Beth Sekinger says

Another good story!!

I have truly enjoyed the Fortune series! All of the stories are funny and entertaining!! I Can't wait to read more!

Julia Walker says

A little confusing - I kept thinking I must ahve missed the first one in the series but apparently this is the first one. It is funny and quirky with characters that seem like crazy southerners. A fun read but ended it feeling like I missed something.

Naomi says

Very like the series. Well done!

Debra Hahn says

Bombs and problems from the past

A fake funeral and a old haunt, who likes to make his own bombs. What a way to keep the girls hopping, like junpplng beans on espresso. Then talk about walking on egg shells, while trying to find the crazy mad bomber. The girls will crack you up on their high jinks as they go about Sinfull trying to get ahead of the bombers twenty. Read this crazy caper to find out who is the bomber and if Fourtune has to leave Sinfull Or not.

Susan Smith says

What a hoot.

Captured the characters perfectly. Well done cannot wait to read the next in the series. Well done keep up the good work.

Mary Lou Webb says

A tribute series

This book (and series) takes place in the world of Sinful, Louisiana, created by Jana DeLeon. Tribute stories are good because they reflect the respect the current author has for the original author. There's enough similar to the original characters that I can easily recognize them (which is a good thing); however, they seem a little off center. Fortune is less take-charge and more cling in this story, while Ida Belle and Gertie are coarser and crustier. The story is interesting and well-paced. It's also well-written, with the OneNote exception. In fact, it is one of the better written fan-fiction tribute stories I've read. By all means, give this series a try if you're fans of the original, but be ready to make allowances for deviations in characterization.

Mary Banik says

Very enjoyable

Shari Hearn captures the essence of the main characters so well, I had to check to make sure it wasn't Ms. DeLeons name on the front. I love the Sinful ladies. I always know I'm going to be laughing.

Holly Morado says

Most like the series

I've read all of the Miss. Fortune series and also the Novell's. This is the only one that seems to stay true to the characters that we love. The other books had the characters saying or behaving in ways that didn't work. I enjoyed this book, because I felt I was reading a book that was truly part of the series.

Barbie Jones says

Didn't miss a Beat

I gave this a five because it was very good and enjoyable. Ms. Hearn definitely have a clear understanding of all the characters.

Pam Collins says

Hilarious & Heartwarming

Any book set in the town of Sinful and filled with these characters is a must read for those that love comedy

with their action/romance. These books will entertain and delight your spirit. Enjoy.
