking forward to more of Jeff work. He reminds me a lot of myself. I strongly recommend his work. It flows smoothly along. I'd recommend to the readers take note of the various confrontations. As combat vet Army Airborne, sand a twenty two year career as a detective with the NY PD. These situations are not far from reality in this day sand age. Just please . Pay attention to events. Sand be prepared.

Bernie says

Trekking Home review

Trekking Home is the first post apocalyptic book in this series written by author Jeffrey Miller. Good storyline and characters.

Virginia Clark says**Trekking**

Loved loved loved this book. Good clean verbiage. No sex and not to much violence. Good plot. Writer kept the reader engaged

James C. Harris says**Mr.. Miller.**

It's 2 AM and I am looking for more books this author, it's a good read and I hope he keep the story line going. (US Army Ret.)

Janice Bullard says**Great book but way too many typos**

This has a really good storyline and I am starting book two now. BUT, there are tons of typos Somebody did not proof this book worth a toot.

What a shame

jeff hatfield says**Good story line and action packed would like to see the story continue would recommend this book for others to read**

Very good story line action packed kept me wanting to keep reading I would recommend this book for others to read

Uncle Dave Avis says

What a really gifted wordcrafter Mr. Miller is . He has written a book that has a believable plot, good and bad characters, and a very strong central character. The story flows very easily and is a joy to read. This was a really good read and I recommend it to everyone.

One Note: The editing is awful.. The author really needs to read the Kindle digital book word for word. There are words that appear from nowhere and some what have disappeared from the sentence. Other

mistakes should be very easy to pick up, as they are like a speed bump in the street.

It can all be easily corrected.

Good Job!

Jeanette says

Different kind of apocalypse...

Our banking system has been decimated...no money and a emp has taken out the power for most of the east coast. The U.S. is suffering.

Nate has been on a camping trip in Montana with friends. He has no idea of the problems everyone are now facing. As he begins to realize something is wrong, he desperately wants to get home to Texas. His trek home will be a long, arduous journey. He makes new friends but also runs into that rogue element of bad guys for whom looting & killing seems to be their nature. Will he make it?

This was a decent read. Some spelling problems, some comprehensive problems. The storyline was good and flowed very well. I wish the characters were defined a little better. It almost seems the book is kind of stilted. Although the storyline flowed well I didn't pick up much empathy for each other. JMO... The author did a good job..?

.
