**Lost Knowledge of the Ancients: A Graham Hancock Reader** Graham Hancock , Glenn Kreisberg (editor)

Thinkers at the forefront in alternative theories on history, the origins of civilization, technology, and consciousness

- With contributions by Graham Hancock, Robert Bauval, Mark Booth, Richard Hoagland, Robert Schoch, John Anthony West, and others
- Topics range from quantum philosophy and paranormal phenomena to the secret history of NASA, instant polar shifts, and ancient Martian civilizations
- Explores where our present time fits into the cycle of human existence

A revolution of thought is under way in our world, fostered by decades of research and well-documented evidence by alternative theory pioneers such as Graham Hancock, John Anthony West, Robert Bauval, and Robert Schoch. These provocative, cutting-edge scholars now represent a direct challenge to the academic establishment as the paradigms of science and history shift and their ideas gain acceptance.

Representing the latest, often controversial findings in scientific and historical research, this anthology of essays commissioned by Graham Hancock, bestselling author of *Fingerprints of the Gods*, covers the forefront in alternative theories on history, the origins of civilization, technology, and consciousness with topics ranging from quantum philosophy and paranormal phenomena to the ancient use of electromagnetism, the effect of cosmic rays on human evolution, and NASA's cover-up of ancient Martian civilizations. Recognizing that many recent discoveries are actually rediscoveries of lost knowledge from past civilizations, these authors seek to understand where, within the bigger picture of human knowledge, our present time fits into the cycle of human existence.

## **From Reader Review Lost Knowledge of the Ancients: A Graham Hancock Reader for online ebook**

### **Linda Cadose says**

This book was very interesting and informative.

---

### **Sobia Makhdoom says**

I found many articles in this book written from a philosophical point of view rather than factual. Though I liked the article by S. Badrinarayan, maybe because never before so much detail has been given on the subject of an ancient civilization in Indian subcontinent. Still it lacked a few things, like its mysterious possible connection to the Maoris of Easter Island.

---

### **Debby Stassek says**

This collection of essays goes beyond the usual "ancient astronauts" kind of thing to also consider the underlying changes in philosophy that amended pre-history might bring. The Orion mapping is discussed in connection with the Egyptian pyramids, Irish round towers, Mayans, and ancient Arizona. One of the most interesting chapters claims that ruins of glass buildings were found on the moon!

---

### **Deborah says**

I am a Graham Hancock Fan til the end of time. LOVE THIS BOOK!

---

### **Joe Macko says**

Very controversial, this books needs to be read with an open mind. Just as the earth was believed to be the center of the universe as well as flat by the majority, in times past, this book discusses evidence that our history as recorded may have a lot more errors that need to be corrected. It is a shame that small minds sometime take so long to accept ideas that coincide with discover evidence. Great book to begin a journey of new discovery.

---

### **Sharon says**

A great anthology.

---

### **Marius Croeser says**

Alternative history, always makes for a good read.

---

### **Othello D. Gomes says**

It relays quite a brief insight of the ancient anomalies which people are still having large disputes over to this day. I really recommend this book if you really want to get deeply into lost ancient relics, but have never read anything related to such.

I'd say that one can add a lot more information than there already is present, but this like "Chariots Of The Gods" by Erich Von Daniken, is a good basic start for someone who's looking to get into Lost Knowledge and Postulative Ancient Anomalies.
