Excellent Series

I thoroughly enjoy this series.

Betty wasn't up to her normal sassy self. Cordelia and Amelia have a lot to look forward to. Axel and Pepper are calling in love nicely.

Easy read

I like this series. Murder, magic & mayhem that could end the town. Pepper, Axel & her cousins need to figure out the murderer, who took Grandma Craple's magic, how to stop the increasing cold & save Christmas. Easy to read, with the ending leading toward the next book. Looking forward to it!

Favorite

This was my favorite. I love Christmassy stuff and this had a decent dose, with a interesting mystery. Not a hard one but interesting. Enjoyed the regular characters and some new ones had great parts. Rufus didn't have a part in this book, so no further development there but he is a "bad guy" so that's okay.

Looking forward to the next book.

Another hit!

Pepper does it again! Pepper meets Axles parents, solves another murder, saves the town and Christmas in one fell swoop! Another hot hit!

A cute mystery with some beloved characters

Pepper and her new found family are quite the bunch. Her grandmother Betty is always good for a laugh and outrageous ideas. Pepper gets to meet her boyfriends parents and things just go crazy from there. It was a good mystery with a great plot.

Good read but she was really slow to connect the dots

Another winner. Just frustrating that it took her so long to connect everything. Well written, well visualised and loved the way the characters are exploring new facets of their power and relationships. Betty's nemesis is on fine form as she tries to take on the family however when she is found dead on the Christmas house tour it is Axel's visiting mother that is accused of murder. Now she starts looking into who would do such a thing as she knows the woman is innocent. Together she and Axel try to question who might have cause. Was it the constant fights she picked with people? Why does her dog keep escaping to their house. Then Betty's magic goes on the fritz and the weather gets colder and colder. Without Betty's magic the whole community is at risk and the dead woman's husband has called in the prison wraiths. As things get more dire she has to take on the magic that will keep the community safe - the Heart of the Fire. Throw in a ghost, a freezing spell, fighting the wraiths and finally bring the killer to book. Is it possible she can win and restore the community?

Magnolia Cove is turning into Ice!

Christmas is drawing near and the temperature is dropping! Someone dies during the Christmas home tours. How can this be happening? Grandma Betty can't fix it because her magic is broken too. It's all up to Pepper to find the killer and warm up the town. Is Pepper up to the job? Silly question!
