Fave comfort food

Enjoyed this. Now to cook and tweak. Mac and cheese is becoming Hubby's fave food. Can not wait to experiment.

Jo says

Wow. Just reading some of these recipes made me cringe. There were only two that might be worth trying. Haven't any of the contributors heard of fresh vegetables or actual real cheeses and alternates to cheddar/mozza/parmesan like goat, feta, or mizithra? Veggies and other cheeses can be added to make great mac & cheese. So many recipes called for processed unhealthy ingredients like canned soups, jarred alfredo and huge mega doses of mayonnaise (!) and way too many called for processed cheese-like spread. Just wow.

Something different macaroni/cheese

Mostly different cheeses and not too much else. Mostly casseroles with one crock pot recipe. I would have liked maybe salad too. I got one with ham though and that's something I wanted.

This ebook, along with meatloaf and chocloate chip cookie versions, is available free on Kindle. I love macaroni and cheese and could not resist. Recommended for those who are not quite creative enough to come up with their own mac and cheese variations, meaning very few people. Mac and cheese is pretty basic, even for someone like me who will never be fully comfortable in a kitchen. I want to see a free offering for curries or souffles, something a little bit more difficult at least. That's me being sarcastic.

Barbara says

There were a couple of recipes in this cookbook that looked inviting. I may just try one with something from the meatloaf cookbook!

Diane says

it was OK

Scott Whitney says

Some of the recipes seem a little basic, but they had me at hotdog. I have loved putting hotdogs in mac and cheese for quite a while, but some of the others had sauces which seemed a bit more creamy than the ones I am used to. I also liked the ones which put bread crumbs or crackers on top then baked them. One even put french fried onions on top, total awesome.
