I really didn't like this textbook. It doesn't explain things well, doesn't define terms in the text, and a lot of the writing is pretentious and makes me feel stupid.

I took all 4 semesters at my college. Music Theory 1-4 so I used the whole book. I took this book very seriously. I read every chapter at least twice and did all the problems at the end of each chapter since the answers were in the back of the book. I analyzed all the examples given very thoroughly. This helped me do very well in the class. Most of it did not feel like work to me since this is a major passion of mine. The book gives you a website to go to to find the recordings found in text and workbook along with other things.
