Shawn Harris is a hacktivist, a software programmer/activist, who just pushed the boundaries too far. On trial for breaking into FBI systems, he's just been found guilty and sentenced to 30 years in maximum security prison. As his trial starts getting media attention, people find the facts of the case aren't so clear-cut. And other hackers decide to take matters into their own hands.

*I received this book as a first-reads giveaway

I do not read comic books by any means, but I found this to be very entertaining. The animation is slick and the parallels to the world of Anonymous kept my interest peaked. Highly recommend if you are interested in computer hacking in any form.
