Very well done post apocalyptic story. Good feel for the fragmented society left after the comets hit earth. The alien element was fairly well done. He mostly seemed alien except when he called her baby while making love. That just seems very Earth centric to me. The romance was slow building and well done. No multiple partners in this one. The only thing that really brought the book down for me was the super quick ending. As usual I felt that a. the book needed to be longer and b. that extra length needed to come at the end. Everything always wraps up a bit too quickly in KO'C's books.

I really liked the post apocalyptic setting, characters and general plot of this story but things progressed at a lightning speed near the end with a timeline jump and it ended too abruptly for a satisfying conclusion.

Where is the rest of it. You get the heroines desire to live, survive and find her lost family. You get that Gabriel is a determined orphan who is finding out what it is like to want, need and care for someone. It all seems to come along and while you are expecting the book to continue and develop...it just stops. What, I mean come on there is still a few things that need cleared up. EG - what happened at the camp, how did Gabriels' bosses take him leaving (did he just leave or retire or what?), what happened to Lexa's sister and brothers and her nephew and niece? I mean come on there we get to a cliff-hanger and then an everything is hunky dory. Does this mean that there is another book in this series? I can't find anything on GR and her listed website doesn't work!!!!

Where is the rest of the book??? I felt like she started writing, gave up, left it sitting for a couple of years, blew the dust off and went oh.. "and they lived happily ever after" the end. Why is the end so abrupt? Why? Why? Why?

I loved the story and it was just getting to the end where the war would happen between the humans and Angels, when it ended! She skipped the war and ended the book...she didn't even say who won!!!!

I can not believe I'm giving O'Connor just 2 stars. I loved the premise of this book. Post apocalyptic alien sci fi erotica sign me up! So what was my problem? Where was the editor for this book? There were so many typos and just wrong words scattered throughout the book it was distracting. There were also a few times I wondered if the book was missing chapters or pages. I'd be reading along and then Wham- what just happened? This book could have easily been a four star for me if it had just been edited! I seriously wonder if I got a rough draft instead of the finished product. I love O' Connors books and will most likely buy the next but I'm really hoping the next book is properly edited.

I love Kaitlyn and loved this story, I wanted more...what happened when they got to Raphael's homestead, the birth of their baby and what happens with Lexa's siblings. I just can't get enough of the world that Kaitlyn created. Truly my only real complaint and the reason I didn't give it 5 stars is because it took until nearly half way through the book for the hero and heroine to come together. I hope that this is truly the start of a new series and that we get to revisit this world and these characters.

Ms O'Connor can build a world and pull you into it, making you feel the desperation the heroine Lexa feels just trying to survive. Her Bravado shines through as she tries to deal with those around her. I felt her need to experience something better in life than what she has already known. You also feel Gah-re-al's struggle to conform to what he knows or to take that impossible leap and grab onto something he unknowingly longed for. This for me has been one of the best Post-apocalyptic Sci-fi stories I have read in a long while.

You know, just flat out I am a fan of Kaitlyn O'Connor. I love her Sci-fi and in this, she did not disappoint. I just got through reading a 79 page post apocalyptic sci-fi and it took me a couple of days to make it through. I wanted to love it but, really it was eh, just okay. However, this book The Lawgivers (205 pages) I ate up. I could not put it down.

She wonder a little when she could have add more to the story. But I like this one.

Post apocalyptic world but not as annoying as usual. Gabriel and Lexa are a good match. Dark subject matters but dealt with a light hand.

Classic Kaitlyn O'Connor! First I would like to say that I am a HUGE Kaitlyn O'Connor fan! I have read most, if not all of her books as well as many of her books under her other pen names. This book goes straight into my "favorites" list.

The heroine, Lexa, is strong and determined to make her life better. She faces many trials in life and, under the circumstances, has adapted very well to a post apocalyptic world.

The hero, Gabriel, is a super bad ass Lawgiver who walks into town to take out the scum gang members and take the humans to a better place where they can learn to live properly.

There is one particular scene in the book (the cougar scene) that had me laughing so hard, I had tears in my eyes!

Kaitlyn never fails to paint the image of what a world would be like in a situation like this. Her descriptions of places and characters are always easy to envision in my mind. Excellent work!

Loved it. Could relate to characters which were believable and great world building.

The background of story is 50-70years ago two meteors hit earth and with the following environmental cataclysm wiped out a fair chunk of humanity with the remenants living by scavenging what's left from previous (our) civilisation. Then come Gabriel's people to settle on/ build a colony on Earth, but who also feel the responsibility or taming/rehabilitating the human savages for various reasons.

Our heroine had been born in the "after" [post-apocalypse] at a time when most knowledge of the "before" was lost. Both our hero and heroine had had it tough and it was fascinating as our story unfolds watching these two strangers with different backgrounds and thinking relate and gradually grow closer.

When I read the kindle sample I was in two minds whether to purchase [due to the previously mentioned wordiness issue] but glad I did as book improves. There were three or four places an editor should have got the red texter out where author repeats herself but book mountains above what a lot of current fare is. Book a decent length so this isn't too bad.

I would recommend this book and thank the author for sharing her originality, creativity, and time. You can tell with Kaitlyn O'Connor it is a labour of love :)

Ps. At end of book we get a preview of the first few chapters of Kaitlyn's new Cybervolution "The Awakening" book soon to be released - you'll love it :)

While not a bad story...the end just kinda petered out....I don't know if it was a bad copy from Fictionwise or poor editing but one minute they were discussing moving Lexa and Gabriel quitting being a "lawgiver" and in the next sentence she is 6 months pregnant and Gabriel is worried about weather or not he would be getting laid....

I cannot read stuff about bad Angels that are sent from heaven. Now if it's a fallen angel I can kind of get around it, but not the former. So, could not finish, no rating.
