Sometimes when you search for something, you find more than you bargained for.

Wildfires threaten River's End Ranch as Lindsey Montgomery arrives out to find the brother she just found out she has. Family has never meant much to her, her adoption not what she'd hoped for. After years of loneliness, she finds out that she had a twin brother, and they were separated as toddlers. She sets out to find him, but finds much more than a new brother.

Alex Bauer works with Dani Weston in Search and Rescue, and they have their hands full with a summer of wildfires. On top of that, he already has a big family—four sisters, in fact—and isn't looking for more to worry about. But when he meets Lindsey, he's got one more thing to set his mind to. Can all these families come together while keeping the ranch safe?

#### **Family says it all**

Her search for family ends at River's End Ranch but not the end to her story. She has a plan for her life but doesn't expect the welcome she gets. I only regret not knowing the why behind her story.

#### **Nice surprise!**

I'm sure others will realize how Alex's sisters were named. It was great to see that Travis does have blood relatives after all. Can't wait to see how the Montgomery storyline will expand.

The River's End Ranch series is unique in content from the characters' different careers, the fun Old West ranch, contemporary issue - using a paper map, forest fires, and the local matchmaker. Having volunteered at a local Red Cross office, I learned much about Red Cross Disaster Preparedness training. Cindy Caldwell's writing style makes for effortless reading - the right words on the right page in the right order, plus attention grabbing conflicts, a snickerdoodle couple, twist and turn plot, with a satisfying resolution makes this RRE romance a gem. Jaclyn even makes some appearances. Hooray!!!

### **The forest isn't the only thing flaming**

Sometimes a book just touches you in a way you can't explain. That was this book. There's love and adventure and chemistry and romance and family drama out the wazoo! There's just a depth to the characters that's hard to explain. This is a story I will read many times when I just need to feel good about life and the hope that each new day brings.

Reviewed at Romance Is Ageless

As the River's End Ranch comes closer to its finale we're given a story that completely shows why this particular series has become so beloved... and honestly will be quite missed, at least by me.

Lindsey and Alex are a wonderful couple, they each fill a void that shows itself when they finally feel those sparks. Lindsey never thought she needed family, needed anyone until she discovered what being cared for, and what caring about felt like. Discovering she had a twin brother threw her world for a tumble... but she found so much more on River's End Ranch.

I adored Alex, He's kind hearted, brave and tender all rolled up in a caring person. I first did a double-take, went back and checked some names again then had a really good laugh out loud moment as we are introduced to Alex's sisters. That was priceless. We got a chance to see Dani in a slightly different light from her always in control persona. She and Travis had a very special part to play in Lindsey and Alex's romance... and for their entire family.

I enjoyed Fanning Flames so much, and if you love really good Romance then you'll want to pick this one up. If you haven't read the entire series I would gently suggest that you consider going back to the beginning for it truly is one amazing ride... one that I know I'll be re-reading.

I read this title through my Kindle Unlimited subscription.
