I was a little disappointed that this book was only 67 pages, but I heard the last book is a full length book. Besides the length it was a solid book. I am getting a little sick of her switching her mind from Darren to Tristan. She is devoted to Darren; however the second she sees Tristan she suddenly would do anything to be with him. I find that very hard to read, because, especially for myself, when the main character chooses someone to love it is much easier for the reader to love him too, but when the main character keeps flip flopping the reader has a very hard time deciding who they like. The grammatical errors were minimal this book, unlike the first one.

When I read the first book in this series, Grey Eyes, I didn't think I would be interested in reading Brown Eyes, the second book. But, since I had already purchased it before I read the first book, I decided to give the second book a go. I am so glad I did!

In Brown Eyes, we follow Ana through her transition into full understanding of who she is and was. We also watch her commit to her purpose. Her choices in love are much more difficult – she realizes just how much she loves Darren, but still feels a deep, soulful connection with Tristan.

While there were still a few typos in Brown Eyes, it was nothing compared to the first book. In fact, I would say that the typos in Brown Eyes were within an “acceptable” range. The story flowed much better; gone were the paragraphs that I had to try and make sense of. I also felt that the twists and turns in this book were ALL believable and transitions from one scene to the next were notably smoother in Brown Eyes.

All in all, I would say that Brown Eyes definitely redeemed the trilogy for me. I was excited to read the third book. In fact, I started it the very same night I finished Brown Eyes.

This book is a short novella in between the first and third book and is a nice continuation of the story.

This novella is only 67 pages and is action packed.

We will find out where Ana's loyalties really lay.. and who does she finally choose? To cap it all off there is an epic battle as the vampires and witches face off.

For such a short novella, there sure is alot within it and a must read in the "Forever Trilogy"

I Thought this book was really good, but it was so shory! gah!

I can't believe that Ana ran away with Tristan even if she did think it was to save her haven. I also can't believe Lea is actually an Archangel and made all this happen and that she killed all those people.

How could heaven actually cut Ana's wings, i mean seriously? Well... i guess after a milenia of Ana not doing her job they get a little tired and peeved.

I cannot believe Darren died and then came back to life. I think the next book is going to have a lot more to do with Heaven and angels and i think the angel Michael is gonna come down to right Ana's wrong. And if i read the books correctly, Tristan said it would not be a good idea.

Grrrrrr! I loved Darren but once he died and came back to life, I'm a little weary of him, i feel like something is off, look what happened to Merline/Ana when she tried to bring back Daemon after he died, he turned into a vampire, a killing machine.

I still don't like Duncan, even though i do feel bad for him because of his daughter Elena who is a vampire. I can't believe he tried to twist Ana's words like that. Gosh people, what happened the last time you didn't listen to Ana, Oh yeah! An army of Vampires showed up on your doorsteps. GEEESH

Well I am hoping the next book is really good and ties everything up nicely. I really hope Ana kills Daemon and that Darren and Ana live happily ever after.

Very short and sweet! This book seems to be a bridge between the opening book and maybe the big finale. A lot happens to Ana that changes her life forever. I am not sure that I would not have made the same choices as she did. There was really no indication that some of the characters in the book had the abilities they had. I can not tell who is her friend or foe now. There are so many different characters that I forget who they all are. I guess I am saying I am totally lost in this story and I don't think there is any hope of me figuring it out anytime soon. It truly has potential but I am so very lost. If heaven has abandoned her why does she not just do what she wants and hook up with Tristan??? Ana has chosen two destinies and she is being torn in two. She has no support system anymore with London dead and her grandmother living in the past. Who does she trust? I have no idea who that would be. Maybe the next book will have the answers I seek!

Loved it!

I was disappointed in this book. I bought the trilogy thinking I would be reading three books but this series could really have been condensed into two books. I started off really enjoying the first book and then found myself slowly losing interest as it progressed. I even considered giving up reading them at one stage but decided that I would soldier on and finish it. I feel the author just tried to cram as many supernatural beings as they could into one book.

Spoiler: If you haven't read the first one.

I want to like this book, I really do. But I just can't handle the whole two souls in one body theme. It seriously irks me. If you feel strongly that I might like the 3rd book despite my aversion and that it will all get better please let me know. I do hate not finishing a series. This is one of the first times I have actually stopped and not bothered to read the rest of the books.

