Uncaged Book Reviews:

I loved the friendship between these boys no matter how bad things got. Or how much they fought they were still there for each other. Really enjoyed the storytelling it was full of humor but also had its serious points as well. It doesn't hold back on the action. A perfect read for young adults who are looking to get in to reading, I would recommended this as I'm sure it will hold their attention.

An action packed sci fi tale about three boys who get taken to another planet whilst out on a camping trip. They must negotiate this alien world if they are to find a way home. Well written and enjoyable.

I received this book free as a read and review selection from the author at a web site called the Choosy Bookworm. I liked this book because it had the main characters trying to find the meaning of life through a belief in God. It had lots of references to the LDS Church as the boys were evidently members. The boys have many hardships and adventures and I think it is interesting how the author portrays there reactions to their situations. Good descriptions of the different fora and fauna.

I thoroughly enjoyed this book. There were a ton of great characters to fall in love with. Jumping from perilous adventure to perilous adventure, there wasn't a boring page in the book. Not only that, but there wasn't a single typo, grammar error, punctuation problem, etc. I found no technical mistakes.

The adventures of Todd, Eric and Nathan (and the few friends & enemies they met along the way) covered every emotion from fear to faith, sorrow to surprise, happiness to helplessness.

A couple of times, I found my self yelping out loud with excitement when the events turned in favor of the protagonists. I also found my self shedding a tear or two . . . sometimes out of sorrow, and other times out of joy.

The story was well written and well told, and one of the most fun reads I have had in years.

3.6 STARS -- I appreciated the lack of errors in the book. It is not the type of book I normally read, but I was never bored. I enjoyed the pacing.

I think I would get more attached to the characters if I knew a bit more about them--what they look like, their likes and dislikes, thoughts, etc.

Since God is my best friend, I was disappointed in Todd's and Nathan's noncommittal conclusions regarding Him. I still waver between 3 and 4 stars. I enjoyed the book much more than some I have read lately but it is hard to compare it to the 4-star books in my library. Possibly because I don't normally choose books like this one? Hmm... what to do?

Camping on Other Planets is a very good sci-fi where three teenagers are picked up by a beam of light while camping and set down in a scientific lab on another planet. These boys were raised to believe in God and taught in Seminary that if they are righteous they may inherit other worlds. However they do not believe this is what their bishops were talking about. They are tortured by the scientist before they are able to escape. Then find themselves out on a planet with giant scorpions, pirates, and other monsters as they work at getting home. There are some areas of touchy language and mild violence, but I would recommend this book for teenagers and adults. I would recommend that parents of younger teenagers read the story. I did enjoy the book and would like to read more of these young men's adventures.

Camping on Planets is overall a good Science Fiction YA read. It has a lot of good elements to it but I would honestly think that the boys would mature a bit after all that they go through on the planet. This is an engaging read for those who like stories with...essentially alien abductions, not the norm of what we all know, and having to learn how to survive on another planet while wondering if you're even going to survive. I enjoyed the book but it left me wanting more development in the overall character of the boys but it's a good book nonetheless.
