Fidgety Fish

Ruth Galloway

Fidgety Fish Ruth Galloway

Tiddler is a very fidgety fish. So much so, that when his mother has had enough, she sends him out into the sea to swim, Watch out for the Big Fish she warns. Tiddler flips and glides faster than a rocket. He comes across several sea creatures before his curiosity gets the better of him and he enters a big, dark cave When Tiddler hears a loud snap, and everything suddenly goes dark, he realizes he is in the belly of the Big Fish ! Now more fidgety than ever, Tiddler jumps and bumps, tumbles and turns inside the belly of the fish, causing more than a bit of a disturbance until BURP! The big fish has had enough of Tiddler.

From Reader Review Fidgety Fish for online ebook

Peggy says

Adorable, brightly colored illustrations with a so-so story. The premise is promising - a mommy fish sends the child fish out to swim off some energy and he manages to get into trouble.... but the execution just isn't that good. Still it's ok... just not great.

Tori says

A fidgety fish drives his mother crazy with his fidgeting. When she sends him out to settle down, he quickly gets into trouble!
A good selection for fish-themed storytimes.

Hockey Mama says

Kiddos loved this for a bedtime story.
A book of short poems of different sea life creatures.
We acted out some of the "fidgety" fish poems.

Silly Shark
Fidgety Fish
Shy Octopus
Super Sea Horses
and more...

Asm says

want to read book

Nghenghe123 says

Iam think very well

Eliza says

I read this book to my girl (3.5 years) and she loved it! She loved all the colorful pages and things in them, she laughed a lot and wanted to re read it many times more!

Fidgeting, wriggled, squiggled and giggled - loved these words- good vocabulary for young children

Charlotte Smith says

It was okay book

The Brothers says

Tiddler the little fish just can't stop fidgeting. His mom sends him "outside" to work out his energy and he accidentally gets eaten by the big fish. But he fidgets his way out of the big fish's stomach. When he returns home, he at last is out of energy.

Really cute illustrations.

Vanessa Easley says

I didn't think it was a horrible book but I didn't think it made much sense really and I thought maybe it would talk more about being fidgety but instead the dish is eaten eventually for having so much energy and I don't feel it's the best message ever really but I found it enjoyable too. It's cute but doesn't seem to make much sense of have a good story.

Paula says

The rhyme is sometimes difficult to hear in the flow of the words but the illustrations are colorful and fun in this story about a fish who cannot sit still

Julie says

Tiddler the fish learns a lesson. The book has great vocabulary words...wriggled, squiggled, glided....and more. Good for kids 3 years old and up.

Melanie says

I like this book but more importantly my 3 year old loves it. Out of the 6 books from the library, this one is picked first each time we sit down to read. The story is cute and silly. It's a great read aloud.

Michelle says

Great for preschool because the pictures are big and bold and the story line is easy to follow.

Trish says

This book is about a little fish who can't sit still.

Kest Schwartzman says

If, hypothetically, you spend time with a small person who happens to really like whales, you'll find this book worthwhile as a bribe to get said small person to sit down.
