Oh My Darcy has written a trilling book here to follow on from Morningstar

This book follows on exactly from where we left off in Morningstar.

I have loved this story and it just keeps on getting better and better..

Asked Ms Town when the next on Daystar is coming out and she said a couple of months from now...
WHOOO HOOOO cannot wait.... Want to know what happens next.

This is a really clever take on Heaven and Hell - Angles and Archangels....

I just know that I will be re-reading this like I do J R Wards Black Dagger series...

This book is even more incredible than the first. Town continues the momentum from the ending of the first book, while building a setting so incredible that the reader is repeatedly dazzled to the point of breathless awe.

The relationships of the Fallen continue to be defined in such a relate-able manner until the wall between reality and fiction is blurred. As a reader, I felt so connected to the group that I was laughing and crying with the characters.

And don't even think you're done with the ride. The third book launches with such strength that the one has no choice but to hold on.

Why do you do this to me again? You like watching me suffer, yes? It must be. I am seriously thinking of buying a paperback edition of the last book just so I can slug it towards your head. Really. I'm thinking about it.

Okay...so. I like it a lot but I did notice how long it was and overwhelming compared to the first book which is weird because the first dumped a lot of info in our heads. A lot of action in this as well. And I did get pissed about all the waiting around. It was frustrating and kinda boring too. They are all also incredibly violent. Doesn't age provide wisdom? Life is precious and all that? I mean, the one directed at humans is understandable if distasteful but between themselves? I can't really accept it I guess. Perhaps I expected more. I do like the main story tho and hope God gets his ass kicked. Damn cliffhanger.

I got this book for free, in exchange of an honest review.

What I liked:

Loved returning to the characters that I fell in love with-Dahlia & Lucifer are good but I'm a Belial fan.

The books in this series are long, there's no doubt about that but they're fun!

We're shown a lot of the world that Dahlia & Lucifer created and their unique offspring.

A lot of stuff "happens" in this installment, when compared to the first one.

What happened to Belial was just heartbreaking.

What I didn't like:

the whole "jealous deity" angle- not liking it so far but reserving my judgement till I read the last book in the trilogy.

I'll definitely be reading the next one!
