Kyle Barton says

I am working through this slowly, as a “supplemental text”, in sync with a year-and-a-half study I am doing on the book of Genesis. Pink has an uncanny ability to synthesize revelation. This book goes through Genesis chapter by chapter and presents the pertinent points of typology or spiritual experience contained therein. It doesn’t cover everything, but what Pink chooses to focus on usually is incredibly insightful and yet succinctly laid out. Pink himself explains his intention:

"In these articles we are not attempting complete expositions. They are little more than "Notes"—"Gleanings"—and our prime endeavor is to indicate some of the broad outlines of truth in the hope that our readers will be led to fill in the details by their own personal studies."

-p. 172

In my opinion Pink has exceedingly succeeded in this endeavor. This book would be a helpful tool in teaching through Genesis (granted that you agree with him on some basic hermeneutics) due to this succinct yet illuminating methodology. For instance in chapter 13, Pink presents twelve points on the typology of Noah’s Ark in six short pages. In chapter 14, he presents seven points on the covenant God made with Noah—its occasion, source, basis, contents, design, requirements, and token. Even if you disagree with some of the details of his exposition, most people teaching through Genesis or interested in really studying this book, will seriously benefit from Pink’s study, if for nothing more than a foundation to build upon or a field to do their own gleanings from.

Very good!

This is a great book for learning the deeper meanings and significance of the book of Genesis. I highly recommend it!

There is a lot of real good stuff in this book. Pay special attention to the last few chapters where Pink draws the similarities between Joseph and Christ. A lot of preaching material in this book.

Unfortunately the person who borrowed this book never returned it.
