I enjoyed this story. It was pretty original, at least for me since I don't read tons of paranormal books. The build up and suspense through the story was great, the ending confrontation felt a little rushed and anticlimactic. The ending though! Holy cow. I can't wait to read the next one.

I feel that this book started out strong, but it quickly went downhill from there. Right away Chloe develops these powers that she's not entirely sure how to use, but as soon as trouble arises, she's all like, "Stand back, I've got this." Like, dude(tte), you JUST got your power, and now you're some kind of expert on how to use them and defeat bad guys? And her relationship with Drake is just rushed. I mean, what seventeen-year-old does it with someone whom she just met a few days before, and claims that he is the "love of her life" though she doesn't even know his last name? Their whole relationship is super corny and annoying. All-in-all, I feel that this book was a bit rushed, and maybe if the author had slowed down just a notch, she could have made Choe's love life and magic dilemma a little more realistic.

Fun new urban fantasy- an adventure all the way. The story focuses around six 'special' kids. I found myself debating in my mind which I'd find more powerful to be.... I was rooting for Chloe from the first time the popular kids were staring at her weird. I'd love how her powers progress and she gets to play with them a bit. Overall a fun read and a fun adventure.

Mad about says

The story started out very strong with a unique plot line and characters but their interactions lacked credibility as non existent relationships formed over night into close bonds which was very unbelievable amongst teenagers.

The book was fast paced and is suitable for younger readers but I wanted something with more action and excitement.

"This isn't how I expected death to be. I imagined it cold, dark & lonely. This is nothing of the sort. It is warm & light. I feel everything except alone. I feel brave & strong. And loved." excerpt from The Chosen

The fairytales are true. Witches and warlocks are not just lore. And you hold the power to prevent evil and darkness from controlling the world. You are The Chosen One.

Meet Chloe, your average high school senior just trying to navigate through school and escape small town life. Then on her eighteenth birthday everything changes. Suddenly she looks a little different. Her reflexes have quickened. She meets a mysterious guy in the school parking lot and instantly feels a connection to him. Oddest of all, she swears she sees a man watching her from the woods while in class. Nathan, Heather, Sean, and Olivia are like Chloe. Their lives all changed when they turned eighteen. From them Chloe learns that they all have special powers and are descendants from the Originals. She is the Chosen and possess powers of the elements. Nathan can hear other people's thoughts. Heather can bind the will of those around her. Sean can turn into any animal and Olivia can see their future. There is one additional member of the Descendants, Ethan, who is the guardian/protector of The Chosen One. The villain of this tale, Aden, has kidnapped Ethan in order to get to Chloe and the others. Aden's goal is to destroy them and take their power. Chloe and the others must use their gifts to track, locate and free Ethan all while learning where their ancestors came from and why after centuries is the Originals bloodline needed again.

For the author's debut novel, this reviewer thinks she knocked it out of the park. I was swept up in the first paragraph of the prologue. Kristin Clark took me on a journey with Chloe. Her depiction came alive and danced in my head. I absolutely look forward to reading future works by the very talented Kristin Clark.

I liked the basis for this book. The idea that a group of teens wake up on their 18th birthday and they have powers they must learn to use. Not only do they wake up with these powers, but they receive hints, guidance if you will, as to what will come next. They wait for the next person to turn 18 and the next until the final person, the chosen, one turns 18. At which time they will work together to fight off an evil demon, Aiden. This book is action packed. But it lacks a little in the back story. I would have liked to know just a little more about the past, the original chosen ones, who Aiden is and why he is after Chloe. The ending left the reader hanging, but I look forward to reading the next book. Hopefully my questions will be answered.

Tonja Drecker says

Firstly, I liked this cover--so dark and mysterious. And the book starts out the same way. . .well, not so dark but definitely mysterious. Chloe has her 18th birthday, but since her best friend is gone, isn't totally excited about it. But she doesn't have too much time to grumble because everything is about to go weird. When she looks in the mirror, she seems different. She's not sure how to explain it, but something about her has changed. At school, everyone is staring at her, especially the group of 'in' people can't seem to take their eyes off of her--totally strange for a girl who basically hid in the shadows most of her life.

And the story takes off from there. There's adventure (tons of adventure), handsome men (*aehm* hot ones with amazing powers) and bonds of friendship. Even when she's sleeping, Chloe is haunted by evil forces, which test her new powers to the limit. The added mystery of who or what this evil force is makes the entire

thing even better. I found it a little unrealistic that her new group of friends so readily accepted her as their leader (even if they knew it before, they are human teenagers), but really appreciated their extreme devotion.

The fight scenes are brutal, and Chloe comes away with more than a few scrapes or bruises. Despite her amazing super powers, she always seems fairly easy bait for Mr. Evil (I'm just calling him that) to attack. I really wished the heavens would have zapped her down a little more help because despite her hot boyfriends ability to always come to her rescue, I still wanted her to give the evil guy at least one really, really good punch in the nose. Yes, I got into this book and rooted for Chloe and her friends the entire way through until the wee-hours of the morning.

As for the romance side, love those hot heroes! Her dark, mysterious savior was amazing and simply enjoyable to have around. Another hero is thrown in half-way through, Chloe's Protector. Although hot, he has a little bit of an attitude, but still, one learns to love him more or less. A love triangle is formed - one that I would have loved to see a built-out more. . .but just a tiny bit.

