Himanish Prabhakar says

When I was reading this book series everything was full of ups and down. When I started to read the book, it lead me to other and then to other. For the whole series I'll rate the complete book series as 4 stars. There are many thoughts about the whole series. It really is a good book fantasy fiction series.

The characters are definitely good and really well developed in the series and the plot is good. I found the book interesting and would definitely recommend this book to all fantasy lovers.

Jeffrey says

Was expecting something of the aftermath of saidin....and like Winter's Heart this prologue was way too long. Could have been several smaller chapters

Paulius says

Meee.....

Diana says

I probably should have waited to read this until I was closer to being ready to start the book. Not knowing what's going on up to here really causes issues with reading this short story.

Sam says

This is the teaser prologue to Crossroads of Twilight (the tenth book in the series) and as with Snow (the previous prologue) it doesn't offer anything to new to those that have read the full novel and it will leave those who haven't on a cliff hanger. But it is a good quick little read and a good refresher if you've found yourself needing a break from the fuller novels.

Lumos Ktbspa says

I like it only coz I am a fan. And because the story starts to move in it! After a couple of previous books I got so hopeful with it.

Michael says

Freaking long!