Na Deela says

Ok, so I'm glad this one wasn't so confusing and was much easier to follow. I'm glad the story started right where the first left off. We got right down to business and straight into the action. One of the problems I had with this one was that at some point, we seemed to jump around a bit from one thing to another and I can't say much more than that without spoiling the story. The other problem was the ending. Again, trying to avoid a spoiler, I'm pretty irritated with the switch from one side to the other. It just isn't fair. I know, I know, life isn't fair, but still, really? Anyway, I still really like the story and hope book 3 brings about a satisfying resolution. I'm completely torn by what's happened so far....

Today's review is on *Brown Eyes* by Quinteria Ramey

Brown Eyes is the second book in Ramey's *The Forever Trilogy* and was a sheer pleasure to read. This novella packed such a punch that for a minute I couldn't believe I had finished. I found the story so dramatic that many times I found myself on the edge of my seat. Literally!!

Ana now has all of her memories back, and not too soon. The vampires are declaring war against the witches of Brighton in retaliation for the "murder" of one of their own. And though she receives a message from London giving her three days before the attack, it seems the vampires have a timeline all their own.

With the fate of Brighton weighing heavily on her, Ana chooses to leave the safety of the haven to possibly draw the vampires away. This however is not what happens in the end. Nearly all hope is lost as she makes contact with Darren and sees what's happening through his eyes. Everyone is dying, even him. In the end she has done what she always has. She ran away with Tristan.

There were quite a few mistakes in *Brown Eyes* that should have been picked up by the editor, and that is one of my pesky pet peeves. I actually can't wait for the next book to come out next month. I hope it lives up to this one.

I was very distracted by the grammar, spelling and syntax errors in this book. The story like was a combo of about six different series I have already read so it did not seem that original but there were many many errors in this book. The third in the series did not have as many errors and the storyline kind of redeemed itself in the end but the series came off to me as kind of spoofy and this one actually had a line out of another series I will not name, swear to God. I can understand what the authors are trying to accomplish by doing it as an Ebook but please, if you ever actually publish this on paper have someone who knows grammar and syntax read it first. I am one of those people who don't use the abbreviations when texting so I might just be being a little harsh. Or, the, if, and, left out in places that they were required and many other words as well as sentences being constructed in improper order. There were sentences that started one way and you could still tell what the point was but it annoys me and makes it difficult to concentrate on the story line. Please keep that in mind for your future series you have planned.

Wow. Where to start? This book left me wanting SO much more than what it gave. I was excited to learn that only a week after I found and purchased "Grey Eyes" that the next book in the series would be out. I was very disappointed in this book. They are calling the series a Trilogy. The first book more than lived up to my expectations. However, this book was not at all what it was made out to be. As a novella, it had enough substance to be a full book, but in the interest of making money and trying to get the book out so soon, too soon I'm afraid, they have compromised the story line as well as the ability for the reader to really follow the books without being let down. The authors didn't expand on the characters. It was just push and jump from one scene to the next without feeling. And I'm still not so sure that after the "Grey Eyes" book being fully explained as the title for the previous, why this one was "Brown Eyes". There isn't actually an explanation for anything in the book. It had tons of action, but no substance for any characters. And while it mentioned all characters, there wasn't anything to build from the last book. This is not a stand alone book. If you haven't read the first then don't bother. You'll never be able to follow along.

****Spoiler Alert!!!! You have been warned!!!!****

First, I would like to say that this was a really good read. I wasn't sure if I should give it five or four stars though. I decided to give it four (you'll see why when you read towards the end of my review). Felt so many emotions. Sad for Tristan, and many times wanted to smack Darren, surprised about the truth behind Ana's vision which made feel like a complete idiot and take back the thoughts I had about Darren (though still he should be more understanding of how Ana felt), and a little heartbroken about the grandmother's cold treatment towards Ana after everyone found who Ana really is. It was a bit intense. I didn't like the ending too much, I mean Darren dies but then he's not, and through some mystified means. How was he healed anyway? They didn't go into detail about that, but a certain vampire had a hand in that... I mean I didn't want Darren to die in the first place, but something about him being brought back to life makes me uneasy..... Especially since a vampire was involved. And that line Leia says to Ana, "All that I ask is that when the time comes, you remember where your allegiance lies." Holy cannoli, brings on some goosebumps and dread for whatever will happen in the next book. And to bring more anticipation Leia continues, "There are much bigger things at work than a silly rivalry between vampires and witches." What could she be talking about? There's more? Of course there's more. To find out what it is we'll have to read the next and final book to see.