My only big critic of this story is the end. It was a tear jerker, which was great but ended too abruptly. I was missing a feeling of closure to help me glide back out of this world. I'm hoping there will be a book 2 to help unravel the last open questions. A wonderful character like Chloe deserves more. And if I say that, obviously I want to see her again! So, yep, this was a good book

Apart from being amazingly written... The end made me heartbroken... The characters drew me in and I fell in love with them... (Maybe not heather haha) at the end... Seriously there need to be another book... Ohmysweetgoodness

“I was chosen. Chosen to make a choice. A choice to live, and a choice to die. I chose death, and dying in the arms of the man I love is peaceful.”

It's been quite a while since I have read a novel that had characters still aren't yet legally able to drink but I still found the book very interesting.

The Chosen is an urban fantasy where Chloe finds herself as "The Chosen" one and five other descendants compliment her powers fighting against an evil power that wants to have The Chosen's power all to himself. Chloe, Nathan, Heather, Sean, Olivia and Ethan are put on quite an extraordinary journey through this book. While they are trying to learn all about their ancestry and bloodlines, they need to figure out how to stop Aden. Chloe meets an interesting Irish gentleman, Drake who is not part of the descendants and has quite an edge to him. He comes to Chloe's aide quite often but a love triangle is formed between Chloe, Ethan and Drake.

You will follow all these characters on an unique journey as they discover their abilities and how they all work together. Chloe will find strength in herself but also to rely on those who she has come to love and trust.

For her debut book, Kristin does a decent job of keeping you interested in the plot. It's descriptive and fairly well-written. The Chosen is about first loves, long lasting friendships and learning about your bloodline all the while trying to just being a normal teenager. The ending will definitely leave you going "WTF" and praying that the next book is just around the corner!!

Four Stars

I loved the premise of this book, the idea of magically waking up on your eighteenth birthday and having powers you never knew existed, pretty awesome gift huh? That is what happens to Chloe, and she soon learns there are others in her town who experienced the same thing. They join together and become a group called The Chosen. They must defend humanity from the forces of evil. The first thing they must do is rescue Ethan who is Chloe's sworn protector. He is being held hostage by Aden a powerful wizard who wants to unleash evil on the world. They must work together as a group to find Ethan and rescue him so that they can defeat Aden. Their research leads them to an old magically guarded church and there they meet Maria who is able to tell them about the history of The Chosen and help them understand the history and Aden's possible impact on the future. They leave the church and rescue Ethan before preparing for the final battle. Of course we can't forget while they are doing noble and important work they are also high school students who must still deal with homework and social events. Chloe also meets Drake, a very cute Irish guy she connects with. I should mention that there are some scenes where they get physical so if that is not your kind of thing you can either skip those scenes. Aden finds the group and a battle ensues as you would expect, but I'm not going to tell you how it all turns out, read it and see.

My heart almost could not take the end of this book but what a ride to the end.

Chloe is the typical teenager and then on her 18th birthday she wakes up and feels different , she has noticed everyone is looking at her different

Now she finds out she is chosen and she is from a very long and perfect bloodline which puts a target on her,

Now she has to fight the evil and she has her talented boyfriend, and now a protector who is also handsome and that makes a love triangle which I really wish would have been explored more ,.

Now like I said at the beginning the ending I thought my heart was gonna give out .

I beg pretty please let the next book be out soon

Leann says

The Chosen is beautifully written using descriptive words throughout the story drawing the reader into the story and gripping on tight and not letting them go until the last word. Author Kristin Clark writes with a maturity that is breathtaking especially discovering that this is her first published novel.

Chloe wakes up on her 18th birthday to a package from her best friend, Kim. what is in the package Chloe

will find out later on in the story was suppose to find her. Upon waking up on her birthday, Chloe realizes she has faster reflexes, keen hearing and isn't as average as she has always felt. Once arriving at school she finds that she has become the subject of interest, not only with her teachers but with several of the popular kids at school. Fast forward.... Chloe finds out she is the "chosen one" of five other descendants from the Originals and will have to learn to control her new elemental powers so she can keep everyone safe from harm.

The Chosen is a great mixture of characters personalities. Chloe has a great standalone personality and very likable in the story. She is that typical teenager that walks through the halls unnoticed and then one day goes from nobody to somebody and has to deal with the new attention she does not really understand or like for that matter. The other descendants (characters) are Nathan, Heather, Sean, Olivia and Ethan; they are all strong characters and are very individualistic throughout the story, however, are very complementary to Chloe's character. The two characters that are not part of the descendants are Drake the mysterious sexy fella that has a little edge to him and Aden the evil sorcerer that wants nothing more than to have the chosen's power for himself.

True feelings: I think The Chosen was a well-written, extremely descriptive story about a young girl that is thrust into knowledge of new powers, learning how to use them to save herself and those that she has come to rely on, befriend and love. The Chosen is full of magic, thrilling adventure, descriptive scenery, first loves with a questionable character and long lasting friendships. I can't wait for the opportunity to be able to read the rest of the series and see what author Kristin Clark has up her sleeve.

With that said, I enjoyed this urban style fantasy! Kristin has a really talent for writing, it was a easy read, that had me hooked from the beginning! The main character, Chloe is your typical 17 year old, walking through life unnoticed. On her 18th birthday that all changes. She's the Chosen one and finds out she's a descendent of the most powerful bloodline in history! This is her destiny, who she is suppose to be. One-Click The Chosen today and discover the lies, secrets, love and more! I can't wait to read more from this author!-Reviewed by Heather-MNP REVIEWER

Can I just say that this author has a real talent for writing? Well, there you go. She does. I didn't know what to expect from this book other than it is Paranormal. That is my favorite genre, but not all Paranoimals are exciting and imaginative. I loved this book because it is, and I was not let down. The Chosen has some bright characters who steal the story right off the bat. You don't want to miss the descriptions of the mysterious guy and the guy-to-die-for. Magical things happen, and I was left wanting more.
