**The Dark Ages - Book II of III** Charles William Chadwick Oman

**Sir Charles William Chadwick Oman KBE (1860-1946) was a British military historian.**

His reconstructions of medieval battles from the fragmentary and distorted accounts left by chroniclers were pioneering. Occasionally his interpretations have been challenged, especially his widely copied thesis that British troops defeated their Napoleonic opponents by firepower alone. Paddy Griffith, among modern historians, claims that the British infantry's discipline and willingness to attack were equally important.

## **From Reader Review The Dark Ages - Book II of III for online ebook**

### **Mick Maye says**

#### **Dark ages story told**

Whilst in some respects the story is dated, this is a reasonably comprehensive telling of the period. The narrative flows and is easily read.

---

### **Stephen J. Mauris says**

#### **Easily Read**

Although the conversion to digital format left many sentences oddly worded and disjointed, it's still easily enough read to understand and retain. The language is stilted, considering when it was written, but it's not impossibly chewy.
