The Crystal Lattice Courtney M. Privett

Fiery Tesji Brier is an outcast in the remote village of Tiponia. His unusual appearance makes him the bullied target of the other children, while his primal, untamed ability to manipulate the weather has turned him into an object of fear. Just as he officially enters adulthood, the aftermath of a perplexing prophecy sends Tesji reeling into an adventure of self-discovery. As he travels across the wild continent of Melor, he encounters some who seem to know more about his true nature than Tesji himself does, including the immortal Time Children who haunt the ruined heart of the ancient world. The secrets he discovers about himself along the path to the mountains from his dreams just may save the world... or destroy it.

Excellent book!!

Anthonia says

A well written story of a young man name Tesji and his journey. He has powers and he is an outcast in the remote village where he lives. By taking his discovery on life he travels to discover others like like himself and his own prophecy. Loved this story, it's characters, setting, and what life is all about.
