# **From Reader Review Dinosaurs for online ebook**

## **Starr Elementary says**

This is a GREAT book for kids to explain everything dinosaur. It is easy-read with pronunciation guides for the bigger and unfamiliar words. It goes over the time periods, different types of dinosaurs and their habitats.

## **Judy says**

Fly Guy children's book - I think it was level 2 - well done & interesting

---

## **Md Rodhi Md Rejab says**

Amrul Umar Review  
Good for kids

---

## **Brittany Perry says**

A great informational book for young ones to learn about dinosaurs. My son has really hit this science streak lately so I have been pushing scientific books for children at him on whatever subjects he brings up. Now on to the space books and frogs! Seriously though this was fantastic!

## **Damaris says**

### **Best books for kids**

My son is 6 years old and loves all fly guy books! We read fly guy books over and over again. It's great for beginners read group working their way up the levels

## **Mady Dailey says**

1. Too Many Dinosaurs by Mercer Mayer. 2012. Holiday House Incorporated.
  2. I chose to include this book with Fly Guy Dinosaurs because in the book it shows how a dinosaur hatches from an egg. It also shows the behavior of a dinosaur and shows different examples of multiple kinds of dinosaurs. Just like Fly Guy shows dinosaur eggs and different types of dinosaurs, this story portrays the same concepts but in fiction form because we all know we can't have a pet dinosaur.
  3. Combination: Description, Cause and Effect, Compare and Contrast
  4. To engage the students to make connections, I would create a KWL chart with the students. I would first read Too Many Dinosaurs with the students and create the K (what do they know). Here I would activate their prior knowledge by asking what they already know about dinosaurs. Next, we would create the W (what do they want to know), students would ask questions and make comments on what they still want to know. After reading Fly Guy Presents Dinosaurs, we would visit the L (what did they learn) and write in connections they made from their own knowledge to what they learned by reading more facts about dinosaurs.

## **Niki (Daydream Reader) says**

I love this series of nonfiction books using the character Fly Guy. A fun way for my second graders to learn about nonfiction topics.

---

## **Autumn says**

K picked this book up from his school library.

We love reading the adventures that Buzz and Fly guy have. In this story we are learning about dinosaurs. We get to learn how big some dinosaurs were, what paleontologists do, we get pictures of dinosaur bones and so much more. This is a fun read for those that not only like dinosaurs but also that enjoy reading about Fly Guy. A great science book.

## **Stephanie James says**

I love Fly Guy books

---

## **Jessie says**

“Perfect book, good book.” -Wolfie

---

## **Jess says**

December 2017 - Fly Guy and Buzz are mostly in the background, and the focus is on easily accessible information about dinosaurs. It gives a good overview and has a combination of photos and illustrations. Ben asked for it a few times.

---

## **Diana Thomsen says**

I found this book to be extraordinarily difficult to read. There was good information here, but the format didn't work for me. Plus, the insistence on teaching that dinosaurs lived millions of years ago even though there is no conclusive proof of this theory, bothers me.

---

## **Kelli says**

Awesome, why didn't I know about this for my dinosaur unit?? Full of actual photographs and drawings with labels, pronunciation guides, and comparisons between modern animals and prehistoric ones for comparison. It even addresses how pterosaurs were not dinosaurs; a fact forgotten by media and toy companies everywhere. Definitely a classroom library must.

---

## **Emily Y says**

Dinosaurs by Ted Arnold is a fun, informational book for children grades K-3. There are all sorts of facts about dinosaurs, where you can go to learn about them, and Pangea. The twin text I chose for this book is "Have You Seen My Dinosaur?" which is the same age range, but is a story about a little boy's pet dinosaur hiding from him.
